In 2004 Charley Boorman completed his astonishing round-the-world bike trip with his friend, Ewan McGregor. The journey left him exhausted, exhilarated and hungry for a new challenge. And what greater challenge than the Dakar rally? Beginning in Lisbon and ending in the Senegalese capital of Dakar, the rally covers 15,000 kilometres of treacherous terrain, and is widely regarded as the most dangerous race on earth. With his team-mates Simon Pavey and Matt Hall, Charley faced extreme temperatures, rode through shifting sands and stinging winds, and faced breakdowns miles from civilisation. Charley recounts his extraordinary adventures through Portugal, Morocco, Western Sahara, Mauritania, Mali, Guinea and Senegal. He also follows the stories of other riders - an eccentric, dedicated band of professionals and rookies who all dream of one thing: reaching the finishing line. Race to Dakar is the thrilling account of a race that has captured the imagination of millions.
Weird But True 1: Expanded Edition London Bridge
Amongst medical students, clinical OSCEs in specialty subjects are notorious for being the most difficult to prepare for due to the paucity of any books dedicated to the subject. For this very reason, we have written The Easy Guide to OSCEs for Specialties to fill this void and ease the already burdensome workload of medical students. It has been compiled by recently qualified doctors who have

experienced the new OSCE system first hand. The book has been written in a fresh style covering over 80 OSCE examination stations in a wide range of different subjects. This book is unique, covering medi.

Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies.Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools.It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook.This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation.Robert J. BlackwellAssistant Secretary for Maritime Affairs

Hollywood Portraits National Geographic Books
The leaf is one of the most prevalent and beautiful motifs in art and design, and Victorian artist James Colling's work is a virtuoso exploration of its infinite variety. Based upon painted designs as well

as motifs found in historic woven textiles, wood carvings, ironwork and stonework, his magnificent plates showcase over 300 black-and-white designs that range from the naturalistic to the stylized. Artistic renderings of foliage from many species of trees and plants — oak, maple, poppy, ivy, ferns, thistle — are complemented by designs incorporating buds, fruits and flowers. These lovely permission-free designs will also serve as a source of inspiration for artists, designers and craftspeople.

20th-century Photography John Wiley & Sons

The Great Allegheny Passage (GAP) is a bicycle rail trail extending 150 miles between Pittsburgh, PA, and Cumberland, MD. Defunct railroad lines function as a restored corridor, connecting southwestern PA and northern MD. Visualize a crushed limestone trail that rambles through urban neighborhoods, fertile farmlands, and panoramic mountain ranges. The weight of your body propels you through a marvelous natural world that dovetails scenic waterways. Listen to rustling leaves through a cacophony of bird songs, or breathe in the sweet aroma of blossoming wildflowers and fruit trees. Marvel at ancient ruins from the region's rich coal and steel heritage. Pedal across iron giants-refurbished bridges and viaducts-or travel through the cold, ghostly, darkened train tunnels. All these experiences, and many more, await you on the Great Allegheny Passage. Whether you are a two wheeled explorer or an armchair adventurer, it's time to decide. Are you ready for a truly amazing ride? Biking the GAP is a visual documentary of the trail, focusing on all unique and historical points of interest; the strength of this trail lies in the total sum of its parts rather than a handful of specific spectacles. The photography comprehensively represents the complex trail in all its character, charm, and personality. *Tony Northrup's Photography Buying Guide* Bulfinch Press This volume shows the powerful benefits that can emerge when therapists acknowledge illness as a vital part of everyone's psychology.

Yosemite National Park and the High Sierra were the places closest to Ansel Adams' heart, and this magnificent new collection presents the finest selection of his photographs and writings yet published on this "vast edifice of stone and space." Inspired by their grandeur, their wildness, and their primeval mystery, Adams' photos came to represent America's National Parks. During his lifetime Adams published seven books of images from this region; this new book brings the best of these early volumes together into a single work. His writings - alive with anecdote and insight - provide a backdrop for these stirring images, and an introduction by John Szarkowski, the most distinguished photography critic and curator of his time, provides testimony to the enduring impact of Adams' Yosemite vision. Yosemite and the High Sierra represents Adams' legacy at its most distilled and timeless.

Jupiter's ice moon Europa is widely regarded as the most likely place to find extraterrestrial life. This book tells the engaging story of Europa, the oceanic moon. It features a large number of stunning images of the ocean moon's surface, clearly displaying the spectacular crack patterns, extensive rifts and ridges, and refrozen pools of exposed water filled with rafts of displaced ice. Coverage also features firsthand accounts of Galileo's mission to Jupiter and its moons. The book tells the rough and tumble inside story of a very human enterprise in science that led to the discovery of a fantastic new world that might well harbor life.
