This book provides a resource that can be used by tutors who deliver and assess students who are studying Functional ICT Level 2. The book contains 22 summative assessment practice papers in a range of contexts, which collectively cover the ICT Functional Skills Standards, and allow the tutor the flexibility to include the skills of internet research and sending and receiving emails. Each paper is scenario-based with linked activities and is accompanied by a detailed marking scheme. Consideration has been given to a range of examiners' comments and the papers' tasks reflect these comments. Among the forms that are included are formative and summative assessment sheets and a student achievement tracking sheet. The inclusion of a reflective statement pro forma means that students can be encouraged to provide a structured review of their planning and working practices, and their strengths and weaknesses. Each of these skills is important in the world of work and day-to-day life. The opportunity for students to practise a number of summative assessment papers will better prepare them for the summative assessment set by their awarding body, and encourage their competence in that assessment.

Reflective practice is at the heart of effective teaching, and this book helps you develop into a reflective teacher of ICT. Everything you need is here: guidance on developing your analysis and self-

evaluation skills, the knowledge of what you are trying to achieve and why, and examples of how experienced teachers deliver successful lessons. The book shows you how to plan lessons, how to make good use of resources and how to assess pupils' progress effectively. Each chapter contains points for reflection, which encourage you to break off from your reading and think about the challenging questions that you face as a new teacher. The book comes with access to a companion website, www.sagepub.co.uk/secondary, where you will find: - Videos of real lessons so you can see the skills discussed in the text in action - Links to a range of sites that provide useful additional support - Extra planning and resource materials. If you are training to teach ICT this book will help you to improve your classroom performance, by providing you with practical advice, but also by helping you to think in depth about the key issues. It also provides examples of the research evidence that is needed in academic work at Masters level, essential for anyone undertaking an M-level PGCE.
