become a dominant field in financial economics. The growing interest in everything “corporate is fueled by a healthy combination of fundamental theoretical developments and recent widespread access to large transactional data bases. A less scientific—but nevertheless important—source of inspiration is a growing awareness of the important social implications of corporate behavior and governance. This Handbook takes stock of the main empirical findings to date across an unprecedented spectrum of corporate finance issues, ranging from econometric

methodology, to raising capital and capital structure choice, and to managerial incentives and corporate investment behavior. The surveys are written by leading empirical researchers that remain active in their respective areas of interest. With few exceptions, the writing style makes the chapters accessible to industry practitioners. For doctoral students and seasoned academics, the surveys offer dense roadmaps into the empirical research landscape and provide suggestions for future work. *The Handbooks in Finance series offers a broad group of outstanding

volumes in various areas of finance *Each individual volume in the series should present an accurate self-contained survey of a sub-field of finance *The series is international in scope with contributions from field leaders the world over

1.1 Cash Flow, Risk, Agency, Information, Investments The first volume dealt with the management of: cash flow (and the exchange of goods and services); risk; agency relationships; and information. The firm manages these aspects by legal tools and practices in the context of all commercial transactions. The second volume discussed investments. As voluntary contracts belong to the most important legal tools available to the firm, the second volume provided an introduction to the general legal aspects of generic investment contracts and payment obligations. This volume discusses funding transactions, exit, and a particular category of decisions raising existential questions (business acquisitions). Transactions which can be regarded as funding transactions from the perspective of a firm raising the funding can be regarded as investment transactions from the perspective of an investor that provides the funding. Although the perspective chosen in this volume is that of a firm raising funding, this volume will

simultaneously provide information about the legal aspects of many investment transactions. 1.2 Funding, Exit, Acquisitions Funding transactions are obviously an important way to manage cash flow. All investments will have to be funded in some way or another. The firm's funding mix will also influence risk in many ways. Funding. The most important way to raise funding is through retained profits and by using existing assets more efficiently.
