The surveys are written by leading empirical researchers that remain active in their respective areas of interest. investments. As voluntary contracts belong to the most important legal tools available to the firm, the second volume provided an introduction to the general legal aspects of generic investment contracts and payment obligations. This volume discusses funding transactions, exit, and a particular category of decisions raising existential questions (business acquisitions). Transactions which can be regarded as funding transactions from the perspective of a firm raising the funding can be regarded as investment transactions from the perspective of an investor that provides the funding. Although the perspective chosen in this volume is that of a firm raising funding, this volume will simultaneously provide information about the legal aspects of many investment transactions. 1.2 Funding, Exit, Acquisitions Funding transactions are obviously an important way to manage cash flow. All investments will have to be funded in some way or another. The firm's funding mix will also influence risk in many ways. Funding.
