Criminal Law and Its Processes Cengage Learning The Teaching of Criminal Law provides the first considered discussion of the pedagogy that should inform the teaching of criminal law. It originates from a survey of criminal law courses in different parts of the English-speaking world which showed significant similarity across countries and over time. It also showed that many aspects of substantive law are neglected. This prompted the question of whether any real consideration had been given to criminal law course design. This book seeks to provide a critical mass of thought on how to secure an understanding of substantive criminal law, by examining the course content that best illustrates the thought process of a criminal lawyer, by presenting innovative approaches for securing active learning by students, and by demonstrating how criminal law can secure other worthwhile graduate attributes by introducing wider contexts. This edited collection brings together contributions from academic teachers of criminal law from Australia, New Zealand, the United Kingdom, and Ireland who have considered issues of course design and often implemented them. Together, they examine several innovative approaches to the teaching of criminal law that have been adopted in a number of law schools around the world, both in teaching methodology and substantive content. The authors offer numerous suggestions for the design of a criminal law course that will ensure students gain useful insights into criminal law and its role in society. This book helps fill the gap in research into criminal law pedagogy and demonstrates that there are alternative ways of delivering this core part of the law degree. As such, this book will be of key interest to researchers, academics and lecturers in the fields of criminal law, pedagogy and teaching methods.

Cassese's International Criminal Law McGraw-Hill Higher Education This volume contributes to the emergence of a transnational canon of criminal law by critically engaging with formative texts in criminal legal thought since Hobbes.

In this follow-up volume to the critically acclaimed *The Constitutional State*, N. W. Barber explores how the principles of constitutionalism structure and influence successful states. Constitutionalism is not exclusively a mechanism to limit state powers. An attractive and satisfying account of constitutionalism, and, by derivation, of the state, can only be reached if the principles of constitutionalism are seen as interlocking parts of a broader doctrine. This holistic study of the relationship between the constitutional state and its central principles - sovereignty; the separation of powers; the rule of law; subsidiarity; democracy; and civil society - casts light on long-standing debates over the meaning and implications of constitutionalism. The book provides a concise introduction to constitutionalism and a detailed account of the nature and implications of each of the principles in question. It concludes with an examination of the importance of constitutional principles to the work of judges, legislators, and others involved in the operation and creation of the constitution. The book is essential reading for those seeking a definitive account of constitutionalism and its benefits.

In *Justice in Extreme Cases*, Darryl Robinson argues that the encounter between criminal law theory and international criminal law (ICL) can be illuminating in two directions: criminal law theory can challenge and

improve ICL, and conversely, ICL's novel puzzles can challenge and improve mainstream criminal law theory. Robinson recommends a 'coherentist' method for discussions of principles, justice and justification. Coherentism recognizes that prevailing understandings are fallible, contingent human constructs. This book will be a valuable resource to scholars and jurists in ICL, as well as scholars of criminal law theory and legal philosophy.

Fundamentals of Criminological and Criminal Justice Inquiry Cambridge University Press  
Written by a noted expert in criminal law, this book explores the philosophical underpinnings of the law's major doctrines concerning *actus reus*, *mens rea*, and defences, showing that they are not always driven by culpability. They are grounded also in principles of moral responsibility, ascriptive responsibility, and wrongdoing. As such, they engage wider debates about wrongdoing, and about the boundaries between liability and freedom. This multi-textured analysis allows this book to take more nuanced positions about many important controversies in criminal law. It argues, for example, that liability for omissions and for negligence—and even some strict liability elements—can sometimes be legitimate yet, at the same time, should be relatively rare. It also explains why principles of causation can differ in

the criminal law from other contexts; what is wrong with the 'voluntary act' requirement; and why luck can affect the wrongs we commit without changing our degree of blameworthiness for committing them. The book concludes with an account of the major types of defences, and of how they interact with an agent's wrong and her underlying motivations. This volume presents a coherent and rich vision of the criminal law that, by its sheer breadth, makes a distinctive contribution to the literature, of interest to lawyers and philosophers alike.
