Study Guide for Hirschey's Fundamentals of Managerial Economics, 9th Penguin

From small law offices to federal agencies, all entities within the justice system are governed by complicated economic factors and face daily financial decision-making. A complement to Strategic Finance for Criminal Justice Organizations, this volume considers the justice system from a variety of economic and financial perspectives and introduces quantitative methods designed to improve the efficiency and effectiveness of organizations in both the non-profit and for-profit sectors. Using only a minimum of theory, Economic and Financial Analysis for Criminal Justice Organizations demonstrates how to make decisions in the justice system using multiple financial and economic models. Designed for readers with little knowledge of

advanced mathematics, quantitative analysis, or spreadsheets, the book presents examples using straightforward, step-by-step processes with Excel and Linux Calc spreadsheet software. A variety of different types of decisions are considered, ranging from municipal bond issuance and valuation necessary for public revenues, pension planning, capital investment, determining the best use of monies toward construction projects, and other resource planning, allocation, and forecasting issues. From municipalities and police departments to for-profit prisons and security firms, the quantitative methods presented are designed to improve the efficiency and effectiveness of all organizations in the justice domain.

Replete with both full and "mini" case examples throughout, the book also contains chapter-ending exercises and problems for use by students in HR and finance programs. More than ever before, HR practitioners must empirically demonstrate a clear link between their practices and firm performance. In *Investing in People*,

Wayne F. Cascio and John W. Boudreau show exactly how to choose, implement, and use metrics to improve decision-making, optimize organizational effectiveness, and maximize the value of HR investments. They provide powerful techniques for looking inside the HR "black box," implementing human capital metrics that track the effectiveness of talent policies and practices, demonstrating the logical connections to financial and line-of-business, and using HR metrics to drive more effective decision-making. Using their powerful "LAMP" methodology (Logic, Analytics, Measures, and Process), the authors demonstrate how to measure and

analyze the value of every area of HR that impacts strategic value.
