From Dancing With the Stars finalist Cristian de la Fuente comes a tongue-in-cheek guide to understanding Latino culture-now in paperback. As a contestant on Dancing with the Stars, international star and actor Cristián de la Fuente automatically assumed the role of the flashy Latino dancer, donning bright fuchsia costumes with his bare chest exposed. But Cristián ultimately wowed the judges and reached the finals-not with his fancy footwork but with his charm. Quickly, the producers and viewers learned that just because someone is Latino does not necessarily mean he can dance... And Cristián proved Latinos can and should not be reduced to one-dimensional definitions. In *Hot. Passionate. And Illegal?*, Cristián uses his personal and funny experiences as a Latino in Hollywood to dispel common myths and admit the sometimes

embarrassing, yet endearing, truths about Latinos.

The book is intended to provide a definitive view of the field of humor research for both beginning and established scholars in a variety of fields who are developing an interest in humor and need to familiarize themselves with the available body of knowledge. Each chapter of the book is devoted to an important aspect of humor research or to a disciplinary approach to the

field, and each is written by the leading expert or emerging scholar in that area. There are two primary motivations for the book. The positive one is to collect and summarize the impressive body of knowledge accumulated in humor research in and around Humor: The International Journal of Humor Research. The negative motivation is to prevent the embarrassment to and from the "first-timers," often established experts in their own field, who venture into humor research without any notion that there already exists a body of knowledge they need to acquire before publishing anything on the subject-unless they are in the business of reinventing the wheel and have serious doubts about its being round! The organization of the book

---

reflects the main groups of scholars participating in the increasingly popular and high-powered humor research movement throughout the world, an 800 to 1,000-strong contingent, and growing. The chapters are organized along the same lines: History, Research Issues, Main Directions, Current Situation, Possible Future, Bibliography-and use the authors' definitive credentials not to promote an individual view, but rather to give the reader a good comprehensive and condensed view of the area.

Research on humor is carried out in a

number of areas in psychology, including the cognitive (What makes something funny?), developmental (when do we develop a sense of humor?), and social (how is humor used in social interactions?) Although there is enough interest in the area to have spawned several societies, the literature is dispersed in a number of primary journals, with little in the way of integration of the material into a book. Dr. Martin is one of the best known researchers in the area, and his research goes across subdisciplines in psychology to be of wide appeal. How do we understand, imagine and remember childhood? In what ways do cultural representations and scientific discourses meet in their ways of portraying children? *Childhood, Literature and Science* aims to answer these questions by tracing how images of childhood(s) and children in Western modernity are entangled with notions of innocence and fragility, but also with sin and evilness. Indeed, this interdisciplinary collection investigates how different child figures emerge or disappear in imaginative and social representations, in the memories of adult selves, and in expert knowledge. Questions about childhood in Western modernity, culture and science are also addressed through insightful analysis of a variety of materials from the Enlightenment age to the present day – such as fiction, life narratives, visual images, scientific texts and public writings. Analysing childhood as a discursive construction, *Childhood, Literature and Science* will appeal to scholars as well as undergraduate and postgraduate students interested in fields such as: Childhood Studies, History, Gender
