In this alternately amusing and appalling exposé of the standardized test industry, fifteen-year veteran Todd Farley describes statisticians who make decisions about students without even looking at their test answers; state education officials willing to change the way tests are scored whenever they don't like the results; and massive, multi-national, for-profit testing companies who regularly opt for expediency and profit over the altruistic educational goals of teaching and learning. Although there are absurd moments--as when Farley and coworkers had to grade students based on how they described the taste of their favorite food-- the enormous importance of standardized tests in the post "No Child Left Behind" era make this no laughing matter. "This book is dynamite! The nice personal voice makes it utterly accessible and enticing, wholly apart from the terribly important ammunition it provides to those of us in the 'testing wars' at national and local levels."—Jonathan Kozol, author of *Savage Inequities*

Ignorance is Blitz Cambridge University Press

"By legitimizing a stark, one-size-fits-all industrial model of education, the No Child Left Behind legislation has denied the inherent complexity and richness of what teachers do.

Discussing teaching in terms of chaos theory, Dexter Chapin

explains that while excellent teaching may occur at the edge of chaos, it is not chaotic. There are patterns common to master teachers that connect the components of effective teaching to give meaning and stability to the classroom, allowing master teachers to get up morning after morning and make a genuine, positive difference in students' lives. Master Teachers presents teaching as a complex, adaptive exercise undertaken at the edge of chaos where creativity and invention are maximized."--BOOK JACKET.
