Against the backdrop of his most haunting, high-profile murder and child abuse cases, a veteran prosecutor goes beyond an insider's reflection to shine a light on the humanlike qualities personified in the U.S. criminal justice system and what this means for our future. The Humanity of Justice is a procedural true-crime

book told through the eyes and heart of a veteran criminal prosecutor who cares about the people he meets and their life-altering circumstances. Burke E. Strunsky, a senior deputy district attorney in southern California, takes the reader inside the courtroom for some of the most haunting criminal cases in the state as well as the nation, including: a highly respected church leader who brutally murders his wife for the insurance money while their baby sleeps peacefully in another room; a twisted father who sexually molests his daughter's own friends at her slumber parties; a former police chief who drowns his wife of thirty years in their backyard spa; and a young man who sadistically tortures and kills a helpless three-year-old boy, yet manages to dodge the death penalty. Strunsky's own impassioned social and moral commentary is woven throughout this thought-provoking book on issues significant to the world of criminal justice. Even in the midst of the darkest stories, the voices and courage of the victims and those who love them will leave the reader touched and inspired. 100% of the proceeds from this book will be donated to The Humanity of Justice Foundation, a non-profit organization, to help prevent child abuse and neglect.

81 Fresh & Fun Critical-thinking Activities R&L Education

Exceptional education, also known as special education, is often grounded within exclusive and deficit mindsets and practices. Research has shown perpetual challenges with disproportionate identification of culturally and linguistically diverse students, especially Black and Indigenous students. Research has also shown perpetual use of inappropriate placement in more restrictive learning environments for marginalized students, often starting in Pre-K. Exceptional education practitioners often engage in practices that place disability before ability in instruction, behavior management, identification and use of related services, and educational setting placement decisions. These practices, among others, have resulted in a crippled system that situates students with exceptionalities in perceptions of deviance, ineptitude, and perpetuate systemic oppression. The Handbook of Research on Challenging Deficit Thinking for Exceptional Education Improvement unites current theory and practices to communicate the next steps to end the current harmful practices and experiences of exceptional students through critical analysis of current practices, mindsets, and policies. With the information this book provides, practitioners have the power to implement direct and explicit actions across levels to end the harm and liberate our most vulnerable populations. Covering topics such as accelerated learning, educator preparation programs, and intersectional perspectives, this book is a dynamic resource for teachers in exceptional education, general teachers, social workers, psychologists, educational leaders, organizational leaders, the criminal justice system, law enforcement agencies, government agencies, policymakers, curriculum designers, testing companies, current educational

practitioners, administrators, post-grad students, professors, researchers, and academicians.

In 2011 a 24-year-old man pled guilty to falsifying his application to Harvard University, bilking the world's most prestigious university out of more than \$45,000 in prizes and scholarships. Using forged SAT scores, transcripts, and letters of recommendation, Adam Wheeler outsmarted Harvard's admissions office and then went even further. Once accepted into the Ivy League he kept lying, cheating, and succeeding, winning thousands of dollars in prizes and grants. But then he shot too far. During his senior year, Wheeler applied for Rhodes and Fulbright scholarships, a gamble that finally exposed his extensive tangle of lies. Alerted that he was under suspicion, Wheeler fled Harvard but did not stop. He successfully filed more fraudulent applications at top-tier schools across the country, until some vigilant admissions officers, Massachusetts police, and even his own parents forced him off his computer and into court. As reporters for The Harvard Crimson, Julie Zauzmer and Xi Yu covered the case from the moment the news of Wheeler's indictment broke. In the course of their reporting, they interviewed dozens of friends, roommates, teachers, and advisors who knew Wheeler at the many phases of his suspect academic career. Their fascinating account reveals how one serial scammer took on the competitive world of the Ivy League—and almost won.

NEW YORK TIMES BESTSELLER • Are you an Upholder, a Questioner, an Obliger, or a Rebel? From the author of *Better Than Before* and *The Happiness Project* comes a groundbreaking analysis of personality type that “will immediately improve every area of your life” (Melissa Urban, co-founder of the Whole30). During her multibook investigation into human nature, Gretchen Rubin realized that by asking the seemingly dry question “How do I respond to expectations?” we gain explosive self-knowledge. She discovered that based on their answer, people fit into Four Tendencies: • Upholders meet outer and inner expectations readily. “Discipline is my freedom.” • Questioners meet inner expectations, but meet outer expectations only if they make sense. “If you convince me why, I’ll comply.” • Obligers (the largest Tendency) meet outer expectations, but struggle to meet inner expectations—therefore, they need outer accountability to meet inner expectations. “You can count on me, and I’m counting on you to count on me.” • Rebels (the smallest group) resist all expectations, outer and inner alike. They do what they choose to do, when they choose to do it, and typically they don’t tell themselves what to do. “You can’t make me, and neither can I.”

Our Tendency shapes every aspect of our behavior, so using this framework allows us to make better decisions, meet deadlines, suffer less stress, and engage more effectively. It’s far easier to succeed when you know what works for you. With sharp insight, compelling research, and hilarious examples, *The Four Tendencies* will help you get happier, healthier, more productive, and more creative.
