For a starter, let's face it; I made it to 94 years and frankly, that is an achievement that dwarf s anything else I can say about my long life so far, (and I ain't through yet.) If I were to point to the most significant event of my life I would have to say that I was a witness to a critical event in American history and perhaps in world history, the devastating attack on our Navy at Pearl Harbor on December 7, 1941. The rest of my life was somewhat nondescript in the overall scheme of things in this world. I was born (just like everyone else) in Holland Michigan, way back, a good 200 years ago.' I was a musician from the start, playing the harmonica at 10 years old. (Also, later the ukulele, mandolin, Hawaiian guitar, orchestral guitar, and marimba.) My first performance was with the harmonica before my 8th grade class! Later on as a teenager I played in an orchestra and performed at dances, night clubs and church events. Currently, I duo on the classical guitar with my flute player playing occasional concerts. Now that I think of it, I was pretty good. Being a small 109 pound guy I joined the Navy in 1940 so as to not get drafted. WW2 was already raging in Europe. I had to enlist for 6 years. That put me in WW2 from the beginning to the end and then some. Hey, I also performed on the guitar in the Navy aboard ship (between naval battles!) Upon discharge in 1946 I joined with my high school buddy to get the first printed circuit patent. I am really proud of that because printed circuits are in everything that's electronic. And we started it! It was particularly smart of me because 40 years later I needed the printed circuit in my pacemaker! Such foresight! At the same time I entered college at MIT. Our patent royalties helped pay for tuition. As long as I am being proud, I may as well include graduating from that top technical school in the country, which is pretty good for a son of an immigrant from Italy. From thereon my engineering career included teaching at Cal Poly in San Luis Obispo lecturing at USC and work in computers and programming. But of course, most of my work was in the Defense industry. Now in retirement I am doing things I like to do: play music and write. Looking back I think that getting an engineering degree was a big mistake. I should have been a gigolo. Look at what I missed! Alas, it is too late!

Evan Hoovler uses his decades of comedy experience to engage students in the classroom—and now he's sharing all his secrets in Teaching With Comedy. Any teacher can become more effective and engaging by laughing along with these simple exercises. Instead of using “look-at-me” tactics to get students' attention, Hoovler wants to do the opposite—he uses humor to focus attention on the lesson (not the instructor) and guide a distracted class back on track. With anecdotes and explanations, Hoovler walks you through how to use certain jokes to keep students engaged and on task. You'll get prompts and ideas for exercises to use in your own classes, from an expert with decades of experience. Even those who aren't teachers will enjoy this seasoned educator's Dave Barry-esque takes on public schools, the history of teaching, educational philosophy, and what exactly makes a joke-telling teacher good versus unbearably corny. Teaching with Comedy is the perfect gift for any teacher or comedy fan seeking light-but-meaningful reading fare.
