In *Smart Kids, Bad Schools*, award-winning author and educator Brian Crosby draws on his twenty years as a high school English teacher to offer a candid appraisal of why our schools are failing and what we must do to save them. Crosby's no-holds-barred critique of the broken education system leaves no stone unturned: he is unapologetic and uncompromising in his exposé of how teachers, administrators, unions, and parents all play a part in this national tragedy. Crosby offers 38 ideas to save America's future and his proposed remedies are revolutionary. He recommends bold measures, such as lengthening the school day and school year, forcing parents to volunteer at schools, abolishing

homework, outlawing teachers unions, and cutting special education funding. The result is a book that is likely to inflame passions on all sides of the political spectrum, and, in the process, introduce new ideas to a debate that is in dire need of them.

Kids ask the darndest things . . . and here are the answers—all in one helpful book! Anyone who has ever been a kid, raised a kid, or spent any time with kids knows that asking questions is a critical part of growing up. Kids have curious minds and they come up with some very interesting questions. But the truth is adults don't always know the answers. The *Handy Answer Book for Kids (and Parents)* comes to the rescue. Written with a child's imagination in mind, this easy-to-understand book is a launching pad for curious young minds and a life raft for parents at wits end. It addresses nearly 800 queries with enough depth and detail to both satisfy the curiosity of persistent young inquisitors and provide parents with a secure sense of a job well done. It'll equip every parent for those difficult, absurd, or sometimes funny questions from their kids, such as Is there life on Mars? Do rivers ever dry up? Why are there wars? Is there such a thing as a funny bone? Why do dogs bark? Why is the sky blue? Why do people have to grow old? Why do people speak different languages?

F stands for "funny" in this perfect gift for students or anyone who has ever had to struggle through a test and needs a good laugh. Celebrating the creative side of failure in a way we can all relate to, *F in Exams* gathers the most hilarious and inventive test answers provided by students who, faced with a question they have no hope of getting right, decide to have a little fun instead. Whether in science (Q: What is the highest frequency noise that a human can register? A: Mariah Carey), the humanities (Q: What did Mahatma Gandhi and Genghis Khan have in common? A: Unusual names), math, or other subjects, these 250 entries prove that while everyone enjoys the spectacle of failure, it's even sweeter to see a FAIL turn into a WIN.

AN INSTANT NEW YORK TIMES BESTSELLER! "The questions throughout *What If? 2* are equal parts brilliant, gross, and wonderfully absurd and the answers are thorough, deeply researched, and great fun. . . . Science isn't easy, but in Munroe's capable hands, it surely can be fun." —TIME The #1 New York Times bestselling author of *What If?* and *How To* answers more of the weirdest questions you never thought to ask The millions of people around the world who read and loved *What If?* still have questions, and those questions are getting stranger. Thank goodness *xkcd* creator Randall Munroe is here to help. Planning to ride a fire pole from the Moon back to Earth? The hardest part is sticking the landing. Hoping to cool the atmosphere by opening everyone's freezer door at the same time? Maybe it's time for a brief introduction to thermodynamics. Want to know what would happen if you rode a helicopter blade, built a billion-story building, made a lava lamp out of lava, or jumped on a geyser as it erupted? Okay, if you insist. Before you go on a cosmic road trip, feed the residents of New York City to a T. rex, or fill every church with bananas, be sure to consult this practical guide for impractical ideas. Unfazed by absurdity, Munroe consults the latest research on everything from swing-set physics to airliner catapult — design to answer his readers' questions, clearly and concisely, with illuminating and occasionally terrifying illustrations. As he consistently demonstrates, you can learn a lot from examining how the world might work in very specific extreme circumstances.
