When I accidentally turn a coven of witches into nightmares, I find out what that something is. Magic. And it turns out, I have a crap load of it. As a latent power awakens deep inside of me, I'm exposed to one of the most powerful and corrupt organizations in the magical world-the Mages' Guild. Barely knowing a spell from a few swear words and luck, I won't be able to evade them alone. And that's when I meet him. The Rogue Natural. The best and most feared mage in the world. He's dangerous,

mysterious, and has a vendetta of his own. He is now the only thing between me and magical enslavement.

So rather than wait to be cornered...I'm going to take the fight to them. But Emery and I can't do it alone. We have to assemble enough power in the magical world to rip the Guild off of their high horse. And to do that, we'll need the shifters as well as the vampires. Except, shifters and vampires would rather kill each other than work together. And after a surprise run-in with a strangely powerful goblin, my world

is slapped sideways. If I can't learn the strange new power I totally-didn't-steal-because-it-wasn't-my-fault, and can't get arch nemeses to work together for the common good, the Guild will finally have their prize. Me. This epic adventure will leave you breathless

Warrior Fae Trapped Orchard Books

Hidden away in foggy, uncharted rain forest valleys in Northern California are the largest and tallest organisms the world has ever sustained—the coast redwood trees, *Sequoia sempervirens*. Ninety-six percent of the ancient redwood forests have been destroyed by logging, but the untouched fragments that remain are among the great wonders of nature. The biggest redwoods have trunks up to thirty feet wide and can rise more than thirty-five stories above the ground, forming cathedral-like structures in the air. Until recently, redwoods were thought to be virtually impossible to ascend, and the canopy at the tops of these majestic trees was undiscovered. In *The Wild Trees*, Richard Preston unfolds the spellbinding story of Steve Sillett, Marie

Antoine, and the tiny group of daring botanists and amateur naturalists that found a lost world above California, a world that is dangerous, hauntingly beautiful, and unexplored. The canopy voyagers are young—just college students when they start their quest—and they share a passion for these trees, persevering in spite of sometimes crushing personal obstacles and failings. They take big risks, they ignore common wisdom (such as the notion that there's nothing left to discover in North America), and they even make love in hammocks stretched between branches three hundred feet in the air. The deep redwood canopy is a vertical Eden filled with mosses, lichens, spotted salamanders, hanging gardens of ferns, and thickets of huckleberry bushes, all growing out of

massive trunk systems that have fused and biosphere itself. formed flying buttresses, sometimes carved into blackened chambers, hollowed out by fire, called “fire caves.” Thick layers of soil sitting on limbs harbor animal and plant life that is unknown to science. Humans move through the deep canopy suspended on ropes, far out of sight of the ground, knowing that the price of a small mistake can be a plunge to one’s death. Preston’s account of this amazing world, by turns terrifying, moving, and fascinating, is an adventure story told in novelistic detail by a master of nonfiction narrative. The author shares his protagonists’ passion for tall trees, and he mastered the techniques of tall-tree climbing to tell the story in *The Wild Trees*—the story of the fate of the world’s most splendid forests and of the imperiled

This research addresses the archaic or permanent conditions of architecture. According to Pre-Socratic tradition, since earliest times, when human kind began to

analyze the universe, there was this important proposition lasting until today that nature and life are connected to the four principles of earth, water, air and fire. This thesis not only relates to basic conditions of man on earth, but also targets the fundamentals of architecture. It addresses how nature and life are connected to the four principles of earth, water, air and fire, and how natural elements should inspire our architectural actions today. The book targets the fundamentals of architecture through many contemporary projects developed at ETH Zurich Chair of Architecture and by Design Prof. DR. JOsep Lluís Mateo.

A Pulitzer Prize Finalist In this magisterial study of the relationship between illness and art, the best-selling author of *An Unquiet Mind* brings a fresh perspective to the life and work of

Pulitzer Prize-winning poet Robert Lowell. In his poetry, Lowell put his manic-depressive illness (now known as bipolar disorder) into the public domain, and in the process created a new and arresting language for madness. Here Dr. Kay Redfield Jamison brings her expertise in mood disorders to bear on Lowell's story, illuminating not only the relationships between mania, depression, and creativity but also how Lowell's illness and treatment influenced his work (and often became its subject). A bold, sympathetic account of a poet who was—both despite and because of mental illness—a passionate, original observer of the human condition.

A mage with coveted magic and the

scion of a powerful family are magically bound together in service to the Empire in the first book of a spellbinding fantasy trilogy from David Gemmell Award-nominated author Melissa Caruso.

Magic is scarce in the Raverran Empire, and those born with such powers are strictly controlled -- taken as children and conscripted into the Falcon army, to be used as weapons in times of war.

Zaira has lived her life on the streets to avoid this fate, hiding her mage mark and thieving to survive. But hers is a rare and dangerous magic, one that threatens the entire Empire. Lady Amalia Cornaro was never meant to be a Falconer. Heiress and scholar, she was born into a treacherous world of

political machinations. But fate has bound the heir and the mage. And as war looms on the horizon, a single spark could turn their city into a pyre. Praise for *Swords and Fire*: "Charming, intelligent, fast-moving, beautifully atmospheric, with a heroine and other characters whom I really liked as people. "A truly great writer and explorer of the human mind." — Jo Nesbø "What grips readers is the enormous amount of emotion [Fossum] works up as we get closer and closer to reliving the murderous event in question . . . *Hell Fire* is close to heartbreaking, and there are not many novels, thrillers or otherwise, you can say that about." — Los Angeles Times A gruesome tableau awaits Inspector Konrad Sejer in the oppressive summer heat: a

woman and a young boy lay dead in a pool of blood near a dank trailer. The motivation behind the deaths of Bonnie Hayden and her five-year-old son, Simon, is mysterious—there is no sign of robbery. Who would brutally stab a defenseless woman and her child? In a parallel story, another mother, Mass Malthe, navigates life with her adult son, Eddie. It's a relationship some would call too close, since Eddie's father, a man he obsesses over, abandoned them many years ago. As Sejer searches for the truth behind the seemingly senseless killings, Hell Fire deftly probes why we lie to those closest to us, and what drives people to commit the most horrific of crimes. "There's always something dark hovering on the edge of the page, something about getting what you wish for

and the crushing irony when that gift proves your undoing." — New York Times Book Review
