What is organizational culture? And how might knowledge of culture improve our organizational performances? This stimulating workbook guides students through data collection, analysis, interpretation, and application of organizational culture data using a practical five-step process. It begins

by explaining theories on which organizational culture is based. It then provides guides for gathering information to help improve organizational performance. Based on more than 20 years of experience in using this approach with hundreds of students, the authors help students apply cultural insights to fostering diversity, supporting organizational change, making leadership more dynamic, exploring the link between ethics and culture, and making organizations more effective overall.

International Handbook of Career Guidance BRILL

Job search is and always has been an integral part of people's working lives. Whether one is brand new to the labor market or considered a mature, experienced worker, job

seekers are regularly met with new challenges in a variety of organizational settings. Edited by Ute-Christine Klehe and Edwin A.J. van Hooft, *The Oxford Handbook of Job Loss and Job Search* provides readers with one of the first comprehensive overviews of the latest research and empirical knowledge in the areas of job loss and job search. Multidisciplinary in nature, Klehe, van Hooft, and their contributing authors offer fascinating insight into the diverse theoretical and methodological perspectives from which job

loss and job search have been studied, such as psychology, sociology, labor studies, and economics. Discussing the antecedents and consequences of job loss, as well as outside circumstances that may necessitate a more rigorous job hunt, this Handbook presents in-depth and up-to-date knowledge on the methods and processes of this important time in one's life. Further, it examines the unique circumstances faced by different populations during their job search, such as those working job-to-job, the unemployed, mature job seekers, international job seekers, and temporary employed workers. Job loss and unemployment are among the worst stressors individuals can encounter during their lifetimes. As a result, this Handbook concludes with a

discussion of the various types of interventions developed to aid the unemployed. Further, it offers readers important insights and identifies best practices for both scholars and practitioners working in the areas of job loss, unemployment, career transitions, outplacement, and job search.

This is a 3-book bundle, which addresses various subtopics, including but not limited to these: Book 1: Are you nervous about your job interview? Do you have the feeling that you are not prepared to face an invasive number of questions about your accomplishments and career choices? Well, have no fear, my friend. You are at the right address. This book can guide you along. Topics that will be discussed in this book include how to make a lasting first impression, asking specific questions about your motivation, how to dress, what to bring, how to react on the phone (if applicable), how to show your interviewer that you are listening and interacting, etc. Book 2: This book will lead you in your next job interview. It will help you understand the reasons why interviewers ask

specific questions and how to answer them. Being prepared for those questions can increase your chances of getting the job you want. It will also show you which questions are smart to ask your potential future employer, because, as opposed to what some people may suppose, this is an important part of the interview to show how passionate you may be about your future job. Last but not least, most people forget to follow up and simply wait for the interviewer to contact them. This is a big mistake. If you want to stand out among the crowd, it is important to follow up after the interview, and show how driven and motivated you are. Book 3: When it comes to job interviews, it would surprise you how many people don't have a clue what to do. They think if they just act like themselves (nothing wrong with that), all else will just happen. That's not how it works. The people who are most prepared usually stand the highest chance to make a good impression on the interviewer. Aside from questions like "tell me about yourself" or "how would you describe yourself," they will look for competent employees who know how to sell their skillset with confidence. They want to know about your weaknesses, and if those weaknesses will create any problems in their company. So, how will you do in your next job interview? Well, it's up to you. But the right information, such as the details you can find in this guide, can certainly help.

This book challenges and revises existing ways of thinking about leaving care policy, practice and research at regional, national and international levels. Bringing together contributors from fifteen countries, it covers a range of topical policy and practice issues within national,

international or comparative contexts. These include youth justice, disability, access to higher education, the role of advocacy groups, ethical challenges and cultural factors. In doing so it demonstrates that, whilst young people are universally a vulnerable group, there are vast differences in their experiences of out-of-home care and transitions from care, and their shorter and longer-term outcomes. Equally, there are significant variations between jurisdictions in terms of the legislative, policy and practice supports and opportunities made available to them. This significant edited collection is essential reading for all those who work with young people from care, including social workers, counsellors, and youth and community practitioners, as well as for students and scholars of child welfare.

The field of technical communication is rapidly expanding in both the academic world and the private sector, yet a problematic divide remains between theory and practice. Here Stuart A. Selber and Johndan Johnson-Eilola, both respected scholars and teachers of technical communication, effectively bridge that gap. Solving Problems in Technical Communication collects the latest research and theory in the field and applies it to real-world problems faced by practitioners—problems involving ethics, intercultural communication, new media, and other areas that determine the boundaries of the discipline. The book is structured in four parts, offering an overview of the field, situating it historically and culturally, reviewing various theoretical approaches to technical communication, and examining how the field can be advanced by drawing on diverse perspectives. Timely, informed, and practical, Solving Problems in Technical Communication will be an essential tool for undergraduates and graduate students as they begin the

transition from classroom to career.

Executive Coaching in Defense

Acquisition. Clearly, Moseley has done a very good job of providing a new addition to Defense acquisition studies. Moseley is an executive coach through the Cambridge Group Worldwide, Boston, MA. His research is one taken at Regent University for the purpose of enhancing leadership development among executive acquisition managers to provide a global learning environment to support a mission-ready defense acquisition workforce that develops, delivers, and sustains effective and affordable war-fighting capabilities. The progress for Moseley and his colleagues as executive coaches at DAU is measured according to how well the defense acquisition workforce does its mission. Since the executive coaching initiative is the first of its kind at the university, a level 5 evaluation - the fifth level of evaluating coaching measured by a return on investment (ROI) - would provide a deeper understanding of the sources of business value and especially how coaching creates monetary value in Defense acquisition. The results indicated that the executive coaching program delivered strategic value represented by a conservative ROI of 1,066 percent. Similarly, the coachees and their organizations experienced six business results: increased customer satisfaction,

increased resources, increased work-group productivity, reduced cycle time, increased organizational efficiency, and increased personal productivity. MGMT Oxford University Press The Routledge Companion to Interdisciplinary Studies in Singing, Volume II: Education examines the many methods and motivations for vocal pedagogy, promoting singing not just as an art form arising from the musical instrument found within every individual but also as a means of communication with social, psychological, and didactic functions. Presenting research from myriad fields of study beyond music—including psychology, education, sociology, computer science, linguistics, physiology, and neuroscience—the contributors address singing in three parts: Learning to Sing Naturally Formal Teaching of Singing Using Singing to Teach In 2009, the Social Sciences and Humanities Research Council of Canada funded a seven-year major collaborative research

initiative known as Advancing Interdisciplinary Research in Singing (AIRS). Together, global researchers from a broad range of disciplines addressed three challenging questions: How does singing develop in every human being? How should singing be taught and used to teach? How does singing impact wellbeing? Across three volumes, The Routledge Companion to Interdisciplinary Studies in Singing consolidates the findings of each of these three questions, defining the current state of theory and research in the field. Volume II: Education focuses on the second question and offers an invaluable resource for anyone who identifies as a singer, wishes to become a singer, works with singers, or is interested in the application of singing for the purposes of education.
