Since the year 2000, there has been a statistically high proportion of head teachers leaving the profession. While there have been studies conducted to predict when this exodus would conclude, the actual reasons for why senior people are leaving their positions have not been explored so far. Schools have found replacing head teachers increasingly difficult and the inevitable leadership crisis has been well documented by both scholars and the media. The leadership crisis has been most noticeable within the Catholic Primary School sector, where statistics have

consistently shown an issue with recruiting people to headship positions. This book considers the reasons for the crisis and looks at potential solutions. It identifies what the leadership crisis encompasses from the negativity of the education system (including headship accountability, the work-life balance, and salary), whilst also offsetting this with possible supporting solutions, such as the value of acting headship, succession planning and talent spotting from the beginning of a teacher's career.

This is a 3-book bundle, which addresses various subtopics, including but not limited to these: Book 1: Are you nervous about your job interview? Do you have the feeling that you are not prepared to face an invasive number of questions about your accomplishments and career choices? Well, have no fear, my friend. You are at the right address. This book can guide you along. Topics that will be discussed in this book include how to make a lasting first impression, asking specific questions about your motivation, how to dress, what to bring, how to react on the phone (if applicable), how to show your interviewer that you are listening and interacting, etc. Book 2: This book will lead you in your next job interview. It will help you understand the reasons why interviewers ask specific

---

questions and how to answer them. Being prepared for those questions can increase your chances of getting the job you want. It will also show you which questions are smart to ask your potential future employer, because, as opposed to what some people may suppose, this is an important part of the interview to show how passionate you may be about your future job. Last but not least, most people forget to follow up and simply wait for the interviewer to contact them. This is a big mistake. If you want to stand out among the crowd, it is important to follow up after the interview, and show how driven and motivated you are. Book 3: When it comes to job interviews, it would surprise you how many people don't have a clue what to do. They think if they just act like themselves (nothing wrong with that), all else will just happen. That's not how it works. The people who are most prepared usually stand the highest chance to make a good impression on the interviewer. Aside from

questions like "tell me about yourself" or "how would you describe yourself," they will look for competent employees who know how to sell their skillset with confidence. They want to know about your weaknesses, and if those weaknesses will create any problems in their company. So, how will you do in your next job interview? Well, it's up to you. But the right information, such as the details you can find in this guide, can certainly help.

High School, Freire asks what happens to the adolescent children of working-class families when economic changes such as globalization and technological advancements have altered the face of working-class jobs. Mass consumerism, greater availability of college level education, lack of a cohesive class identity, and racial and religious politics all combine to create a new working-class identity for today's youth. Featuring interviews with the River City High School students, *Class Construction* aims to understand how class is conceptualized among American, working-class youths. *Class Construction* is ideal for courses on sociology, education, gender studies, and American studies, as well as high school educators and administrators.
