Comment un étudiant de Harvard a-t-il créé – à dix-neuf ans – une entreprise qui a transformé Internet et comment a-t-il géré sa phénoménale croissance ? David Kirkpatrick, chroniqueur technologique chevronné du magazine Fortune, a bénéficié de la coopération complète des responsables de Facebook, de leurs collaborateurs et de leurs amis pour reconstituer l'histoire fascinante du site de réseautage social. Il nous montre comment Mark Zuckerberg, en donnant la priorité à la croissance sur les bénéfices, a refusé à maintes reprises de compromettre sa vision à long terme : dominer la communication sur Internet. Intuitions géniales, erreurs, ballet des collaborateurs et conseillers, chassé-croisé épineux avec les capitalistes – la firme de Palo Alto ne cesse de rebondir d'une innovation à l'autre pour devenir une entité qui a changé la vie sociale aux États-Unis et ailleurs. Facebook est devenu une présence incontournable dans la pub et le marketing, avec des implications dans la politique, le monde des affaires, et même dans notre conception de l'identité individuelle. C'est cela, l'effet Facebook. Une lecture captivante à tous les points de vue sur un monde de 750 millions d'habitants, le troisième pays de la planète. Traduit de l'anglais Bernard Sigaud

John Caldwell Calhoun (1782-1850) was a leading United States Southern politician from South Carolina during the first half of the 19th century. He was the first Vice President to resign his office. He was an advocate of slavery, states' rights, limited government, and nullification. In 1817, President James Monroe appointed Calhoun to be Secretary of War, where he served until 1825. It should be noted that during this time period, he was perhaps the most tireless and selfless proponent of the nationalist agenda in American politics. His works include: *Against the Force Bill* (1833), *A Discourse on the Constitution and Government of the United States* (1851) and *Disquisition on Government* (1851).

Milk has played a major contribution to the human diet in many different countries across the world since the dawn of time. The dairy cow was domesticated over 6000 years ago, she was the object of worship in the Middle East 2000 years before Christ, and milk and milk products are mentioned more than 50 times in the Bible. Milk and dairy products have become a major part of the human diet in many countries. It is not surprising therefore, that over many years considerable attention has been paid to improving the quality of milk. We have worked to improve the yield, the compositional quality and the hygienic quality, and have striven

to minimise the level of contaminants which can find access to this, perhaps our most natural, unrefined and highly nutritious foodstuff. The chain of people involved in the milk industry extends from milk production-farmers, veterinarians and farm advisors-through transport to processing-quality controllers, manufacturers-and on to retailers, legislators, nutritionists, dairy educators and consumers. All will be interested in the quality parameters of milk which are regularly measured for commercial reasons, for trade, for legal requirements and for reasons of nutrition.

Surfactants Europa 3rd Edition provides easy access to current product information on surface active agents (surfactants) manufactured and sold in Europe. It contains valuable data on approximately 9,000 trade names from more than 80 suppliers, including chemical description and composition, general property, application and manufacturer information. The directory contains company and trade name indexes with page references, and provides a very useful listing of companies, with full contact details, including European divisions and agents. The products listed in the directory find applications in a wide variety of branches of the chemical manufacturing industry including detergent and cleaning products, agrochemicals, construction, cosmetics, food, oil, paint, paper, pharmaceuticals, plastics and textiles. The directory is edited by Dr Gordon Hollis, an established consultant in the surfactants field and author of four respected surfactants directories. Surfactants Europa 3rd Edition will be an essential reference directory for research and development personnel and laboratory staff in general. It will also be useful for technical departments and purchasing/sales departments, not only in the detergent industry but in many industries where surfactants are used.

While this version features a new Dummies cover and design, the content is the same as the prior release and should not be considered a new or updated product. The top-selling auto repair guide--400,000 copies sold--now extensively reorganized and updated Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a must and now it's even better. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.

During the last nine months of the Civil War, virtually all of the news reports and President Jefferson Davis's correspondence confirmed the imminent demise of the Confederate States, the nation Davis had striven to uphold since 1861. But despite defeat after defeat on the battlefield, a recalcitrant Congress, naysayers in the press, disastrous financial conditions, failures in foreign policy and peace efforts, and plummeting national morale, Davis remained in office and tried to maintain the government -- even after the fall of Richmond -- until his capture by Union forces on May 10, 1865. The eleventh volume of *The Papers of Jefferson Davis* follows the last tumultuous months of the Confederacy and illuminates Davis's policies, feelings, ideas, and relationships, as well as the viewpoints of hundreds of southerners -- critics and supporters -- who asked for favors, pointed out abuses, and offered advice on myriad topics. Printed here for the first time are many speeches and a number of new letters and telegrams. In the course of the volume, Robert E. Lee officially becomes general in chief, Joseph E. Johnston is given a final command, legislation is enacted to place slaves in the army as soldiers, and peace negotiations are opened at the highest levels. The closing pages chronicle Davis's dramatic flight from Richmond, including emotional correspondence with his wife as the two endeavor to find each other en route and make plans for the future in the wreckage of their lives. The holdings of seventy different manuscript repositories and private collections in addition to numerous published sources contribute to Volume 11, the fifth in the Civil War period.

Historically, grief and spirituality have been jealously guarded as uniquely human experiences. Although non-human animal grief has been acknowledged in recent times, its potency has not been recognised as equal to human grief. Anthropocentric philosophical questions still underpin both academic and popular discussions. In *Enter the Animal*, Teya Brooks Pribac examines what we do and don't know about grief and spirituality. She explores the growing body of knowledge about attachment and loss and how they shape the lives of both human and non-human animals. A valuable addition to the vibrant interdisciplinary conversation about animal subjectivity, *Enter the Animal* identifies conceptual and methodological approaches that have contributed to the prejudice against nonhuman animals. It offers a compelling theoretical base for the consideration of grief and spirituality across species and highlights important ethical implications for how humans treat other animals.

Chosen by BusinessWeek as One of the Top Ten Business Books of the Year With apologies to Hegel, Marx, and Lenin, the basic unit of modern society is neither the state, nor the commune, nor the party; it is the company. From this bold premise, John Micklethwait and Adrian Wooldridge chart the rise of one of history's great catalysts for good and evil. In a "fast-paced and well-written" work (Forbes), the authors reveal how innovations such as limitations on liability have permitted companies to rival religions and even states in importance, governing the flow of wealth and controlling human affairs -- all while being largely exempt from the rules that govern our lives. The Company is that rare, remarkable book that fills a major gap we scarcely knew existed. With it, we are better able to make sense of the past four centuries, as well as the events of today.

The Papers of Jefferson Davis

The paper investigates the divergence between inflation and monetary expansion in Zimbabwe since late 2003. The substantial decline in velocity and increasing levels of real money balances during 2004 are at odds with a record of inflation closely tracking the growth rates of monetary aggregates in the past. Possible explanations for the divergence include an unstable demand for money, a sudden shift in the underlying demand for real balances

---

due to a sharp change in an explanatory variable, and a structural break or aberration in a normally stable money demand relation reflecting some unexplained factor such as repressed inflation (given administered prices) or measurement errors in the consumer price index. The results of the study point to the last possibility as the most likely explanation.
