G10a Engine Suzuki

This engine uses the same G
series block found in many
other suzuki models and
therefore is quite a popular

conversion into the Suzuki
Sierra 4wd, which runs either
a G13A(85-88) or
G13BA(88.5-98). This allows
the physical fitting of the
engine into the engine bay
quite simple as engine and
gearbox mounts are identicle
and both engines are
mounted north-south.
