This multidisciplinary volume
considers the role of both public
health and mental health policies
and practices in the prevention
of mass atrocity, including war
crimes, crimes against humanity,
and genocide. The authors
address atrocity prevention
through the framework of
primary (pre-conflict),
secondary (mid-conflict), and
tertiary (post-conflict) settings.
They examine the ways in which
public health and mental health
scholars and practitioners
currently orient their research

and interventions and the ways in
which we can adapt frameworks,
methods, tools, and practice
toward a more sophisticated and
truly interdisciplinary
understanding and application of
atrocity prevention. The book
brings together diverse fields of
study by global north and global
south authors in diverse
contexts. It culminates in a
narrative that demonstrates the
state of the current fields on
intersecting themes within public
health, mental health, and mass
atrocity prevention and the
future potential directions in
which these intersections could
go. Such discussions will serve to
influence both policy makers
and practitioners in these fields
toward developing, adapting,
and testing frames and tools for
atrocity prevention.

Multidisciplinary perspectives
are represented among editors
and authors, including law,
political science, international
studies, public health, mental
health, philosophy, clinical
psychology, social psychology,
history, and peace studies.

Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. U.S. automakers are suddenly awash in profits, and South Koreans and Europeans have gained market shares, while Honda, Nissan, and Toyota have curtailed production following the 2011 tsunami in Japan. Shortages of Japanese new cars and supplier disruptions will likely push used car prices through the roof well into 2012, so what should a savvy buyer do? The all-new Lemon-Aid Used Cars and Trucks 2012-2013 has the answers, including: More vehicles rated, with some redesigned models that don't perform as well as previous iterations downrated. More roof crash-worthiness ratings along with an expanded cross-border shopping guide. A revised summary of safety- and performance-related defects that are likely to affect rated models. More helpful websites listed in the appendix as well as an updated list of the best and worst "beaters" on the market. More "secret" warranties taken from automaker internal service bulletins and memos than ever.
