Set between Normandy and
Arizona, In the Gold of Time is a

seductive tale of silences and dark, half-revealed secrets, and a haunting elegy for innocence lost in a lost world. A young father holidays by the sea near Dieppe with his reproachfully perfect wife and their twin daughters. Returning from the local shop, he meets an eccentric old lady, Alice Berthier, who lives with her mute sister, Clemence. Their mysterious house is full of old photographs and strange objects--sacred ceremonial masks once belonging to the Hopi, a tribe of Native Americans from Arizona. Haunted by memories of a tragic past, Alice takes comfort in her new companion, and he, in turn, is drawn into her mysterious world. As his family recedes into the background, her stirring tales of the Hopi and the Arizona desert become the only salve to his despondent soul

`There is much that is fascinating here. Long-established experiments and conclusions are rubbished and reinterpreted, long-established assumptions and beliefs about emotions are soundly trounced, and generally a good going-over is delivered to the whole field... it is such a blockbuster that one can only reel backwards and tell anyone studying the subject that they would be crazy not to get it - Self & Society
This fascinating book overviews the psychology of the emotions in its broadest sense, tracing historical, social, cultural and biological themes and analyses. The contributors - some of the leading figures in the field - produce a new

theoretical synthesis by drawing together these strands. From the standpoint of the function of the emotions in everyday life, the authors focus on: the discursive role played by the emotions in expressing judgements about, attitudes to and contrition for actions done by the self and others, and how certain emotions - such as guilt, shame, embarrassment, chagrin and regret - seem to play a role in social control; the variation and diversity in emotion, which provides scope for exploring how patterns of emotion contrast in different societies, across gender lines, at different historical times, and between children and adults; and the way in which the body is shaped and its functions influenced by culturally maintained patterns of emotion displays.

This book presents the papers from the Internal Combustion Engines: Performance, fuel economy and emissions held in London, UK. This popular international conference from the Institution of Mechanical Engineers provides a forum for IC

engine experts looking closely at developments for personal transport applications, though many of the drivers of change apply to light and heavy duty, on and off highway, transport and other sectors. These are exciting times to be working in the IC engine field. With the move towards downsizing, advances in FIE and alternative fuels, new engine architectures and the introduction of Euro 6 in 2014, there are plenty of challenges. The aim remains to reduce both CO2 emissions and the dependence on oil-derivate fossil fuels whilst meeting the future, more stringent constraints on gaseous and particulate material emissions as set by EU, North American and Japanese regulations. How will technology developments enhance performance and shape the next generation of designs? The book introduces compression and internal combustion engines' applications, followed by chapters on the challenges faced by alternative fuels and fuel delivery. The remaining chapters explore current improvements in combustion, pollution prevention strategies and data comparisons. presents the latest requirements and challenges for personal transport applications gives an insight into the technical advances and research going on in the IC Engines field provides the latest developments in compression and spark ignition engines for light and heavy-duty applications, automotive and other markets

How difficult it can be to forgive others or to accept forgiveness or to accept that someone who had offended the community has been reconciled and accepted back into it. For two millennia Christians have pondered the scope of the forgiveness Jesus taught and lived. They have celebrated practices and rites that have enabled the faithful to forgive, to be forgiven, and to accept that God brings reconciliation even when we find it almost impossible to forgive. This book traces that history to the present, offering a sense not only of how the rites of reconciliation matter to Catholics but how our struggles with forgiveness

are a real contribution to reconciliation in our world.

Datsun's initial offerings were fairly conventional family cars, but with the introduction of the 240Z in 1969 the marque's image received a massive boost. It was a runaway success, outselling every European sports car model in the lucrative North American market. The 280Z arrived in 1975 followed by the 280ZX in 1978 and

sales of the 280ZX had reached over 446,000 units by the time production came to an end in 1983. 44 international articles include road, track and comparison tests, a service guide plus full technical and performance data.

Create attractive web-based data visualizations using the amazing JavaScript library D3.js
About This Book Learn to use the facilities provided by D3.js to create data-driven visualizations Explore the concepts of D3.js through examples that enable you to quickly create visualizations including charts, network diagrams, and maps Get practical examples of visualizations using real-world data sets that show you how to use D3.js to visualize and interact with information to glean its underlying meaning Who This Book Is For Whether you are new to data and data visualization, a seasoned data scientist, or a computer graphics specialist, this book will provide you with the skills you need to create web-based and interactive data visualizations. This book assumes some knowledge of coding and in particular, experience coding in JavaScript. What You Will Learn Install and use D3.js to create HTML elements within the document Use development tools such as JSBIN and Chrome Developer Tools to create

D3.js applications Retrieve JSON data and use D3.js selections and data binding to create visual elements from data Create and style graphical elements such as circles, ellipses, rectangles, lines, paths, and text using SVG Turn your data into bar and scatter charts, and add margins, axes, labels, and legends Use D3.js generators to perform the magic of creating complex visualizations from data Add interactivity to your visualizations, including tool-tips, sorting, hover-to-highlight, and grouping and dragging of visuals In Detail This book will take you through all the concepts of D3.js starting with the most basic ones and progressively building on them in each chapter to expand your knowledge of D3.js. Starting with obtaining D3.js and creating simple data bindings to non-graphical HTML elements, you will then master the creation of graphical elements from data. You'll discover how to combine those elements into simple visualizations such as bar, line, and scatter charts, as well as more elaborate visualizations such as network diagrams, Sankey diagrams, maps, and choreopleths. Using practical examples provided, you will quickly get to grips with the features of D3.js and use this learning to create your own spectacular data visualizations with D3.js. Style and approach This book uses a practical, step-by-step

approach that builds iteratively, starting with the basic concepts right through to mastery of the technology. Each concept is demonstrated using code examples that are interactively available online (and can also be run locally), and each chapter builds upon the concepts covered in the previous chapter, with succinct explanations of what the code does and how it fits into the bigger picture.

No matter how much experience you have with JavaScript, odds are you don't fully understand the language. As part of the "You Don't Know JS" series, this compact guide explores JavaScript types in greater depth than previous treatments by looking at type coercion problems, demonstrating why types work, and showing you how to take advantage of these features. Like other books in this series, *You Don't Know JS: Types & Grammar* dives into trickier parts of the language that many JavaScript programmers simply avoid or assume don't exist (like types). Armed with this knowledge, you can achieve true JavaScript mastery. With this book you will: Get acquainted with JavaScript's seven types: null, undefined, boolean, number, string, object, and symbol Understand why JavaScript's unique array, string, and number characteristics may delight

or confound you Learn how natives provide object wrappers around primitive values Dive into the coercion controversy—and learn why this feature is useful in many cases Explore various nuances in JavaScript syntax, involving statements, expressions, and other features *Mitsubishi Pajero 2000 to 2010* Galgotia Publications

A state governor is the leader of all the people of a state, just like a leader of an organization speaks for its people. Being a leader in a school or community organization is a great experience, but it takes a lot of work. The road to becoming a politician can seem complicated, especially when you think about being elected. With content that explores the role of the state governor, who is eligible, and how one is elected, this book uniquely relates state governors' experiences to readers working for student leadership positions.
