JFK to 911 is already a global phenomenon, having began as a Youtube video which achieved over a billion hits by becoming the first documentary in human history to untangle all the establishment lies and reveal the entire truth about the Kennedy Assassination and 911. These disclosures so frightened the powers-that-be that President Trump and the Queen of England took the joint decision to ban it altogether, so that if you read this book, you will be learning the

most cardinal secrets which your government would much rather you did not know. Nearly all intelligent people these days are wary of what we are being told by the mainstream media, but fewer are aware that the very notion of 'fake news' began with the words on these pages, and that all government policy in recent times has been an ongoing effort to hold back the increasing enlightenment these words have inspired. Legions of people have taken the trouble to go online so that they could tell the world about how learning that absolutely everything is a rich man's trick—the justice system, the education system, the economic system, and most importantly, the media. Francis Richard Conolly is extremely hopeful that the people who have made a movie which he originally gave them for free such a central part of their existence will now buy this book in order to build the revenues which he needs to make the sequel which everyone wants to see.

*Private Security* John Wiley and Sons  
Document from the year 2016 in the subject Sociology - Social System, Social Structure, Class, Social Stratification, University of Poznan (Institute of Sociology), language: English, abstract: The book tests the double hypothesis of the death of the middle class. Using U.S. and other developed and developing countries' materials, it seeks to answer whether the popular thesis on its demise is true, and second, it shows it is true in a conceptual sense, viz., the term in question is a misnomer, referring to a stratum rather than a class. In the course of those investigations other key questions are examined, such as an

all-important issue of socio-economic inequality: both in national and world context. The study is underpinned by an original conceptual framework encompassing social class and estate theories and ownership theory. This makes it possible to criticise many other approaches to the problems analysed. For instance, a critique of a well-known book by the French economist Th. Picketty has been undertaken, showing its numerous flaws. In addition, the analysis of the middle class concept demonstrates its defects manifest in its various definitions and usages.

The Global Industrial Complex: Systems of Domination is a groundbreaking collection of essays by a diverse set of leading scholars who examine the entangled and evolving global array of corporate-state structures of hegemonic power--what the editors refer to as "the power complex"--that was

first analyzed by C. Wright Mills in his 1956 classic work, The Power Elite. In this new volume edited by Steven Best, Richard Kahn, Anthony J. Nocella II, and Peter McLaren, the power complex is conceived as co-constituted, interdependent and imbricated systems of domination. Spreading insidiously on a global level, the transnational institutional relationships of the power complex combine the logics of capitalist exploitation and profits and industrialist norms of efficiency, control, and mass production, While some have begun to analyze these institutional complexes as separate entities, this book is unique in analyzing

---

them as overlapping, mutually-enforcing systems that operate globally and which will undoubtedly frame the macro-narrative of the 21st century (and perhaps beyond). The global industrial complex--a grand power complex of complexes--thus poses one of the most formidable challenges to the sustainability of planetary democracy, freedom and peace today. But there can be no serious talk of opposition to it until it is more popularly named and understood. The Global Industrial Complex aims to be a foundational contribution to this emerging educational and political project. Moon-face and Other Stories Three Rivers Press (CA) 401(k) Answer Book,

Minister and celebrated author Lillian Daniel gives a new spin on church with stories of what a life of faith can really be: weird, wondrous, and well worth trying. From a rock-and-roller sexton to a BB gun-toting grandma, a church service attended by animals to a group of unlikely theologians at Sing Sing, Daniel shows us a portrait of church that is flawed, fallible -- and deeply faithful. With poignant reflections and sly wit, Daniel invites all of us to step out of ourselves, dare to become a community, and encounter a God greater than we could ever invent. The Monfort Plan is a five-year, forward looking plan to eradicate extreme poverty from the developing world, and details how microfinance has made a difference to developing countries. This book proposes a new institution based in the developing world with the potential to provide a basic, free, and universal

service in the areas of water, sanitation, healthcare, and education to the extreme poor worldwide. The provision will be subject to a certain degree of conditionality in areas ranging from corruption to legal environment. The new institution will be established in a new international territory based within a specific country in Subsaharan Africa and will emerge in 2015. In The Monfort Plan author Jaime Pozuelo-Monfort engineers and designs a solution to lessen the burden of poverty. In order to do so he relies on the social sciences to bring about

innovation and forward looking economic policies and financial instruments in the context of a paradigm shift. This book presents a multidisciplinary approach to policymaking that combines a range of fields in the social sciences, looking at the history behind the Marshall Plan, the formation of the European Union, and the Bretton Woods Institutions, in order to determine how a Marshall Plan for Africa-and the creation of New Institutions in the developing world-could work. We live a moment of crisis in which creative policymaking might prove useful when proposing outcomes for a revitalized framework for capitalism to thrive and better serve the world. Walks you through the technicalities of the new architecture of capitalism in a straightforward manner Provides a holistic view of how microfinance combined with the right economic policies and financial instruments could help change the world for the poor Contains sweeping and detailed recommendations on how to build a new capitalist paradigm that helps elevate the poor and improve the human condition Incorporating commentary from some of the top minds in
