Since the terrorist attacks of September 11th, there has been an overwhelming demand for information about Islam, and recent

events - the war in Iraq, terrorist attacks both failed and successful, debates throughout Europe over Islamic dress, and many others - have raised new questions in the minds of policymakers and the general public. This newly updated edition of *What Everyone Needs to Know about Islam* is the best single source for clearly presented, objective information about these new developments, and for answers to questions about the origin and

traditions of Islam. Editor of *The Oxford Encyclopedia of Modern Islam* and *The Oxford History of Islam*, and author of *The Future of Islam* and many other acclaimed works, John L. Esposito is one of America's leading authorities on Islam. This brief and readable book remains the first place to look for up-to-date information on the faith, customs, and political beliefs of the more than one billion people who call themselves Muslims. *Directory of Foreign Firms*

Neoliberalism in Context adopts a processual, relational and contextual framework, bringing together contributions from diverse national and disciplinary contexts, and bridging theoretical and

methodological approaches to critiquing neoliberalism. The book presents arguments on the extent to which we are still living in neoliberal times, and illustrates examples of variation in the practice of neoliberalization and within neoliberal thought. The contributions also examine the mediation and significance of existing neoliberalism on subjectivity, and address the consequences of the neoliberalization of education for critical thinking generally, and for the critique of neoliberalism in particular.

This collection will be of interest to students and scholars across sociology, international relations, urban studies, and media and cultural studies. To access an introduction by Simon Dawes, and an interview with Jamie Peck, download the front and back matter for free from SpringerLink.

Contributing to the debate on work performance evaluation in a time of technological transformation, this book explores the impact of digitisation on production and

organisation models, as well as on the rights and interests of the stakeholders involved. As organisations down-size, merge with other companies and become decentralised, the boundaries in employer-employee-customer relationships are blurred and new models for the organisation and assessment of work performance have emerged. With these new models, innovative regulatory approaches

are sorely needed. Taking an interdisciplinary approach and drawing on theoretical concepts from organisation studies, human resource management, sociology and labour economics, this all-encompassing collection is not only essential reading for academics and students, but also for policy-makers and employers who are looking for innovative and practical solutions

to the challenges of modern employment relations.

Tim Dunn examines these policies and practices in detail, and considers them in light

of the strategy and tactics of the Pentagon doctrine of "low-intensity conflict." Developed during the 1980s for use in Central America and elsewhere, this doctrine is characterized by broad-ranging provisions for establishing social control over specific civilian populations, and its implementation has often been accompanied by widespread human-rights violations.

The inside account of a financial meltdown that reshaped Wall Street In 1983, Lew Glucksman, then co-CEO of the heralded investment bank Lehman Brothers, demanded the resignation of chairman Pete Peterson, with whom he had long argued over how to manage the company. Shockingly, Peterson, who had taken charge a decade earlier and led

Lehman from near collapse to record profits, agreed to step down. In this meticulously researched volume, Ken Auletta details the turmoil, infighting, and power struggles that brought about Peterson ' s departure and the eventual sale of one of Wall Street ' s oldest and most prestigious firms. Set against the backdrop of the 1980s stock exchange, where

hotshot young traders made and lost millions in a single afternoon, the story of Lehman ' s fall is a suspenseful battle of wills between bankers, traders, and executives motivated by greed, envy, and ego. Auletta, who conducted hundreds of hours of interviews and was granted access to private company records, has crafted a thorough, enduring, and engaging account of pivotal events that

continued to influence this storied financial institution until its ultimate demise in 2008. PublicAffairs Great is no longer good enough. The story of Steve Schwarzman, Blackstone, and a financial revolution, King of Capital is the

greatest untold success story on Wall Street. In King of Capital, David Carey and John Morris show how Blackstone (and other private equity firms) transformed themselves from gamblers, hostile-takeover artists, and ‘barbarians at the gate’ into disciplined, risk-conscious investors while the financial establishment—banks and investment bankers such as Citigroup, Bear Stearns, Lehman, UBS, Goldman Sachs, Merrill

Lynch, Morgan Stanley—were recklessly assuming risks, leveraging up to astronomical levels and driving the economy to the brink of disaster. Now, not only have Blackstone and a small coterie of competitors wrested control of corporations around the globe, but they have emerged as a major force on Wall Street, challenging the likes of Goldman Sachs and Morgan Stanley for dominance. Insightful and

hard-hitting, filled with never-before-revealed details about the workings of a heretofore secretive company that was the personal fiefdom of Schwarzman and Peter Peterson, King of Capital shows how Blackstone and private equity will drive the economy and provide a model for how financing will work in the years to come.

Across Africa, growing economic inequality, instability and urbanization have led to the rapid spread of private security providers. While these PSPs have already had a significant impact on African societies, their impact has so far received

little in the way of comprehensive analysis. Drawing on a wide range of disciplinary approaches, and encompassing anthropology, sociology and political science, *Private Security in Africa* offers unique insight into the lives and experiences of security providers and those affected by them, as well as into the fragile state context which has allowed them to thrive. Featuring original empirical research and case studies ranging from private policing in South Africa to the recruitment of Sierra Leoneans for private security work in Iraq, the

book considers the full implications of PSPs for security and the state, not only for Africa but for the world as a whole.
