Technology Assessment Report for Industrial Boiler Applications
Butterworth-Heinemann

The security services industry has some of the highest level of turnover in any business, but it can be contained. By doing so, you'll be able to pay higher wages, recruit top-quality personnel, and further boost the stability of your workforce. Service to clients will improve, and supervising will get easier. In this guide to reducing turnover, the author draws on lessons from the security industry to help senior executives, frontline supervisors and managers, and others boost their leadership abilities to improve employee retention. While the book focuses on the

security industry for demonstration purposes, members of any services sector company can apply its lessons to make significant dents in money-losing turnover. The major theme running throughout the book is responsibility fueled by choice: Nobody is a victim of anybody or anything, and if we want to be the best leaders we can be, then we need to make that choice--and follow it up with hard work. Stop the revenue drain. Help first-line leaders--who play the pivotal role in reducing turnover--systematically improve their leadership skills by following the New Leadership model. Develop a retention culture in your company. All this and more in Reducing Turnover in the Services Sector.

This is the inaugural issue of the International Journal of Therapeutic Jurisprudence, a journal produced by Arizona Summit Law Review. It provides a collection of student, academic, and practitioner articles on the topic of Therapeutic Jurisprudence ("TJ").

Therapeutic Jurisprudence is a way of looking at "law as therapy" or "therapy through law." It grew out of mental health law and the scholarly writings of Professor David Wexler in the late 1980's. Its applications have expanded into all areas of the law since then. This journal attempts to capture just a few of the many applications of TJ. This Journal is somewhat of a hybrid between a typical law review journal and a journal on social sciences. Its mission is to publish practical material that engages and influences both the legal and scientific communities. Specifically this issue presents fifteen articles ranging from practitioners' use of TJ principles, TJ applications in criminal sentencing and restoration, to mainstream applications of TJ and procedural justice.

This book discusses Public-Private Partnerships (PPPs) and their potential to protect and maintain critical infrastructure in a variety of global governmental settings. Critical infrastructure is defined as essential services that underpin and support the backbone of a nation's economy, security, and health. These services include the power used by homes and businesses, drinking water, transportation, stores and shops, and communications. As governmental budgets dwindle, the maintenance of critical infrastructure and the

delivery of its related services are often strained. PPPs have the potential to fill the void between government accounting and capital budgeting. This volume provides a survey of PPPs in critical infrastructure, combining theory and case studies to provide a comprehensive view of possible applications. Written by a diverse group of international experts, the chapters detail PPPs across industries such as transportation, social infrastructure, healthcare, emergency services, and water across municipalities from the US to New Zealand to Hong Kong. Chapters discuss objectives and legal requirements associated with PPPs, the potential advantages and limitations of PPPs, and provide guidance as to how to structure a successful PPP for infrastructure investment. This book is of interest to researchers studying public administration, public finance, and infrastructure as well as practitioners and decision makers interested in instituting PPPs in their communities.

This book is divided into three thematic areas. The first covers a revision of the taxonomy of algae, based on the algae portal, as well as the general aspects of biology and the methodologies used in this branch of marine biology. The second subject area focuses on the use of algae in environmental assessment, with an intensive implementation in Western economies and some emerging economies. The third topic is the potential use of algae in various industries including food, pharmaceuticals, cosmetics, agricultural fertilizers, and the emerging biofuels industries.

Across Africa, growing economic inequality, instability and urbanization have led to the rapid spread of private security providers. While these PSPs have already had a significant impact on African societies, their impact has so far received little in the way of comprehensive analysis. Drawing on a wide range of disciplinary approaches, and encompassing anthropology, sociology and political science, Private Security in Africa offers unique insight into the lives and experiences of security providers and those affected by them, as well as into the fragile state context which has allowed them to thrive. Featuring original empirical research and case studies ranging from private policing in South Africa to the recruitment of Sierra Leoneans for private security work in Iraq, the book considers the full implications of PSPs for security and the state, not only for Africa but for the world as a whole.

As seen on The Today Show! The Friends We Keep is the heartwarming and unforgettable New York Times bestselling novel from Jane Green, author of The Sunshine Sisters and The Beach House.

Evvie, Maggie, and Topher have known one another since college. Their friendship was something they swore would last forever. Now years have passed, the friends have drifted apart, and they never found the lives they wanted--the lives they dreamed of when they were young and everything seemed possible. Evvie starved herself to become a supermodel but derailed her career by sleeping with a married man. Maggie married Ben, the boy she fell in love with in college, never imagining the heartbreak his drinking would cause. Topher became a successful actor, but the shame of a childhood secret shut him off from real intimacy. By their thirtieth reunion, these old friends have lost touch with one another and with the people they dreamed of becoming. Together again, they have a second chance at happiness...until a dark secret is revealed that changes everything. The Friends We Keep is about how despite disappointments we've had or mistakes we've made, it's never too late to find a place to call home.

Although surveillance hit the headlines with revelations by Edward Snowden that the National

Security Agency had been tracking phone calls worldwide, surveillance of citizens by their governments actually has been conducted for centuries. Only now, with the advent of modern technologies, it has exponentially evolved so that today you can barely step out your door without being watched or recorded in some way. In addition to the political and security surveillance unveiled by the Snowden revelations, think about corporate surveillance: each swipe of your ID card to enter your office is recorded, not to mention your Internet activity. Or economic surveillance: what you buy online or with a credit card is recorded and your trip to the supermarket is videotaped. Drive through a tollbooth, and your license plate is recorded. Simply walk down a street and your image could be recorded again and again and again. Where does this begin and end? In all levels of social structure, from the personal to the political to the economic to the judicial, The SAGE Encyclopedia of Surveillance, Security, and Privacy uncovers and explains how surveillance has come to be an integral part of how our contemporary society operates worldwide and how it impacts our security and privacy. Australia invoked the ANZUS Alliance following the Al Qaeda attacks in the United States on 11 September 2001. But unlike the calls to arms at the onset of the world wars, Australia decided to make only carefully calibrated force contributions in support of the US-led coalition campaigns in Afghanistan and Iraq. Why is this so? *Niche Wars* examines Australia's experience on military operations in Afghanistan and Iraq from 2001 to 2014. These operations saw over 40 Australian soldiers killed and hundreds wounded. But the toll since has been greater. For Afghanistan and Iraq the costs are hard to measure. Why were these forces deployed? What role did Australia play in shaping the strategy and determining the outcome? How effective were they? Why is so little known about Australia's involvement in these campaigns? What lessons can be learned from this experience? *Niche Wars* commences with a scene-setting overview of Australia's military involvement in the Middle East over more than a century. It then draws on unique insights from many angles, across a spectrum of men and women, ranging from key Australian decision makers, practitioners and observers. The book includes a wide range of perspectives in chapters written by federal government ministers, departmental secretaries, service commanders, task force commanders, sailors, soldiers, airmen and women, international aid workers, diplomats,

police, journalists, coalition observers and academics. *Niche Wars* makes for compelling reading but also stands as a reference work on how and why Australia became entangled in these conflicts that had devastating consequences. If lessons can be learned from history about how Australia uses its military forces, this book is where to find them.

A patient escapes from an asylum to spend his life as the perfect mannequin in a department store display; when living alone is outlawed, a woman who resides quietly with her cat is assigned by bureaucrats to a role in an artificially created "family"; a luckless man transforms himself into a chair so people can, literally, sit on him. These are just a few of the inhabitants of Hon Lai-chu's stories, where surreal characters struggle to carve out space for freedom and individuality in an absurd world. The Chinese version of *The Kite Family* won the New Writer's Novella first prize from Taiwan's Uritas Literary Association, was named one of 2008's Books of the Year by Taiwan's China Times, was selected as one of the Top 10 Chinese Novels Worldwide, and was awarded a Translation Grant from the US National Endowment for the Arts. "The Kite

Family showcases the work of Hon Lai-chu, a wildly creative Hong Kong writer. The stories, elegantly translated by Andrea Lingenfelter, range from the torn-from-the-headlines dystopian anxieties of 'Notes on an Epidemic' to the more surrealistic 'Forrest Woods, Chair,' which takes themes from Kafka's Metamorphosis in an engagingly novel direction. The book benefits greatly from an introduction by Lingenfelter, which both explains her approach to rendering Hon's prose into English and shows how the author's stories fit into Hong Kong's fascinating and globally too-little-known literary landscape." —Jeffrey Wasserstrom, author of *China in the 21st Century: What Everyone Needs to Know* "Evocatively written and expertly translated, these Hong Kong stories will draw you into Hon Lai-chu's surreal and yet recognizable world." —Howard Goldblatt, translator of Nobel laureate Mo Yan
