This report on the government fund to support private sector jobs and growth in places that rely on the public sector, the Regional Growth Fund,

finds that the initial £1.4 billion investment could result in some 41,000 more full-time-equivalent private sector jobs in the economy than without the Fund. However, there was scope to have generated more jobs relative to the amount of grant awarded. The Fund has not optimised value for money because a significant proportion of the funds were allocated to projects that offer relatively few jobs for the money invested. The report concludes that applying tighter controls over the value for money offered by individual bids and then allocating funding across more bidding rounds could have created thousands more jobs from the same resources. Rigorous evaluation will be required to quantify precisely the Fund's overall employment impact. More than two thirds (28,000) of the 41,000 additional jobs are expected to be delivered indirectly, for example through knock-on effects in companies' supply chains or the wider economy.

The average project will last at least seven years.

However, it is not clear how much of the Fund's boost to the private sector will be sustained in the longer term. It has also taken longer than expected to turn conditional offers of grants for projects into final offers. Therefore, despite the government's intention to get projects up and running quickly, only around a third have so far received final offers of funding

This book considers the European Union as a project with a major antidiscrimination goal, which is important to remember at a time of increasing resentment against particularly exposed groups, especially migrants, refugees,

members of ethnic or religious minorities and LGBTI persons. While equality and non-discrimination have long been core principles of the international community as a whole, as is made obvious by the UN Charter and the Universal Declaration of Human Rights, they have shaped European integration in a particular way. The concepts of diversity, pluralism and equality have always been inherent in that process, the EU being virtually founded on the values of equality and non-discrimination. The Charter of Fundamental Rights of the EU contains the most modern and extensive catalogue of prohibited grounds of discrimination, supplementing the catalogue enshrined in the European Convention on Human Rights. EU law has given new impulses to antidiscrimination law both within Europe and beyond. The contributions to this book focus on how effective and credible the EU has been in combatting

discrimination inside and outside Europe. The authors present different (mostly legal) aspects of that topic and examine them from various intra- and extra-European angles.

FTW SELF DEFENSE FTW Self Defense is a revolutionary text which addresses, in great detail, many important yet controversial topics which most instructors do not discuss with their students. Th is is the reality of self defense, and these topics are not entered into lightly. Intended for mature and open minded students only. This is the long awaited

companion volume to the underground bestseller *Hardcore Self Defense*. *Contracting Out to Private Military and Security Companies* Springer Nature Recent events in Mali, Libya, Syria, Afghanistan, Iraq, and elsewhere demonstrate that building professional indigenous forces is imperative to regional stability, yet few success stories exist. Liberia is a qualified "success," and this study explores how it was achieved by the program's chief architect. Liberia suffered a 14-year civil war replete with human rights atrocities that killed 250,000 people and displaced a third of its population. Following President Charles Taylor's exile in 2003, the U.S. contracted DynCorp International to demobilize and rebuild the Armed Forces of Liberia and its Ministry of Defense; the first time in 150 years that one sovereign nation hired a private company to raise another sovereign nation's military. This monograph explores the theory and practice behind the successful disarmament, demobilization, and reintegration (DDR) of the legacy military and security sector reform (SSR) that built the new one.

security providers. While these PSPs have already had a significant impact on African societies, their impact has so far received little in the way of comprehensive analysis. Drawing on a wide range of disciplinary approaches, and encompassing anthropology, sociology and political science, *Private Security in Africa* offers unique insight into the lives and experiences of security providers and those affected by them, as well as into the fragile state context which has allowed them to thrive. Featuring original empirical research and case studies ranging from private policing in South Africa to the recruitment of Sierra Leoneans for private security work in Iraq, the book considers the full implications of PSPs for security and the state, not only for Africa but for the world as a whole.

Basic Guide to the National Labor Relations Act The Stationery Office

This is the first comparative analysis of the political transitions in South Africa and Palestine since the 1990s. Clarno's study is grounded in impressive ethnographic fieldwork, taking him from South African townships to Palestinian refugee camps, where he talked to a wide array of

informants, from local residents to policymakers, political activists, business representatives, and local and international security personnel. The resulting inquiry accounts for the simultaneous development of extreme inequality, racialized poverty, and advanced strategies for securing the powerful and policing the poor in South Africa and Palestine/Israel over the last 20 years. Clarno places these transitions in a global context while arguing that a new form of neoliberal apartheid has emerged in both countries. The width and depth of Clarno's research, combined with wide-ranging first-hand accounts of realities otherwise difficult for researchers to access, make *Neoliberal Apartheid* a path-breaking contribution to the study of social change, political transitions, and security dynamics in highly unequal societies. Take one example of Clarno's major themes, to wit, the issue of security. Both places have generated advanced strategies for securing the powerful and policing the racialized poor. In South Africa, racialized anxieties about black crime shape the growth of private security forces that police poor black South Africans in wealthy neighborhoods.

Meanwhile, a discourse of Muslim terrorism informs the coordinated network of security forces involving Israel, the United States, Jordan, and the Palestinian Authority that polices Palestinians in the West Bank. Overall, Clarno's pathbreaking book shows how the shifting relationship between racism, capitalism, colonialism, and empire has generated inequality and insecurity, marginalization and securitization in South Africa, Palestine/Israel, and other parts of the world."

Vulture capitalism has seen the corporation become more powerful than the state, and yet its work is often done by stealth, supported by political and media elites. The result is privatised wars and outsourced detention centres. Mining companies pillaging precious land in developing countries and struggling nations are invaded by NGOs and the corporate dollar. Best-selling journalist Antony Loewenstein travels to Afghanistan, Pakistan, Haiti, Papua New Guinea and across Australia to witness the reality of this largely hidden world of privatised detention centres, the cost of cheap clothing manufacturing and militarised private security. Who is involved

and why? Can it be stopped? What are the alternatives in a globalised world? Profits of Doom challenges the fundamentals of our unsustainable way of life and the money-making imperatives driving it. Endorsements for Profits of Doom: 'In Australia, so often bereft of voices of dissent and courage, Antony Loewenstein's tenacious work stands out. Profits of Doom is a journey into a world of mutated economics and corrupt politics that we ignore at our peril.' - John Pilger, independent investigative journalist, author and documentary film-maker 'A great exercise in joining the dots, on essential terrain that too often is ignored. At a time when rapacious private interests campaign to destroy government - so they can cash in on its absence - Loewenstein reports from the frontline in an insidious war.' - Paul McGeough, author of Kill Khalid and chief foreign correspondent for The Sydney Morning Herald 'The competition for the most depraved example of the predatory state capitalism of the Reagan-Thatcher neoliberal era is fierce. In this chilling study, based on careful and courageous reporting, and illuminated with perceptive analysis, Antony Loewenstein presents many competitors for the prize, while also helping us understand all too well the saying that man is a wolf to man.' - Noam Chomsky, Institute Professor at MIT

and Professor of Linguistics and Philosophy, political activist and author 'Profits of Doom nails the mad idea that the drive for profits will create global wellbeing. Antony Loewenstein delivers a spine-chilling account of the post 9/11 world taken over by vulture capitalism and its political cronies. And this is what we are voting for.' - Bob Brown, former leader of the Australian Greens and director of Sea Shepherd 'Antony Loewenstein's Profits of Doom is a powerful indictment of the corporations and governments across the globe whose unquenchable thirst for resources and power threaten the stability - perhaps even the very existence - of the planet. Loewenstein is no armchair academic or cubicle journalist. The stories in the book are the product of years embedded, in military and economic warzones, with the disempowered of the world, the people from Pakistan to Papua New Guinea and beyond who have the audacity and bravery to fight back against all odds. Loewenstein's keen sense of justice is evident on every page of this book as he gives voice to the voiceless and confronts the powerful. Profits of Doom is a devastating, incisive follow-up to Naomi Klein's The Shock Doctrine.' - Jeremy Scahill, international best-selling author of Dirty Wars and Blackwater Prisoners in 1980 Springer

PDF can be downloaded for free from: <http://martenscentre.eu/publications/contracting-out-private-military-and-security-companies> The global trend for contracting out the supply of military and security services is growing. Security is being transformed from a service for the public or common good into a privately provided service. This paper argues that the implications of outsourcing security services to private agencies are neither a positive nor negative phenomenon. However, proper regulation of private military and security services is important. The author recommends that states should determine their 'inherently governmental functions' and keep these functions out of the market's reach. Labour and Employment Compliance in Belgium Routledge This book addresses a seemingly simple question: Just how many people really work for the federal government? Official counts show a relatively small total of 1.9 million full-time civil servants, as of 1996. But, according to Paul Light, the true head count is nearly nine times higher than the official numbers, with about 17 million people actually providing the government with goods and services. Most are part of what Light calls the "shadow of government"—nonfederal employees working under federal contracts, grants, and mandates to state and local governments. In this book--the first that attempts to establish firm

estimates of the shadow work force-- he explores the reasons why the official size of the federal government has remained so small while the shadow of government has grown so large. Light examines the political incentives that make the illusion of a small government so attractive, analyzes the tools used by officials to keep the official headcount small, and reveals how the appearance of smallness affects the management of government and the future of the public service. Finally, he points out ways the federal government can better manage the shadow work force it has built over the past half-century.

The onset of the Great Financial Crisis in 2007/8 has triggered a widespread debate about the causes and the social and environmental consequences of the lack of long-term investment around the world. This volume, the third in the Sustainable Company book series produced by the GOODCORP network of academic and trade union experts on corporate governance, presents a ' stakeholder ' approach to the problem.

The analysis and policy prescriptions presented

here go beyond mainstream economic analysis by highlighting the need for major changes in the way resources are saved, distributed and invested in the interests of a sustainable and just economy and society. Individual chapters explore different dimensions of the problem of short-termism and possible policy responses.

Key themes in this volume include the state of the debate on long-term investment in Europe, increasing worker voice in pension fund investment and implementing financial transaction taxes to discourage financial market speculation. Policy proposals beyond the mainstream include strengthening worker participation rights (including the right to non-financial information from companies) and using international investment treaties to support social and environmental standards.

Global finance is in the middle of a radical transformation fueled by innovative financial technologies. The coronavirus pandemic has accelerated the digitization of retail financial services in Europe. Institutional interest and digital asset markets are also growing blurring the boundaries between the token economy and traditional finance. Blockchain, AI, quantum computing and decentralised finance (DeFI) are setting the stage for a global battle of business

models and philosophies. The post-Brexit EU cannot afford to ignore the promise of digital finance. But the Union is struggling to keep pace with global innovation hubs, particularly when it comes to experimenting with new digital forms of capital raising. Calibrating the EU digital finance strategy is a balancing act that requires a deep understanding of the factors driving the transformation, be they legal, cultural, political or economic, as well as their many implications. The same FinTech inventions that use AI, machine learning and big data to facilitate access to credit may also establish invisible barriers that further social, racial and religious exclusion. The way digital finance actors source, use, and record information presents countless consumer protection concerns. The EU 's strategic response has been years in the making and, finally, in September 2020 the Commission released a Digital Finance Package. This special issue collects contributions from leading scholars who scrutinize the challenges digital finance presents for the EU internal market and financial market regulation from multiple public policy perspectives. Author contributions adopt a critical yet constructive and solutions-oriented approach. They aim to provide policy-relevant research and ideas shedding light on the complexities of the digital finance promise. They also offer solid proposals for reform of EU financial services law.

“ This book will give you an entirely new perspective on work in America. ” —Barbara Ehrenreich, author of Nickel and Dimed In what has been described as “ the crime wave no one talks about, ” billions of dollars ' worth of wages are stolen from millions of workers in the United States every year—a grand theft that exceeds every other larceny category. Even the Economic Policy Foundation, a business-funded think tank, has estimated that companies annually steal an incredible \$19 billion in unpaid overtime. The scope of these abuses is staggering, but activists, unions, and policymakers—along with everyday Americans in congregations and towns across the country—have begun to take notice. While the first edition of Wage Theft In America documented the scope of the problem, this new edition adds the latest research on wage theft and tells what community, religious, and labor activists are now doing to address the crisis—from passing state and local wage-theft bills to establishing mayoral task forces and tapping agencies that help low-wage workers in spotting wage theft. Citing hard-hitting statistics and heartbreaking first-person accounts of exploitation at the hands of employers, this updated edition of Wage Theft In America offers concrete solutions and a roadmap for putting an end to this insidious practice.

Plunkett's Outsourcing & Offshoring Industry Almanac U.S. Government Printing Office The privatization of security understood as both the top-down decision to outsource military and security-related tasks to private firms and the bottom-up activities of armed non-state actors such as rebel opposition groups, insurgents, militias, and warlord factions has implications for the state's monopoly on the legitimate use of force. Both top-down and bottom-up privatization have significant consequences for effective, democratically accountable security sector governance as well as on opportunities for security sector reform across a range of different reform contexts. This volume situates security privatization within a broader policy framework, considers several relevant national and regional contexts, and analyzes different modes of regulation and control relating to a phenomenon with deep historical roots but also strong links to more recent trends of globalization and transnationalization.
