Cambridge University Press  
The privatization of security understood as both the top-down decision to outsource military and security-related tasks to private firms and the bottom-up activities of armed non-state actors such as rebel opposition groups, insurgents, militias, and warlord factions has implications for the state's monopoly on the legitimate use of force. Both top-down and bottom-up privatization have significant consequences for effective, democratically accountable

security sector governance as well as on opportunities for security sector reform across a range of different reform contexts. This volume situates security privatization within a broader policy framework, considers several relevant national and regional contexts, and analyzes different modes of regulation and control relating to a phenomenon with deep historical roots but also strong links to more recent trends of globalization and transnationalization. Alan Bryden is deputy head of research at the Geneva

Centre for the Democratic Control of Armed Forces (DCAF). Marina Caparini is senior research fellow at the Geneva Centre for the Democratic Control of Armed Forces (DCAF).  
*Arthur Cox Employment Law Yearbook 2015* Zed Books Ltd.  
PDF can be downloaded for free from: <http://martenscentre.eu/publications/contracting-out-private-military-and-security-companies> The global trend for contracting out the supply of military and security services is

---

growing. Security is being transformed from a service for the public or common good into a privately provided service. This paper argues that the implications of outsourcing security services to private agencies are neither a positive nor negative phenomenon. However, proper regulation of private military and security services is important. The author recommends that states should determine their 'inherently governmental functions'

and keep these functions out of the market's reach.

Global Legal Insights - Employment & Labour Law Incorporated Original This book addresses a seemingly simple question: Just how many people really work for the federal government? Official counts show a relatively small

total of 1.9 million full-time civil servants, as of 1996. But, according to Paul Light, the true head count is nearly nine times higher than the official numbers, with about 17 million people actually providing the government with goods and services. Most are part of what Light calls the "shadow of government"—nonfederal employees working under federal contracts, grants, and mandates to state and local governments. In this book--the first that attempts to establish firm estimates of the shadow work force--he explores the reasons

---

why the official size of the federal government has remained so small while the shadow of government has grown so large. Light examines the political incentives that make the illusion of a small government so attractive, analyzes the tools used by officials to keep the official headcount small, and reveals how the appearance of smallness affects the management of government and the future of the public service. Finally, he points out ways the federal government can better manage the shadow work force it has built over the

past half-century. Accidents and Safety Measures U.S. Government Printing Office Recent events in Mali, Libya, Syria, Afghanistan, Iraq, and elsewhere demonstrate that building professional indigenous forces is imperative to regional stability, yet few success stories exist. Liberia is a qualified "success," and this study explores how it was achieved by the

program's chief architect. Liberia suffered a 14-year civil war replete with human rights atrocities that killed 250,000 people and displaced a third of its population. Following President Charles Taylor's exile in 2003, the U.S. contracted DynCorp International to demobilize and rebuild the Armed Forces of Liberia and its Ministry of Defense; the first time in 150 years that one

---

sovereign nation hired a private company to raise another sovereign nation's military. This monograph explores the theory and practice behind the successful disarmament, demobilization, and reintegration (DDR) of the legacy military and security sector reform (SSR) that built the new one.

Vulture capitalism has seen the corporation become more powerful than the state, and yet its work is often done by stealth, supported by political and media elites. The result is privatised wars and outsourced detention centres. Mining companies pillaging precious land in developing countries and struggling nations are invaded by NGOs and the corporate dollar. Best-selling journalist Antony

Loewenstein travels to Afghanistan, Pakistan, Haiti, Papua New Guinea and across Australia to witness the reality of this largely hidden world of privatised detention centres, the cost of cheap clothing manufacturing and militarised private security. Who is involved and why? Can it be stopped? What are the alternatives in a globalised world? Profits of Doom challenges the fundamentals of our unsustainable way of life and the money-making imperatives driving it. Endorsements for Profits of Doom: 'In Australia, so

often bereft of voices of dissent and courage, Antony Loewenstein's tenacious work stands out. Profits of Doom is a journey into a world of mutated economics and corrupt politics that we ignore at our peril.' - John Pilger, independent investigative journalist, author and documentary film-maker 'A great exercise in joining the dots, on essential terrain that too often is ignored. At a time when rapacious private interests campaign to destroy government - so they can cash in on its absence - Loewenstein reports from the frontline in

---

an insidious war.' - Paul McGeough, author of Kill Khalid and chief foreign correspondent for The Sydney Morning Herald 'The competition for the most depraved example of the predatory state capitalism of the Reagan-Thatcher neoliberal era is fierce. In this chilling study, based on careful and courageous reporting, and illuminated with perceptive analysis, Antony Loewenstein presents many competitors for the prize, while also helping us understand all too well the saying that man is a wolf to man.' - Noam Chomsky,

Institute Professor at MIT and Professor of Linguistics and Philosophy, political activist and author 'Profits of Doom nails the mad idea that the drive for profits will create global wellbeing. Antony Loewenstein delivers a spine-chilling account of the post 9/11 world taken over by vulture capitalism and its political cronies. And this is what we are voting for.' - Bob Brown, former leader of the Australian Greens and director of Sea Shepherd 'Antony Loewenstein's Profits of Doom is a powerful indictment of the corporations and

governments across the globe whose unquenchable thirst for resources and power threaten the stability - perhaps even the very existence - of the planet. Loewenstein is no armchair academic or cubicle journalist. The stories in the book are the product of years embedded, in military and economic warzones, with the disempowered of the world, the people from Pakistan to Papua New Guinea and beyond who have the audacity and bravery to fight back against all odds. Loewenstein's keen sense of justice is evident on

---

every page of this book as he gives voice to the voiceless and confronts the powerful. Profits of Doom is a devastating, incisive follow-up to Naomi Klein's 'The Shock Doctrine.' - Jeremy Scahill, international best-selling author of Dirty Wars and Blackwater

Across Africa, growing economic inequality, instability and urbanization have led to the rapid spread of private security providers. While these PSPs have already had a significant impact on African societies, their impact has so far received little in the way of comprehensive analysis. Drawing on a wide range of disciplinary approaches, and encompassing anthropology, sociology

---

and political science, *Private Security in Africa* offers unique insight into the lives and experiences of security providers and those affected by them, as well as into the fragile state context which has allowed them to thrive. Featuring original empirical research and case studies ranging from private policing in South Africa to the recruitment of Sierra Leoneans for private security work in Iraq, the book considers the full implications of PSPs for security and the

state, not only for Africa but for the world as a whole. *Daily Graphic* Routledge
