Orville and Wilbur Wright, two bicycle-making brothers from Dayton, Ohio, secured their place as the most famous names in aviation history when, on December 17, 1903, they made the first powered, controlled, and sustained heavier-than-air flight. But their success over the cold and windswept Carolina dunes that day has overshadowed their many other accomplishments before and after that historic flight. The Wrights' progression from theory to analysis to ground-testing components and wing shapes, and then to flight-testing kites, gliders, and their first powered aeroplane, marked the world's first successful 'X-Plane' research and development programme. They established a template all subsequent aircraft have followed, one still relevant in the era of hypersonic flight and drone research. This book traces the Wright Brothers' story, from their first success on that cold December day throughout their glory years to their eventual eclipse by other aviators. It explores in detail the process that led them to their pioneering craft and their many subsequent achievements over the following years, and highlights their enduring importance in the age of modern flight.

NEW YORK TIMES BESTSELLER • A TODAY SHOW #ReadWithJenna BOOK CLUB PICK • WOMEN'S PRIZE FOR FICTION NOMINEE • The unforgettable story of a daredevil female aviator determined to chart her own course in life, at any cost: an "epic trip—through Prohibition and World War II, from Montana to London to present-day Hollywood—and you'll relish every minute" (People). After being rescued as infants from a sinking ocean liner in 1914, Marian and Jamie Graves are raised by their dissolute uncle in Missoula, Montana.

There--after encountering a pair of barnstorming pilots passing through town in beat-up biplanes--Marian commences her lifelong love affair with flight. At fourteen she drops out of school and finds an unexpected and dangerous patron in a wealthy bootlegger who provides a plane and subsidizes her lessons, an arrangement that will haunt her for the rest of her life, even as it allows her to fulfill her destiny: circumnavigating the globe by flying over the North and South Poles. A century later, Hadley Baxter is cast to play Marian in a film that centers on Marian's disappearance in Antarctica. Vibrant, canny, disgusted with the claustrophobia of Hollywood, Hadley is eager to redefine herself after a romantic film franchise has imprisoned her in the grip of cult celebrity. Her immersion into the character of Marian unfolds, thrillingly, alongside Marian's own story, as the two women's fates--and their hunger for self-determination in vastly different geographies and times--collide. Epic and emotional, meticulously researched and gloriously told, *Great Circle* is a monumental work of art, and a tremendous leap forward for the prodigiously gifted Maggie Shipstead.
