Ethics for the Information Age offers students a timely, balanced, and impartial treatment of computer ethics. By including an introduction to ethical theories and material on the history of computing, the text addresses all the topics of the "Social and Professional Issues" in the 2001 Model Curricula for Computing developed by the ACM and IEEE Computer Society. By introducing ethical theories early and using them throughout the book to evaluate moral problems related to information technology, the book helps students develop the ability to reach conclusions and defend them in front of an audience. Every issue is studied from the point of view of multiple ethical theories in order to provide a balanced analysis of relevant issues. Earlier chapters focus on issues concerned with the individual computer user including email, spam,

intellectual property, open source movement, and free speech and Web censorship. Later chapters focus on issues with greater impact on society as a whole such as privacy, computer and network security, and computer error. The final chapter discusses professionalism and the Software Engineering Code of Ethics. It invites students to contemplate the ethical dimensions of decisions computer professionals must frequently make.

In time for the 50th anniversary of President Nixon ' s epic trips to China and Russia, as well as his incredible Watergate downfall, the man who was at his side for a decade as his aide and White House Deputy takes readers inside the life and administration of Richard Nixon. From Richard Nixon ' s " You-won ' t-have-Nixon-to-kick-around-anymore " 1962 gubernatorial campaign through his world-changing trips to China and the Soviet Union and epic downfall, Dwight Chapin was by his side. As his personal aide and then Deputy Assistant in the White House Chapin was with him in his most private and most public moments. He traveled with him, assisted, advised, strategized, campaigned and learned from America ' s most controversial president. As Bob Haldeman ' s protege, Chapin worked with Henry Kissinger in opening China—then eventually went to prison for Watergate although he had no involvement in it. In this memoir Chapin takes readers on an extraordinary historic journey; presenting an insider ' s view of America ' s most enigmatic President. Chapin will relate his memorable experiences with the people who shaped the future: Henry Kissinger, his close friend Bob Haldeman, Choi En-lai, Pat Nixon, the embittered Spiro Agnew, J. Edgar Hoover, Frank Sinatra, Mark "Deep Throat" Felt, young and ambitious Roger Ailes, and John Dean. It ' s a story that ranges from Coretta Scott King to Elvis Presley, from the wonder of entering a closed Chinese society to the Oval Office, and concludes with startling new insights and conclusions about the break-in that brought down Nixon ' s presidency.
