First published in 1964, *Psychology and Social Problems* looks at a changing society and research into problems of the time. Many of the themes in the book, such as delinquency, mental health and racial conflict, are still familiar and current topics of discussion today. Social scientists had carried out extensive research into problems of urgent public concern, yet their findings were not widely known or understood and they had often been diffident in advocating policies based on their conclusions. Michael Argyle discussed the recent psychological and social research bearing on the origins of aggression, delinquency, mental disorder, racial and international prejudice, and industrial discontent; he went on to consider the implications of these studies for prevention and control and for the guidance of social change. This sophisticated and well-documented critique is presented with such lucidity and verve that it will appeal equally to laymen and to students and professional workers and can now be enjoyed in its historical context.

An expert guide to wine from the publishers of Larousse Gastronomique. This completely new and updated edition offers wide-ranging coverage of the key wine-producing regions of the world, with particular reference to French vineyards. A short history and analysis of each region is followed by a survey of the types of wines produced, the specific properties that make the region unique, and the appellations of the area. New to this edition are more than 60 features on key wine producers around the world, affording a fascinating insight into what is involved in high-quality wine-making. Boxes and features throughout also cover a vast range of subjects such as how to read a wine label and whether to decant wine, through to organic wine-growing and bio-dynamics.

Here is a rhetorical treatment of Karl Barth's early theology. Although scholars have long noted the rhetorical power of Barth's work, calling it volcanic and explosive, this book uses rhetoric to illuminate the peculiar nature of his prose. It displays a Barth whose prose is radically unstable and inseparable from his theological arguments. The author connects Barth's early theology to the Expressionism of the Weimar Republic. He develops an original theory of figures of speech, relying on the philosophies of Paul Ricoeur and Hayden White, to delve more deeply into the particular configurations of Barth's writings. Nietzsche's hyperbole and Kierkegaard's irony are examined as rhetorical precedents of Barth's style. The closing chapter surveys Barth's later, realistic theology and then suggests ways in which his earlier tropes, especially the figures of excess and self-negation, can serve to enable theology to speak today.

Historically, it gives examples of the influence of groundwater on battlefield tactics and fortress construction; describes how groundwater was developed for water supply and overcome as an obstacle to military engineering and cross-country vehicular movement by both sides in World Wars I and II; and culminates with examples of the application of

hydrogeology to site boreholes in recent conflicts, notably in Afghanistan. Examples of current research described include hydrological model development; the impact of variations in soil moisture on explosive threat detection and cross-country vehicle mobility; contamination arising from defence sites and its remediation; privatization of water supplies; and the equitable allocation of resources derived from an international transboundary aquifer.

A Zen poem is nothing other than an expression of the enlightened mind, a handful of simple words that disappear beneath the moment of insight to which it bears witness. Poetry has been an essential aid to Zen Buddhist practice from the dawn of Zen—and Zen has also had a profound influence on the secular poetry of the countries in which it has flourished. Here, two of America's most renowned poets and translators provide an overview of Zen poetry from China and Japan in all its rich variety, from the earliest days to the twentieth century. Included are works by Lao Tzu, Han Shan, Li Po, Dogen Kigen, Saigyō, Bashō, Chiao Jan, Yuan Mei, Ryōkan, and many others. Hamill and Seaton provide illuminating introductions to the Chinese and Japanese sections that set the poets and their work in historical and philosophical context. Short biographies of the poets are also included.

John Yolton seeks to allow readers of Locke to have accessible in one volume sections from a wide range of Locke's books, structured so that some of the interconnections of his thought can be seen and traced. Although Locke did not write from a system of philosophy, he did have in mind an overall division of human knowledge. The readings begin with Locke's essay on Hermeneutics and the portions of his Essay Concerning Human Understanding on how to read a text. The rest of the selections are organized around Locke's division of human knowledge into natural science, ethics, and the theory of signs. Yolton's introduction and

commentary explicate Locke's doctrines and provide the reader with the general background knowledge of other seventeenth-century writers and their works necessary to an understanding of Locke and his time.

Our relationship with money is one that lasts a lifetime, yet traditionally books on the subject tend to take one of two routes: a) how to get more, or b) how to deal with less. John Armstrong turns these approaches upside down, and looks not at money itself, but at how we relate to it and the meaning we attach to it. How does it drive us and frighten us? Can it change the world for the better? And how much do we actually need?

Offering surprising and helpful new insights, this book will encourage you to redefine your feelings about money, and ultimately enable you to discover what is really important to you in life. One in the new series of books from The School of Life, launched May 2012: How to Stay Sane by Philippa Perry How to Find Fulfilling Work by Roman Krznaric How to Worry Less About Money by John Armstrong How to Change the World by John-Paul Flintoff How to Thrive in the Digital Age by Tom Chatfield How to Think More About Sex by Alain de Botton

This volume is aimed at those who are concerned about Chinese medicine - how it works, what its current state is and, most important, how to make full use of it. The audience therefore includes clinicians who want to serve their patients better and patients who are eager to supplement their own conventional treatment. The authors of the book belong to three different fields, modern medicine, Chinese medicine and pharmacology. They provide information from their areas of expertise and concern, attempting to make it comprehensive for users. The approach is macroscopic and philosophical; readers convinced of the philosophy are to seek specific assistance.
