A fictionalized
ethnographic
study of
development aid

in sub-Saharan waterworks
Africa that focuses improvement
on technologies of project, funded by
inscription in the the Normesian
interactions of Development
development Bank,
banks, headquartered in
international Urbania,
experts, and local Normland, and
managers. In 1996, with the guidance
the sub-Saharan of Shilling &
African country of Partner, a
Ruritania consulting firm in
launched a massive Mercatoria,

Normland. Far-Fetched Facts tells the story of this project, as narrated by anthropologists Edward B. Drotlevski and Samuel A. Martonosi. Their account of the Ruritanian waterworks project views the problems of development from a new perspective, focusing on technologies of inscription in the interactions of development bank, international experts, and local managers. This development project is fictionalized, of

course, although based closely on author Richard Rottenburg's experiences working on and observing different development projects in the 1990s. Rottenburg uses the case of the Ruritanian waterworks project to examine issues of standardization, database building, documentation, calculation, and territory mapping. The techniques and technologies of the representational practices of documentation are crucial, Rottenburg argues, both to day-to-day

management of the project and to the demonstration of the project's legitimacy. Five decades of development aid (or "development cooperation," as it is now sometimes known) have yielded disappointing results. Rottenburg looks in particular at the role of the development consultant (often called upon to act as mediator between the other actors) and at the interstitial spaces where developmental cooperation actually occurs. He argues that both

critics and practitioners of development often misconstrue the grounds of cooperation—which, he claims, are moral, legal, and political rather than technological or epistemological.

Apomixis in Plants presents a comprehensive review of different aspects of asexual seed formation in plants. This is important in plant research since apomixis could greatly

facilitate breeding in important crops. It is also interesting theoretically because it carries problems related to genetic variation and evolution to its extreme. The book features a broad selection of topics, including a historical review of ideas and landmarks in the field; comparisons with other types of asexual reproduction in higher plants and with related phenomena in animals and related plants; a

presentation of cytology and embryology of apomicts and the diversified terminology in the field; views on the genetic background of apomixis and environmental effects on its expression; and the interrelation between apomixis and other traits. Additional topics covered include classical and modern theories of sexual versus asexual reproduction; geographical and taxonomical trends in apomicts;

ecological implications of apomixis, and a review of future possibilities for using apomixis in plant breeding. Apomixis in Plants is an important reference volume for researchers and students in all areas of botany, ecology, and plant breeding.

Brazilian Fruits & Cultivated Exotics (for Consuming in Natura) John Wiley & Sons DIY enthusiasts, tiny house-lovers, and van-lifers will find inspiration and step-by-step instructions in Tin Can Homestead, the ultimate resource for living small in your own Airstream paradise. The Airstream trailer is the ultimate symbol of vintage wanderlust-and the classic touring vehicle's

resurgent popularity has dovetailed with the tiny house movement, resonating with design-minded individuals looking to live small. Tin Can Homestead, based on the popular Instagram of the same name, is the ultimate resource for these would-be DIY-ers, and the perfect coffee-table addition for anyone looking for streamlined, modern lifestyle inspiration. Part practical how-to, part lushly illustrated design inspiration, Tin

Can Homestead follows the story of one couple as they build themselves a new life in an old Airstream. Through personal stories and down-and-dirty checklists, this book guides readers through all stages of creating their own Airstream homes-from buying a trailer to plumbing and electrical work. With a hip, bohemian aesthetic and a fresh authorial voice, the authors pair their DIY knowledge with lifestyle advice-including d é r,

design, and entertaining-and abundant illustrations, from in-process photographs to hand-drawn illustrations. Walking the Cape Wrath Trail Springer Need directions? Are you good at getting lost? Chemistry, Manufacture and Applications of Natural Rubber, Second Edition presents the latest advances in the processing, properties and advanced applications of natural rubber (NR), drawing on state-of-the-art research in the field. Chapters cover manufacturing, processing and properties of natural rubber, describing biosynthesis, vulcanization for improved performance,

strain-induced crystallization, self-reinforcement, rheology and mechanochemistry for processing, computer simulation of properties, scattering techniques and stabilizing agents. Applications covered include natural rubber, carbon allotropes, eco-friendly soft bio-composites using NR matrices and marine products, the use of NR for high

functionality such as shape memory, NR for the tire industry, and natural rubber latex with advanced applications. This is an essential resource for academic researchers, scientists and (post)graduate students in rubber science, polymer science, materials science and engineering, and chemistry. In industry, this book enables professionals, R&D, and

producers across the natural rubber, tire, rubber and elastomer industries, as well as across industries looking to use natural rubber products, to understand and utilize natural rubber for cutting-edge applications. - Explains the latest manufacture and processing techniques for natural rubber (NR) with enhanced properties - Explores novel applications of natural rubber

across a range of industries, including current and potential uses - Discusses resources and utilization, and considers sustainable future development of natural rubber Interned in Germany Alpha Books This is a new paperback edition of the well received text Spatial Epid emiology: Methods and Applications. It is an easy to read, clear and concise exploration of the field of

geographical variations in diseases . Especially with respect to variations in environmental exposures at the small-area scale this book gives an authoritative account of current practice and developments. The recent and rapid expansion of the field looks set to continue in line with growing public, governmental and media concern about environmental and health issues, and the scientific need to understand

and explain the effects of environmental pollutants on health.

An updated guide to GNSS and INS, and solutions to real-world GPS/INS problems with Kalman filtering
Written by recognized authorities in the field, this second edition of a landmark work provides engineers,

computer scientists, and others with a working familiarity with the theory and contemporary applications of Global Navigation Satellite Systems (GNSS), Inertial Navigational Systems (INS), and Kalman filters. Throughout, the focus is on solving real-world problems, with an emphasis on the effective use of state-of-the-art integration

techniques for those systems, especially the application of Kalman filtering. To that end, the authors explore the various subtleties, common failures, and inherent limitations of the theory as it applies to real-world situations, and provide numerous detailed application examples and practice problems, including GNSS-aided INS, modeling of

gyros and accelerometers, and SBAS and GBAS. Drawing upon their many years of experience with GNSS, INS, and the Kalman filter, the authors present numerous design and implementation techniques not found in other professional references. This Second Edition has been updated to include: GNSS signal integrity with SBAS Mitigation of multipath,

including results from Ionospheric delay estimation with Kalman filters New MATLAB programs for satellite position determination using almanac and ephemeris data and ionospheric delay calculations from single and dual frequency data New algorithms for GEO with L1/L5 frequencies and clock steering Implementation of mechanization

equations in numerically stable algorithms. To enhance comprehension of the subjects covered, the authors have included software in MATLAB, demonstrating the working of the GNSS, INS, and filter algorithms. In addition to showing the Kalman filter in action, the software also demonstrates various practical aspects of finite word length

arithmetic and the need for alternative algorithms to preserve result accuracy. Tin Can Homestead MIT Press This guidebook describes the Cape Wrath Trail, a long-distance trek from Fort William to Cape Wrath crossing the wild northwest of the Scottish Highlands. The route is described from south to north in 14 stages, with 6 alternative stages along the way, allowing for a flexible itinerary of

between two and three weeks. A long tough trek with no waymarking, this is for the tried and tested backpacker. The guidebook includes OS mapping, route profiles and detailed route descriptions and gives you all the information you need about accommodation (including hotels, bothies, B&Bs and bunkhouses), campsites and amenities en route, to help you plan and prepare for this epic challenge. The Cape Wrath Trail is regarded

as the toughest long-distance route in Britain and offers unparalleled freedom and adventure to the experienced and self-sufficient backpacker prepared to walk for many days in remote wilderness. Travelling through the wild and rugged landscapes of Morar, Knoydart, Torridon and Assynt, it will test the limits of your endurance. Wiley & Sons Using “ the sharing paradigm ” as a guiding concept, this book demonstrates that “ sharing ” has much greater potential to make rural society resilient, sustainable and inclusive through enriching all four sharing dimensions: informal, mediated, communal and commercial sharing. The chapters are divided into two parts, one that focuses on case studies of the sharing

ecosystem services in Japan, the other on case studies from around the world including in the regions of Africa, Asia-Pacific, South America and Europe. Reflecting the recent growing attention to sharing concept and its application to economic and urban context, this publication explores opportunities and challenges to build more resilient and sustainable society in harmony with nature by critical examination of

sharing practices in rural landscapes and seascapes around the world. This book introduces not only traditional communal and non-market sharing practices in different rural areas, but also new forms of sharing through integration of traditional practices and modern science and technologies. This book discusses the latest advances and applications in geospatial technologies and earth resources for mine surveying and civil engineering. It

also discusses mineral resources management and assesses many techniques such as unmanned aerial vehicles/ drones, ground-penetrating radar, geographic information system (GIS) and GIS-based machine learning. The book gathers the proceedings of the International Conference on Geo-Spatial Technologies and Earth

Resources (GTER 2017), which was co-organized by the Hanoi University of Mining and Geology (HUMG) and the International Society for Mine Surveying (ISM) and held in Hanoi, Vietnam, on October 5 – 6, 2017. GTER 2017 is technically co-sponsored by the Vietnam Mining Science and Technology Association (VMST), Vietnam

Association of Geodesy, Cartography and Remote Sensing (VGCR), Vietnam National Coal-Mineral Industries Holding Corporation Limited (VINACOMIN), and the Dong Bac Corporation (NECO). The event is intended to bring together experts, researchers, engineers, and policymakers to discuss and exchange their knowledges

and experiences with modern geospatial technologies, recent advances in mining and tunneling, and the geological and earth sciences. Given its breadth of coverage, the book will appeal to scientists in the field as well as professionals interested in related technological applications. 10 Years on 2 Wheels Cicerone Press Limited An essential

Perspectives on Nature Conservation Thirty-four years have elapsed since the publication of the late Professor P. Maheshwari's text, An Introduction to the Embryology of Angiosperms, a work which for many years served as an invaluable guide for students and a rich source

book for research workers. Various texts dealing with sections of the broad spectrum of topics encompassed by Maheshwari in his book have appeared in the interim, but a compendious modern work dealing with the whole field has been lacking. This present volume splendidly meets the need, and it is altogether fitting that Professor B. M. Iohri, long an associate and close colleague of Professor Maheshwari and

himself a prolific collaborator, contributor to the subject, should have undertaken the task of editing it. When Maheshwari wrote, it was still feasible for one author to handle the subject, but today even someone with his fine breadth of vision and depth of understanding could not, alone, do it justice. So the effort has to be a collaborative one; and Professor Iohri's achievement has been to bring together a team of authoritative collaborators, assign them their responsibilities, and put them to work to produce a text as integrated in its treatment as the diversity of the subject would allow. The product vividly illustrates the advances that have been made in the study of angiosperm reproductive systems in the last 30 years, and the book is surely destined to become the new standard for student and researcher alike. Embryology of Angiosperms
