Backpacker CRC Press

Perfekte Planung durch intelligente Technik! Vom Profi bis zum Freizeitsportler setzen immer mehr Radfahrer auf GPS-Geräte. Eine aktuelle Marktübersicht liefert dieses Buch: Welche Geräte eignen sich für Mountainbiker, Touren- oder Rennradler? Welche digitalen Karten bieten die meisten Möglichkeiten? Auf welchen Portalen gibt es die besten Touren? Ein Fundus der Extraklasse, bei dem keine Fragen offen bleiben!

*Advances of Science and Technology* Penguin

Backpacker brings the outdoors straight to the reader's doorstep, inspiring and enabling them to go more places and enjoy nature more often. The authority on active adventure, Backpacker is the world's first GPS-enabled

magazine, and the only magazine whose editors personally test the hiking trails, camping gear, and survival tips they publish. Backpacker's Editors' Choice Awards, an industry honor recognizing design, feature and product innovation, has become the gold standard against which all other outdoor-industry awards are measured.

On Thin Ice Lulu.com

As the impacts of anthropogenic activities increase in both magnitude and extent, biodiversity is coming under increasing pressure. Scientists and policy makers are frequently hampered by a lack of information on biological systems, particularly

---

information relating to long-term trends. Such information is crucial to developing an understanding as to how biodiversity may respond to global environmental change. Knowledge gaps make it very difficult to develop effective policies and legislation to reduce and reverse biodiversity loss. This book explores the gap between global commitments to biodiversity conservation, and local action to track biodiversity change and implement conservation action. High profile international political commitments to improve biodiversity conservation, such as the targets set by the Convention on Biological Diversity, require innovative and rapid responses from both science and policy. This

multi-disciplinary perspective highlights barriers to conservation and offers novel solutions to evaluating trends in biodiversity at multiple scales. Ubiquitous Computing and Ambient Intelligence Lulu Press, Inc  
The Congress "Arsenic in the Environment" offers an international, multi- and interdisciplinary discussion platform for research aimed towards a holistic solution to the problem posed by the environmental toxin arsenic, with considerable societal impact. The congress has focused on cutting edge and breakthrough research in physical, chemical, toxic

**ETrex HC Series** Springer Nature

This book provides readers with an insight into information and knowledge in the Internet of Things, in particular an investigation of data management and

processing, information extraction, technology, knowledge management, knowledge sharing, knowledge co-creation, knowledge integration, and the development of new intelligent services available anytime, anywhere, by anyone. The authors show how IoT enables communication and ubiquitous computing between global citizens, networked machines and physical objects, providing a promising vision of the future integrating the real world of knowledge agents and things with the virtual world of information.

## Frontiers Media SA

This book publishes the results of 220 botanical samples from the 1993-2002 Gordion excavations directed by Mary Voigt. Together with Naomi Miller's 2010 volume (Gordion Special Studies 5), this book completes the publication of botanical samples from Voigt's excavations. The book aims to reconstruct agricultural decision making using archaeological and paleoenvironmental data from Gordion to describe environmental and agricultural changes at the site. John M. Marston argues that different political and economic systems implemented over time at Gordion resulted in patterns of agricultural decision making that were well adapted to the social setting of farmers in each period, but that these practices had divergent environmental impacts, with some regimes sponsoring sustainable agricultural practices and others leading to significant environmental

change. The implications of this book are twofold: Gordion will now be one of the best published agricultural datasets from the entire Near East and, thus, serve as a valuable comparable dataset for regional synthesis of agricultural and environmental change, and the methods the author developed to reconstruct agricultural change at Gordion serves as tools to engage questions about the relationship between social and environmental change at sites worldwide. Other books address similar themes but none in the Near East address these themes in diachronic perspective such as we have at Gordion. University Museum Monograph, 145

Jill Homer has an outlandish ambition:

---

Racing a mountain bike 2,740 miles from Canada to Mexico along the Continental Divide. But her dream starts to unravel the minute she sets it in motion. An accident on the Iditarod Trail results in serious frostbite. She struggles with painful recovery and growing uncertainties. Then, just two days before their departure, her boyfriend ends their eight-year relationship, dismantling everything Jill thought she knew about life, love and her identity. This is the story of an adventure driven relentlessly forward as foundations crumble. During her record-breaking ride in the 2009 Tour Divide, Jill battles a torrent of anger, self-doubt, fatigue, loneliness, pain, grief, bicycle failures, crashes and violent storms. Each night, she collapses under the crushing effort of this savage new way of life. And

every morning, she picks up the pieces and strikes out to find what lies on the other side of the Divide: Astonishing beauty, unconditional kindness, and boundless strength.

### Raspberry Pi Springer Nature

Alex and Tom are just schoolboys who do not have much knowledge about cycling. What they do have is a huge summer holiday to fill. Armed with some overly packed bicycles and no training they waved bye to their parents and set off to cycle 3000 kilometres around Europe, to raise money for the MS society. They aimed to cycle their bikes through 8 countries, meeting new people and seeing the world from a different perspective. However with crashes, infestations, and being eaten alive they are faced with a

---

much harder task in order to make it home. Alex and Tom managed to raise over £3000 for the MS Society during their cycle. This book will enable them to carry on this effort, as £1 from every book will be donated to the MS Society.

*Microbial Systematics* Springer

This book provides information essential for anyone interested in climate and environmental change of the Himalayan region, including land and resource managers, environmental planners, conservationists, environmentalists, geographers, climatologists, ecologists, and students. The book is unique in its coverage of the current understanding of

the science of climate change in the Himalayan mountain system and of the major impacts on physical systems and ecosystems. The book gives an overview of the physical science basis of climate change and explains drivers and processes of glacier and vegetation dynamics. The book covers relevant aspects of accelerated climate change observed in the Himalayan mountain system, and highlights the regional differentiation of climatic changes and associated environmental modifications. The focus is on climate variability and change, and how physical systems and ecosystems respond to climate change impacts. Consequences include impacts on physical systems such as glacier shrinkage, glacial lake outburst floods, altered hydrological characteristics,

---

permafrost warming and thawing, and mass movements on slopes. Climate change is also a powerful stressor on ecosystems and induces range shifts of plant and animal species and alterations in terms of phenology, biomass, plant cover, plant group dominance and species composition. Thus, ecosystem structure and functioning will be strongly affected. The book has an introductory chapter followed by a section on climate change, a section on impacts on glaciers and hydrology, and a section on vegetation dynamics. Each section has several chapters presenting key concepts, major drivers and key processes of environmental change in the Himalayan region from different perspectives. Climate change impacts in the Himalaya have not been studied in much detail, and respective findings were not presented so far in a comprehensive overview. This book summarizes the current knowledge of interactions between climate change and the dynamics of glaciers, hydrology, and vegetation.

This book constitutes the refereed proceedings of the 6th International Conference on Ubiquitous Computing and Ambient Intelligence, UCAmI 2012, held in Vitoria-Gasteiz, Spain, in December 2012. The 70 research papers were carefully reviewed and selected from various submissions. The main focus of this book has been to explore how Ambient Intelligence can contribute towards smarter but still more sustainable environments. Beyond sustainable computing the

---

proceedings also include research work describing progress on other key research topics for Aml such as human environment mobile-mediated (through NFC or AR) interaction, artificial intelligence techniques to foster user- and context-aware environment adaptation, future internet trends such as social networks analysis, linked data or crowd-sourcing applied to Aml, internet-connected object ecosystems collaborating to give place to smarter environments.

**Importance of the traditional land-use and land-tenure systems of Waraka, Seram Island, Maluku** Springer

Using "the sharing paradigm" as a guiding concept, this book demonstrates that "sharing" has much greater potential to make rural society resilient, sustainable and inclusive through enriching all four sharing dimensions: informal, mediated, communal and commercial sharing. The chapters are divided into two parts, one that focuses on case studies of the sharing ecosystem services in Japan, the other on

---

case studies from around the world including in the regions of Africa, Asia-Pacific, South America and Europe. Reflecting the recent growing attention to sharing concept and its application to economic and urban context, this publication explores opportunities and challenges to build more resilient and sustainable society in harmony with nature by critical examination of sharing practices in rural landscapes and seascapes around the world. This book introduces not only traditional communal and non-market sharing practices in different rural areas, but also new forms of sharing through integration of traditional practices and modern science and technologies.
