It took all of thirty seconds for two shots to bring the world of Margaret Tabaaha crashing down around her. After losing her husband in Afghanistan during the first year of Operation Enduring Freedom, her two sons were all she had left. Now they had been taken from her violently, deliberately, plunging her into a whiskey bottle and stripping away her reason for living. When Arthur Nakai receives a call from his first love, Margaret, her voice pleading for his help, it comes as he is attending a wake for one of the men he

considered a brother from his days in the Marines 6th LAR Wolf Pack Battalion. Feeling a deep and responsible obligation to help her, Arthur soon finds himself involved in the multi-billion-dollar world of the oil and gas industry and coming face-to-face with an old adversary, Elias Dayton. Their paths had crossed when Arthur was a member of the Shadow Wolves, an elite tactical unit within US Customs and Border Protection. Now Dayton runs Patriot Security, a Blackwater-type firm that keeps the oil rigs, gas wells, and man camps secure from the Water Protectors, protesters pushing to stop the fracking and poisoning of Native lands. As Arthur works through the case from his end, Navajo police chief Jake Bilagody tackles it from another angle, looking into the strained relationship between the oil company and the Navajo people, all while searching for a missing Navajo man that may have become an unwilling piece on the reservation checkerboard. But when Arthur learns the identity of the boys' killer, he struggles to make sense of it. Because if the clues are right, he will be forced to make a decision that will haunt him for the rest of his life.

This book by Mick Duckworth, centres on the definitive history of London's Ace Cafe, the roadside pull-in that became the most famous haunt of motorcycle riding Ton-up kids in the Fifties and Rockers in the Sixties. The book also tells the story of other lively bikers haunts of the past, like the 59 Club, the Busy Bee and other cafes around the country. A substantial high-quality volume packed with personal recollections and evocative photos, Ace Times also looks at the fastest motorcycles, the loudest music, the iconic movies and the distinctive clothing of the cafe-racing era. Burn-ups, press hysteria, rock'n'roll riots, police-baiting, Mods and Rockers, pirate radio and loads more besides are all portrayed in a true-to-life, unembroidered way.

This compilation opens by presenting a discussion on the main conditions for the successful start-up and operation of full-scale mainstream partial nitrification-anammox technology, advantages of partial nitrification-anammox technology over other technologies of wastewater treatment, and a description of the interactions among key microbial groups and their identification by using metagenomic approaches. Next, one study elucidates the performance of anammox hybrid reactors under various operating conditions to optimize and assess its efficacy and feasibility for nitrogen removal from wastewater. Four numbers of hybrid reactors conglomerating the dual advantages of attached and suspended growth were designed and investigated. The authors seek to produce a soil erosion susceptibility map with selected parameters including elevation, slope, aspect, slope curvature, stream power index, topographic wetness index, cover management factor, land use/land cover, rainfall erosivity, soil erodibility, lineament density, distance from

lineament, and distance from stream and drainage density. The weighted linear combination method is applied using remote sensing and geographical information system techniques in the Shiri river basin of Darjeeling, Himalaya. The following study addresses the financial and economic benefits of tourism, and whether these economic benefits are to the detriment of the natural environment. This is done by conducting an investigation into community fishing practices around Mnemba Island. Semi-structured interviews were held with Mnemba Island Lodge staff, local fishermen and local authorities involved in the fisheries around Mnemba. Participatory observations were also used to support the data collected by the semi-structured interviews. The authors present data suggesting that of insolation is of high importance for the structuring of floodplain ecosystems because it has potential to impact floodplain lakes regardless of flooding. It is proposed that future investigations of floodplain aquatic habitats should take into account insolation effects other than those of hydrology. The closing chapter provides a brief review of anchovy characteristics, habitats, use, and eco-friendly treatment of anchovy waste/wastewater for reutilization. Anchovy is an attractive resource for the production of functional compounds such as antimutagenic, antifungal, antioxidant and antibacterial agents.

Eliza Knight's bestselling Scottish historical romance series, The Stolen Bride Series, is back with another amazing tale of adventure, passion and love! Ceana Montgomery had notions of marrying for love after her first disastrous marriage ended in widowhood. But now Robert the Bruce has ordered her to marry a stranger, securing a strong alliance and ending a decades-old feud. Already used as a pawn once in marriage, she is devastated that she will once more have to give up her happiness in order to please the edicts of men. And while the braw warrior standing before her might incite feelings inside her she thought long since buried, desire is a far cry from love. The rivalry between Brochan Lamont and his twin brother, John, began in the womb, and only grew worse from there. They were pitted against each other in childhood, and their father left them with a legacy that was a race to the finish—whoever has an heir first inherits the lands. The only problem is that Brochan has given his loyalty to the Scots, and his brother to the English. In order to keep the lands and ships under Scottish control, Robert the Bruce

demands Brochan marry to break the iron-clad will. His new bride harbors a fiery temperament that lures Brochan into stoking her passions instead of her ire. Aligned to strengthen the Scottish claims on the realm, Brochan and Ceana must work together to overcome the obstacles that bind them. But perhaps seeing their duties through does not have to be as painful as they both predicted. Is it possible that love can be forged from a union born in alliance? Maybe Fate knew all along just who was meant for who...

"A sweet, sexy read, featuring a couple that feels both true-to-life and aspirational. " Kirkus Review, Starred Review American Angie Donovan has never wanted much. When you grow up getting bounced from foster home to foster home, you learn not to become attached to anything, anyone, or any place. But it only took her two days to fall in love with Australia. With her visa clock ticking, surely she can fall in love with an Australian—and get hitched—in two months. Especially if he ' s as hot and funny as her next-door neighbor... Jace Walters has never wanted much—except a bathroom he didn ' t have to share. The last cookie all to himself. And solitude. But when you grow up in a family of seven, you can kiss those things goodbye. He ' s finally living alone and working on his syndicated comic strip in privacy. Sure, his American neighbor is distractingly sexy and annoyingly nosy, but she ' ll be gone in a few months... Except now she ' s determined to find her perfect match by checking out every eligible male in the town, and her choices are even more distracting. So why does it suddenly feel like he—and his obnoxious tight-knit family, and even these two wayward dogs—could be exactly what she needs? groundbreaking guide to surviving and thriving in an obesogenic world, from the CEO of Weight Watchers International. We live in a dangerous food world, full of temptation and instant gratification. No wonder obesity among Americans has tripled since the 1960s—and that those prone to weight gain fail over and over to maintain their hard-won goals. Simply put, our brains and environments are stacked against us. Simplistic willpower-based and food-focused diets will never bring lasting change. But a solution is within reach—one that will help readers live better, longer, and more happily. In fact, David Kirchhoff isn't just the President and CEO of Weight Watchers—he's also one of its biggest success stories. In his pursuit of a trim physique, Kirchhoff divulges his slide into full-fledged obesity, his struggles to manage his relationship with food, and to find an exercise regimen that sticks. Drawing on the latest scientific research and numerous other inspiring personal stories, he makes the case that the only recipe for long-term success is to radically shift our mindset when thinking about obesity and adopting a healthy lifestyle that stays with us for good. This requires incorporating positive habits that become second nature, and rigorously managing one's food environment—as well as embracing practical behavior-change tools and other sustainable maintenance strategies. In the light of a new, healthier lifestyle that helps readers look good and feel good, change isn't a burden--it's a release.

Bob Roll is a former Tour de France racer, well-known scribe, and race announcer, and he's back to cause a ruckus! Bobke II (correctly pronounced "BOOB-kuh") revisits all of the original journals of Roll's wild rides and crazy tales about cycling's uncensored side. When Bobke retired from competition, his pen continued the crazed poetic commentary, and Roll's newest additions cover both topics held reverent in cycling and also those that are hardly related to the sport. Bobke tips his cap to the classic riders and races, takes us on a grueling week of training with Lance Armstrong, tells the sport as he sees it, and entertains us with plenty of ditties and rants in between. It's a zany, often absurd, yet compelling commotion.

Human Performance, Workload, and Situational Awareness Measures Handbook, Third Edition - 2-Volume Set Saint-Lambert, Quebec : Dominique & Friends

This two-volume set was developed to help researchers and practitioners select measures to be used in the evaluation of human/machine systems. It can also be used to supplement classes at both the undergraduate and graduate courses in ergonomics, experimental psychology, human factors, human performance, measurement, and system test and evaluation. Volume 1 of the handbook begins with an overview of the steps involved in developing a test to measure human performance, workload, and/or situational awareness. This is followed by a definition of

human performance and a review of human performance measures. Situational Awareness is similarly treated in a subsequent chapter. Volume 2 presents a definition of workload and a review of workload measures. Provides a short engineering tutorial on experimental design Offers readily accessible information on human performance, workload, and situational awareness (SA) measures Presents general description of the measure Covers data collection, reduction, and analysis requirement Details out the strengths and limitations or restrictions of each measure, including any known proprietary rights or restrictions, as well as validity and reliability data
