When Dan set out to drive his Jeep from the Northern tip of Alaska to Tierra del Fuego on the Southern tip of South America, he had no idea how much the adventure would change his life. Over the course of two years, Dan's expedition spanned forty thousand miles through sixteen countries. Now he will never be the same. After years of saving, dreaming and planning, Dan wanted to find out if an ordinary guy can achieve the extraordinary. With no sponsorship, a modest savings account and a willingness to learn Spanish, Dan threw himself in. Going solo, with no GPS and sleeping in a ground tent, Dan wanted to experience everything the Americas have to offer. From poking lava with a stick and hiking among world-famous mountains to corrupt military and camping with Ecuadorian locals - every day provided something new. With his eyes and ears open to the world around him, Dan met many interesting and thought-provoking characters. With their guidance and prodding, and by using their unique perspective, Dan was able to learn many valuable life lessons. Running to the beat of a different drum, Latin America was the perfect classroom for Dan to view our modern work-a-day world through an entirely new lens.

Although it is quite a challenge to teach a specific subject in a simple and pleasant way, it is possible thanks to lived experiences and acquired knowledge. Based on this same principle, we have accepted a challenge different from the rest, more complex but no less exciting: the challenge of "teaching how to teach." Flight Instructor is aimed at those pilots who wish to become aviation educators, aviation psychologists, aviation friends, among other titles, as a flight instructor usually fulfills all these roles in the cockpit. Teaching is an art that requires navigating through different stages of a student's personality, as each person is different, and each of these different individuals requires a particular instructor with a specific personality capable of bringing out the student's maximum potential. In this new edition, we will explore the basic theoretical concepts that a flight instructor must master. Concepts such as the teaching and learning process, the communication process, and the evaluation process. Teaching techniques adapted to different student personalities, basic concepts of body language, and more. "Teaching how to teach" is the premise of this manual. Understanding each stage of each process in depth and mastering their techniques will be the goal.

The Global Positioning System (GPS) is a U.S. military space system operated by the U.S. Air Force. The space segment of GPS consists of a constellation of 24 satellites that broadcast precise time signals. When the satellites are in view of a suitable GPS receiver, these signals aid position-location, navigation, and precision timing. GPS was developed by the U.S. Department of Defense and deployed over two decades at a cost of over \$10 billion. The U.S. armed forces are increasingly reliant on its signals for a variety of purposes from navigation to munitions guidance. However, over the past 10 years, GPS has evolved far beyond its military origins. It is now a worldwide information resource supporting a wide range of civil, scientific, and commercial functions, from air traffic control to the Internet. GPS has also spawned a substantial commercial industry in the United States and abroad with rapidly growing markets for related products and services.
