When Dan set out to drive his Jeep from the Northern tip of Alaska to Tierra del Fuego on the Southern tip of South America, he had no idea how much the adventure would change his life. Over the course of two years, Dan's expedition spanned forty thousand miles through sixteen countries. Now he will never be the same. After years of saving, dreaming and planning, Dan wanted to find out if an ordinary guy can achieve the extraordinary. With no sponsorship, a modest savings account and a willingness to learn Spanish, Dan threw himself in. Going solo, with no GPS and sleeping in a ground tent, Dan wanted to experience everything the Americas have to offer. From poking lava with a stick and hiking among world-famous mountains to corrupt military and camping with Ecuadorian locals - every day provided something new. With his eyes and ears open to the world around him, Dan met many interesting and thought-provoking characters. With their guidance and prodding, and by using their unique perspective, Dan was able to learn many valuable life lessons. Running to the beat of a different drum, Latin America was the perfect classroom for Dan to view our modern work-a-day world through an entirely new lens.

Hunter Allen and Andy Coggan, PhD have

completely revised the book that made power meters understandable for amateur and professional cyclists and triathletes. Power meters have become essential tools for competitive cyclists and triathletes. No training tool can unlock as much speed and endurance as a power meter--for those who understand how to interpret their data. A power meter displays and records exactly how much energy a cyclist expends, which lends unprecedented insight into that rider's abilities and fitness. With the proper baseline data, a cyclist can use a power meter to determine race strategy, pacing, and tactics. Training and Racing with a Power Meter makes it possible to exploit the incredible usefulness of the power meter by explaining how to profile strengths and weaknesses, measure fitness and fatigue, optimize workouts, time race readiness, and race using power. This new edition: Enables athletes to predict future performance and time peak form Introduces fatigue profiling, a new testing method to pinpoint weaknesses Includes two training plans to raise functional threshold power and time peaks for race day Offers 75 power-based workouts tuned for specific training goals This updated edition also includes new case studies, a full chapter on triathlon training and racing, and improved 2-color charts and tables throughout. Training and Racing with a Power Meter, will continue to be the definitive guide to the most important training tool ever developed for endurance sports.

This guidebook describes the Way of St Francis a 550km month-long pilgrimage trail from Florence through Assisi to Rome. Split into 28 day stages, the walk begins in Florence and finishes in the Vatican City. Stages range from 8km to 30km with plenty to see, including ancient ruins, picturesque towns, national treasures, and stunning churches. This comprehensive guidebook fits in a jacket pocket or rucksack, and contains information on everything from accommodation and transport in Italy, to securing your credential (pilgrim identity card), budgeting, what to take, and where to do laundry. Stories of Francis of Assisi's life are also included. Although the route includes climbs and descents of up to 1200m, no special equipment is required - although your hiking boots and socks definitely need to get along. Following the steps of heroes, conquerors and saints on this pilgrim trail is manageable all year round, but is best done from April to June and mid-August to October. Route maps are given for every stage, and basic Italian phrases are included in the guidebook.

The Ultimate Public Campground Project was conceived in 2008 to provide a consolidated and comprehensive source for public campgrounds of all types. It all began with a simple POI (Point of Interest) list of GPS coordinates and names, nothing more, totaling perhaps 5,000 locations. As the list grew in size and information provided, a website was

designed to display the data on a map. Next came mobile apps, first iOS and Mac apps and more recently Android versions. Now this information is available in 17 paperback books and includes over 38,000 locations across the United States. Work continues on the Project with information updated regularly. Volume 1 of The Ultimate Public Campground Project book describes 1,437 camping areas in the State of Washington.
