GPS For Mariners is a comprehensive guide for recreational boaters to learn how to operate and effectively use today's GPS systems in everyday navigational situations. While all GPS products come with operational manuals and there are books on how to use your GPS for land or aerial navigation, there is very little information available to recreational boaters on how to best utilize their GPS for marine navigation. From learning the history of GPS, discovering the functions of the GPS, understanding basic and advance course-plotting, learning advance navigation with GPS, interfacing a GPS with an autopilot, to using a GPS with electronic charts on a PC, **GPS For Mariners** includes everything the novice to the more experienced boater should know about their GPS system. **GPS For Mariners** is the ultimate how-to guide and ready reference leading to GPS proficiency.

This book is for anyone who owns, or is thinking of owning, a Vixen Star Book Ten telescope mount or its predecessor. A revolution in amateur astronomy has occurred in the past decade with the wide availability of high tech, computer-driven, Go-To telescopes. Vixen Optics is leading the way by offering the Star Book Ten system, with its unique star map graphics software. The Star Book Ten is the latest version of computer telescope control using star map graphics as a user interface, first introduced in the original Star Book first offered in 2003. The increasingly complicated nature of this software means that learning to optimize this program is not straightforward, and yet the resulting views when all features are correctly deployed can be phenomenal. After a short history of computerized Go-To telescopes for the consumer amateur astronomer market, Chen offers a treasury of technical information. His advice, tips, and solutions aid the user in getting the most out of the Star Book Ten system in observing sessions.
