Astrology is finally getting personal! From the best-selling author of *The Secret Language of Birthdays* comes a revolution in charting your horoscope based on both the date and time of your birth that makes all other horoscope books irrelevant. With his "Personology" system, Gary Goldschneider has created a unique method which divides each of the twelve signs into five sub-types-such as Aquarius-Pisces Cusp, Pisces I, Pisces II, Pisces III, and Pisces-Aries Cusp-thereby sub-dividing the astrological year into 48 personology periods. The precision this allows is far beyond anything available in any other astrology book and provides a ground-breaking new way for readers to look not only at their own lives, but their interactions with those around them. The book comes packed with easy-to-follow charts covering the sun, eight different planets, and, unique to this book, the rapid fluctuations of the moon for every year from 1900 through 2025. The result is an unprecedented level of precision, as well as a beautifully illustrated volume destined to become the one and only book horoscope readers

will treasure for the next twenty years.

The Third Edition of *Police & Society* offers a comprehensive introduction to policing in the United States. Author Roy Roberg is joined by prominent policing scholars Kenneth Novak and Gary Cordner. Their thoroughly revised text is both descriptive and analytical in nature--covering the process of policing, police behavior, organization, operations, and historical perspectives. To adequately explain the complex nature of police operations in a democracy, the authors have integrated the most important theoretical foundations, research findings, and contemporary practices in a comprehensible, yet analytical, manner. Contemporary issues and future prospects of policing are fully addressed. The text features an emphasis on the relationship between the police and the community--as well as how this relationship has evolved over time. The impact of this evolution on current police practices, especially with respect to community policing and policing in the post-9/11 era, is explored. The new edition has been substantially updated and revised, with four new or significantly revised chapters: "Community Policing," "Legal Issues," "Higher Education," and "Contemporary and Emerging Issues." Importantly, new "Voices From the Field" boxes have been added to each chapter. Here, nationally known police officials provide their insights into contemporary police practices and problems in a thought-provoking format. Topics New to the Third Edition: \* Police auditor systems \* Early warning systems \* New forms of police stressors \* Officer safety and fatality reduction \* Terrorism and post-9/11 policing \* Globalization \* Policing and the mentally ill \* Search and seizure \* Legal issues in interrogations \* Civil liability \* Contemporary performance measures \* Racially biased policing/racial profiling Topics significantly expanded from the last edition include: \* The role of the police in history \* Broken windows \* Community policing today \* Police ethics and deviant behavior \* Use of force, brutality, and oversight mechanisms \* Women in policing \* Police suicide \* Responses to stress \* Officer culture \* Officer discretion \* Police paramilitary units (PPUs) \* Compstat and Quality of Life policing \* Chicago and Madison updates \* Job satisfaction and community policing \* Directed patrols/crackdowns \* Higher education, satisfaction, and discipline \* Demographic changes in American society \* Police technology *Police & Society* also offers "Inside Policing" themed boxes which feature important research findings and brief descriptions of exemplary police programs and operations. The Third Edition also features an expanded glossary, with key terms at the beginning of each chapter. Ancillaries to enhance instruction include: \* An Interactive Student Study Guide on CD--included with each copy of the book \* A revised, dedicated Website \* All figures and tables in the text available in PowerPoint on CD

Getting Started in Electronics Tyndale House Pub

Rose is a princess, a Cinder, and half-human. She is the last one born of her kind, and on her twenty-first birthday, she must enter the woods and travel to find her Prince, as her sisters did before her. ". . . And we will all dance at the Grand Ball," her sisters would always say. But the Human servants are keeping a

secret that could prevent the Cinders from reaching their Happily Ever After....Hidden in Rose's dreams and vision are the answers of the past between Cinders and Humans, and she is quickly running out of time trying to solve their hidden messages. She knows the answer lies in her first clue--identifying an animal she has never seen before--that persistent vision of a furry white animal, holding a gold metal object and exclaiming, "Oh dear! Oh dear! I shall be too late!"

*Learning from Loss* Little, Brown UK

To help the researcher understand why and how children react to adults who are doing ethnographic research, Fine and Sandstrom explore the methodological and ethical problems of qualitative research with minors. They correct numerous fallacies held by researchers that children think like adults and that they cannot hide their thoughts and feelings from adults, especially strangers. Recognizing that age is an important determinant of children's response, they discuss problems and present strategies for conducting research with three age groups of children: preschool children (4 to 6 year olds), preadolescents (10 to 12) and middle adolescents (14 to 16). This is the first major methodological statement on doing participant observation work w

*Mental Maths Year 2* Parentology

An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of Battle Hymn of the Tiger Mother). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In Parentology, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.

**Love Is A Decision** SAGE Publications, Incorporated

Thoroughly updated to reflect all of the latest concepts and advances in the field, this concise, extensively illustrated text presents the basic science and clinical application of cellular and molecular biology. Functioning as a combined text and atlas, it is essentially two books for the price of one providing a comprehensive, visually engaging histology education from the ground up. Illustrations, tables, chapter summaries and multiple choice questions facilitate comprehension of concepts, and clinical correlations underscore the practical relevance of the

---

material. Superb illustrations—including photomicrographs, electron micrographs, schematic diagrams and drawings—provide a visual grasp and easier retention of difficult concepts. Clinical correlations throughout the text demonstrate clinical applications and reinforce the idea that histology is pertinent not only to pathology and physiology, but in fact comprises one of the essential bases of clinical practice. New! "Pathological Considerations" section at the end of each chapter. Helpful tables provide an at-a-glance summary statement of key points. Bolded key terms, bulleted lists and chapter summaries emphasize the "need to know" information in every chapter. A combination of USMLE-style questions and image based questions in each chapter.
