Rose is a princess, a Cinder, and half-human. She is the last one born of her

kind, and on her twenty-first birthday, she must enter the woods and travel to find her Prince, as her sisters did before her. ". . . And we will all dance at the Grand Ball," her sisters would always say. But the Human servants are keeping a secret that could prevent the Cinders from reaching their Happily Ever After....Hidden in Rose's dreams and vision are the answers of the past between Cinders and Humans, and she is quickly running out of time trying to solve their hidden messages. She knows the answer lies in her first clue--identifying an animal she has never seen before--that persistent vision of a furry white animal, holding a gold metal object and exclaiming, "Oh dear! Oh dear! I shall be too late!"

Ambrose Zephyr and his wife Zappora Ashkenazi ("Zipper") have achieved a happy and balanced life together. The two live contentedly in a narrow London terrace full of books. That contentment is thrown into turmoil on Ambrose's fiftieth birthday, when they

receive the news that he has contracted a mysterious illness that will most certainly lead to his death within the month. In panicked delirium, from beneath their bed Ambrose withdraws an oxblood suitcase containing the ephemera of his long-suppressed life's ambition: to travel the world in a pilgrimage through the alphabet, from Amsterdam to Zanzibar. Scuttling the responsibilities of their respectably successful careers, the two set off on an urgent voyage through real and imagined geographies of place, of history, of art, and of love. In Amsterdam, they revisit past debates on beauty and art. In Berlin, they weigh the burdens of history. In the glow of the Chartres windows, they explore the stations of life. In Deauville, they fondly recall their youthful love. At "E," Ambrose adjusts his long-drafted itinerary, crossing out Elba and replacing it with the Eiffel Tower of Zipper's beloved Paris, the city of their first predestined encounter. While resting in Florence beside the youthfully vital David, they meet a chivalrous old man who shares his insight into enduring romance. It is in Giza that Ambrose begins to falter as he climbs a pyramid, and they miss Haifa thanks to a sandstorm. In Istanbul, they realize that Ambrose can go no further and they must return to their London terrace. But their voyage is not over. The two continue their odyssey, no longer via plane and rail, but now through the power of shared desire and love. In the tradition of romantic

legend and fable, *The End of the Alphabet* is a lovingly rendered, richly nuanced treatise on the nature of true and enduring love. The story of Ambrose and Zappora is a precious gift, one that illuminates a pathway to the return of balance and joy after unthinkable loss.

How to Probate an Estate Alternet Books
First published in 1999. Small businesses now constitute the most dynamic element of

growth in the emerging markets of the Central and Eastern European region. This book argues that the small and medium sized enterprise (SME) sector has contributed more to the growth of these countries in transition than have privatized state enterprises and the public sector. In 1989 most of the countries of Eastern and Central Europe were still under an economic system dominated by state-owned enterprises. Since then a process of liberalization has been unleashed to promote free market policies. This has involved programs of privatization and restructuring of public enterprises, as well as the promotion of policies to enable a private sector to develop. Small businesses are creating thousands of new jobs while large companies are "retrenching and downsizing" their work force. In some countries of the region this process is much further along than in others. However, the SME sector has developed at a more rapid pace than has the privatization of the large public companies. There has been a flurry of new enterprises springing up throughout the region which are "trickling up" in a frequently hostile environment against tremendous odds, and yet managing to have a pronounced impact on their respective economies. Small businesses have taken over in sectors that used to be dominated by big enterprises, primarily in services and consumer products. They have provided a crucial outlet for pent-up entrepreneurial talent that had remained

dormant during the long period of state domination. This work urges legislators, policy-makers, and development agencies alike to take account of the importance of the SME's in their legislation and planning. Given a more favorable environment, these small businesses will provide even greater impetus for economic growth. Equally important is for entrepreneurs themselves to be convinced of the rightness of their path in societies that have traditionally looked down upon profit-seekers as unscrupulous and selfish. If the CEE region is to achieve its full potential of economic growth, policies and support mechanisms to promote the SME sector will be needed to assure a favorable environment.
