The wild turkey is an iconic game bird with a long history of association with humans. Texas boasts the largest wild turkey population in the country. It is the only state where one can find native populations

of three of the five subspecies of wild turkeys—the Eastern wild turkey (*Meleagris gallopavo silvestris*), the Rio Grande wild turkey (*M. g. intermedia*), and the Merriam's wild turkey (*M. g. merriami*). Bringing together experts on game birds and land management in the state, this is the first book in Texas to synthesize the most current information about ecology and management focused exclusively on these three subspecies. *Wild Turkeys in Texas* addresses important aspects of wild turkey

ecology and management in Texas, but its principles are applicable anywhere Eastern, Rio Grande, or Merriam's turkeys exist. This book marks the continuation of one of the biggest success stories in the research, restoration, and management of the wild turkey in North America.

In *A Bigger Picture*, the bestselling political memoir of 2020, Malcolm Turnbull, Australia's 29th prime minister,

tells the remarkable story of his life. Now in paperback, this edition is updated with an all-new foreword by the author that sheds light on the huge political and cultural changes happening today. When Malcolm Turnbull took over the nation's top job there was a sense of excitement in Australia. Sky-high opinion polls followed as the political outsider with a successful business, legal and media career took charge. The infighting that had dogged politics for the best part of a decade looked to be over. But a right-wing insurgency brutally cut down Turnbull's time in office after three years, leaving many Australians asking, 'Why?' Exceptionally candid and compelling, A Bigger Picture is the definitive narrative of Malcolm Turnbull's prime ministership. He describes how he legalised same-sex marriage, established Snowy Hydro 2.0, stood up to Donald Trump, and many more achievements - remarkable in their pace and significance, and delivered in the teeth of so much opposition. But it's far more than just politics. Turnbull's life has been filled

with colourful characters and controversies, success and failure. From his early years in Sydney, growing up with a single father, to defending 'Spycatcher' Peter Wright against the UK government; the years representing Kerry Packer, leading the Republican Movement and making millions in business; and finally toppling Tony Abbott to become prime minister of

Australia. For the first time he tells it all - in his own words. With revelatory insights on the workings of Canberra and the contentious events of Turnbull's life, A Bigger Picture explores the strengths and vulnerabilities of one of Australia's best-known and most dynamic business and political leaders. Lyrically written in highly readable and

entertaining prose, this is a genuine page-turner that's not just for political junkies. The Upland and Webless Migratory Game Birds of Texas Texas A&M University Press
Rose is a princess, a Cinder, and half-human. She is the last one born of her kind, and on her twenty-first birthday, she must enter the woods and travel to find her Prince, as her sisters did before her. "... And we will all dance at the Grand Ball,"

her sisters would always say. But the Human servants are keeping a secret that could prevent the Cinders from reaching their Happily Ever After....Hidden in Rose's dreams and vision are the answers of the past between Cinders and Humans, and she is quickly running out of time trying to solve their hidden messages. She knows the answer lies in her first clue--identifying an animal she has never seen before--that persistent vision of a furry white animal, holding a gold metal object

and exclaiming, "Oh dear! Oh dear! I shall be too late!" While We Were Watching Downton Abbey Texas A&M University Press Colombia's status as the fourth largest nation in Latin America and third most populous—as well as its largest exporter of such disparate commodities as emeralds, books, processed cocaine, and cut flowers—makes this, the first history of

Colombia written in English, a much-needed book. It tells the remarkable story of a country that has consistently defied modern Latin American stereotypes—a country where military dictators are virtually unknown, where the political left is congenitally weak, and where urbanization and industrialization have spawned no lasting populist movement. There is more to Colombia than the drug

trafficking and violence that have recently gripped the world's attention. In the face of both cocaine wars and guerrilla conflict, the country has maintained steady economic growth as well as a relatively open and democratic government based on a two-party system. It has also produced an impressive body of art and literature. David Bushnell traces the process of state-building in Colombia

from the struggle for independence, territorial consolidation, and reform in the nineteenth century to economic development and social and political democratization in the twentieth. He also sheds light on the modern history of Latin America as a whole. Morocco Overland Signet Book
In his cultural analysis of the motor car in Germany, Wolfgang Sachs starts from the

assumption that the automobile is more than a means of transportation and that its history cannot be understood merely as a triumphant march of technological innovation. Instead, Sachs examines the history of the automobile from the late 1880s until today for evidence on the nature of dreams and desires embedded in modern culture. Written in a lively style and

illustrated by a wealth of cartoons, advertisements, newspaper stories, and propaganda, this book explores the nature of Germany's love affair with the automobile. A "history of our desires" for speed, wealth, violence, glamour, progress, and power—as refracted through images of the automobile—it is at once fascinating and provocative. Sachs recounts the

development of the automobile industry and the impact on German society of the marketing and promotion of the motor car. As cars became more affordable and more common after World War II, advertisers fanned the competition for status, refining their techniques as ownership became ever more widespread. Sachs concludes by demonstrating that the triumphal procession of

private motorization has in fact become an intrusion. The grand dreams once attached to the automobile have aged. Sachs appeals for the cultivation of new dreams born of the futility of the old ones, dreams of "a society liberated from progress," in which location, distance, and speed are reconceived in more appropriately humane dimensions.
