This textbook provides an introduction to digital forensics, a rapidly evolving field for solving crimes. Beginning with the basic concepts of computer forensics, each of the book's 21 chapters focuses on a particular forensic topic composed of two parts: background knowledge and hands-on experience through practice exercises. Each theoretical or background section concludes with a series of review questions, which are prepared to test students' understanding of the materials, while the practice exercises are intended to afford students the opportunity to apply the concepts introduced in the section on background knowledge. This experience-oriented textbook is meant to assist students in gaining a better understanding of digital forensics through hands-on practice in collecting and preserving digital evidence by completing various exercises. With 20 student-directed, inquiry-based practice exercises, students will better understand digital forensic concepts and learn digital forensic investigation techniques. This textbook is intended for upper undergraduate and

graduate-level students who are taking digital-forensic related courses or working in digital forensics research. It can also be used by digital forensics practitioners, IT security analysts, and security engineers working in the IT security industry, particular IT professionals responsible for digital investigation and incident handling or researchers working in these related fields as a reference book.

The Third Edition of *Police & Society* offers a comprehensive introduction to policing in the United States. Author Roy Roberg is joined by prominent policing scholars Kenneth Novak and Gary Cordner. Their thoroughly revised text is both descriptive and analytical in nature--covering the process of policing, police behavior, organization, operations, and historical perspectives. To adequately explain the complex nature of police operations in a democracy, the authors have integrated the most important theoretical foundations, research findings, and contemporary practices in a comprehensible, yet analytical, manner. Contemporary issues and future prospects of policing are fully addressed. The text features an emphasis on the relationship between the police and the community--as well as how this relationship has evolved over time. The impact of this evolution on current police practices, especially with respect to community policing and policing in the post-9/11 era, is explored. The new edition has been substantially updated and revised, with four new or significantly revised chapters: "Community Policing," "Legal Issues," "Higher Education," and "Contemporary and Emerging Issues." Importantly, new "Voices From the Field" boxes have been added to each chapter. Here, nationally known police officials provide their insights into contemporary police practices and problems in a thought-provoking format. This book discusses global mobile satellite communications (GMSC) for maritime, land (road and rail), and aeronautical applications. It covers how these enable connections between moving objects such as ships, road and rail vehicles and aircrafts on one hand, and ground telecommunications subscribers through the medium of communications satellites, ground earth stations, Terrestrial Telecommunication Networks (TTN), Internet Service Providers (ISP) and other wireless and landline telecommunications providers. The new edition covers new developments and initiatives that have resulted in land and aeronautical applications and the introduction of new satellite constellations in non-geostationary orbits and projects of new hybrid satellite constellations. The book presents current GMSC trends, mobile system concepts and network architecture using a simple mode of style with understandable technical information, characteristics, graphics, illustrations and mathematics equations. It represents telecommunications technique and technology, which can be useful for all technical staff on vessels at sea and rivers, on all types of land vehicles, on planes, on off shore constructions and for everyone possessing satellite communications handset phones. The first edition of Global Mobile Satellite Communications (Springer, 2005) was split into two books for the second edition – one on applications and one on theory. To help the researcher understand why and how children react to adults who are doing ethnographic research, Fine and Sandstrom explore the methodological and ethical problems of qualitative research with minors. They correct numerous fallacies held by researchers that children think like adults and that they cannot hide their thoughts and feelings from adults, especially strangers. Recognizing that age is an important determinant of children's response, they discuss problems and present strategies for conducting research with three age groups of children: preschool children (4 to 6 year olds), preadolescents (10 to 12) and middle adolescents (14 to 16). This is the first major methodological statement on doing participant observation work w

Love Is A Decision John Wiley & Sons

Each day we deal with the challenges of ordinary life: a series of mundane experiences that could be summarized by the title of this book, *Work, Sex, Money*. We all hope that these aspects of our life will be a source of fulfillment and pleasure, and they often are. Yet they are also always sources of problems for which we seek practical advice and solutions. The best prescription, according to Chögyam Trungpa, is a dose of reality and also a dose of respect for ourselves and our world. His profound teachings on work, sex, and money celebrate the sacredness of life and our ability to cope with its twists and turns with dignity, humor, and even joy. He begins by breaking down the barrier between the spiritual and the mundane, showing that work, sex, and money are just as much a part of our spiritual life as they are a part of our everyday existence. He then discusses these subjects in relation to ego and self-image, karma, mindfulness, and meditation.

"Work" includes general principles of mindfulness and awareness in how we conduct everyday life as well as discussion of ethics in business and the workplace. "Sex" is about relationships and communication as a whole. "Money" looks at how we view the economics of livelihood and money as "green energy" that affects our lives. The result is an inclusive vision of life, one that encompasses the biggest issues and the smallest details of every day. There are, in fact, few definitive answers in these pages. There is, however, authentic wisdom providing us with tools we need to work with the toughest stuff in our lives.

We had to do it. We had to reprint this book. Rarely has a book had such an impact on so many of us here at Ignatius Press. It is one of the most powerful and moving books we have come across. If you can only buy one book this season, this must be the one. Here is the astonishing true story of the harrowing experiences of a young German seminarian drafted into Hitler's dreaded

SS at the onset of World War II. Without betraying his Christian ideals, against all odds, and in the face of Evil, Gereon Goldmann was able to complete his priestly training, be ordained, and secretly minister to German Catholic soldiers and innocent civilian victims caught up in the horrors of war. How it all came to pass will astound you. Father Goldmann tells of his own incredible experiences of the trials of war, his many escapes from almost certain death, and the diabolical persecution that he and his fellow Catholic soldiers encountered on account of their faith. What emerges is an extraordinary witness to the workings of Divine Providence and the undying power of love, prayer, faith, and sacrifice.
