JACK LONDON (1876-1916), American novelist, born in San Francisco, the son of an itinerant astrologer and a spiritualist mother. He grew up in poverty, scratching a living in various legal and illegal ways - robbing the oyster beds, working in a canning factory and a jute mill, serving aged 17 as a common sailor, and taking part in the Klondike gold rush of 1897.

This various experience provided the material for his works, and made him a socialist. "The son of the Wolf" (1900), the first of his collections of tales, is based upon life in the Far North, as is the book that brought him recognition, "The Call of the Wild" (1903), which tells the story of the dog Buck, who, after his master's death, is lured back to the primitive world to lead a wolf pack. Many other tales of struggle, travel, and adventure followed, including "The Sea-Wolf" (1904), "White Fang" (1906), "South Sea Tales" (1911), and "Jerry of the South Seas" (1917). One of London's most interesting novels is the semi-autobiographical "Martin Eden" (1909). He also wrote socialist treatises, autobiographical essays, and a good deal of journalism.

Colombia's status as the fourth largest nation in Latin America and third most populous—as well as its largest exporter of such disparate commodities as emeralds, books, processed cocaine, and cut flowers—makes this, the first history of Colombia written in English, a much-needed book. It tells the remarkable story of a country that has consistently defied modern Latin American stereotypes—a country where military dictators are virtually unknown, where the political left is congenitally weak, and where urbanization and industrialization have spawned no lasting populist movement. There is more to Colombia than the drug trafficking and violence that have recently gripped the world's attention. In the face of both cocaine wars and guerrilla conflict, the country has maintained steady economic growth as well as a relatively open and democratic government based on a two-party system. It has also produced an impressive body of art and literature. David Bushnell traces the process of state-building in Colombia from the struggle for independence, territorial consolidation, and reform in the

nineteenth century to economic development and social and political democratization in the twentieth. He also sheds light on the modern history of Latin America as a whole.

Music Saved Them, They Say: Social Impacts of Music-Making and Learning in Kinshasa (DR Congo) explores the role music-making has played in community projects run for young people in the poverty-stricken and often violent surroundings of Kinshasa, the capital city of the Democratic Republic of the Congo. The musicians described here – former gang members and so-called "witch children" living on the streets – believe music was vital in (re)constructing their lives. Based on fieldwork carried out over the course of three-and-a-half years of research, the study synthesizes interviews, focus group sessions, and participant observation to contextualize this complicated cultural and social environment. Inspired by those who have been "saved by music", Music Saved Them, They Say seeks to understand how structured musical practice and education can influence the lives of young people in such difficult living conditions, in Kinshasa and beyond. "... a tribute to the persistence, engagement and courage of the people in these projects, who can be proud that their work is now exposed to a global audience, not just of researchers but also to practitioners around the world who could learn from and be inspired by these hitherto unknown projects." —John Sloboda, Research Professor, Guildhall School of Music & Drama "This book is very

moving but never sentimental, one of the best accounts of music's real transformative capacities that I have come across." —Lucy Green, Emerita Professor of Music Education, University College London Institute of Education
