Innovate or die For thirty years, Gary Shapiro has observed the world's most innovative businesses from his front-row seat as leader of the Consumer Electronics Association. Now he reveals the ten secrets of "ninja innovators" like Apple, Amazon, Google, Microsoft, and many others. What does it take to succeed? Discipline. Mission-oriented strategy. Adaptability. Decisiveness. And a will for victory. In short, today's most successful businesses are "ninja innovators." Drawn from Gary Shapiro's three decades of experience leading the consumer electronics industry, Ninja Innovation takes readers behind the scenes of today's top enterprises, uncovering their ten essential strategies for success. As head of the Consumer Electronics Association and its influential annual trade show, the International CES, Shapiro has worked with the most innovative companies in history—Intel, IBM, and Samsung, to name a few—focusing on creating policies and events that produce revolutionary products year after year. He has learned the key strategies that have guided these businesses to record-breaking profits, as well as the traps that have led so many others to crushing failure. In order to stay in front of the pace of innovation, Shapiro observes, top companies must operate as an elite strike force—just like the legendary medieval warriors known as ninjas. Ninjas weren't called upon to do the ordinary; they had to perform truly extraordinary tasks, while risking everything. As a highly trained martial-arts black belt himself, Shapiro mines the valuable insights of these centuries-old warriors to spotlight the secrets of agility, creativity, decisiveness, and reinvention that are essential for twenty-first-century leaders seeking breakthrough success. Taking readers inside the most cutting-edge businesses, Ninja Innovation is the ultimate guide to achieving victory in today's innovate-or-die economy.

Getting Into a Residency Peachpit Press

First published in 1999. Small businesses now constitute the most dynamic element of growth in the emerging markets of the Central and Eastern European region. This book argues that the small and medium sized enterprise (SME) sector has contributed more to the growth of these countries in transition than have privatized state enterprises and the public sector. In 1989 most of the countries of Eastern and Central Europe were still under an economic system dominated by state-owned enterprises. Since then a process of liberalization has been unleashed to promote free market policies. This has involved programs of privatization and restructuring of public enterprises, as well as the promotion of policies to enable a private sector to develop. Small businesses are creating thousands of new jobs while large companies are "retrenching and downsizing" their work force. In some countries of the region this process is much further along than in others. However, the SME sector has developed at a more rapid pace than has the privatization of the large public companies. There has been a flurry of new enterprises springing up throughout the region which are "trickling up" in a frequently hostile environment against tremendous odds, and yet managing to have a pronounced impact on their respective economies. Small businesses have taken over in sectors that used to be dominated by big enterprises, primarily in services and consumer products. They have provided a crucial outlet for pent-up entrepreneurial talent that had remained dormant during the long period of state domination. This work urges legislators, policy-makers, and development agencies alike to take account of the importance of the SME's in their legislation and planning. Given a more favorable environment, these small businesses will provide even greater impetus for economic growth. Equally important is for entrepreneurs themselves to be convinced of the rightness of their path in societies that have traditionally looked down upon profit-seekers as unscrupulous and selfish. If the CEE region is to achieve its full potential of economic growth, policies and support mechanisms to promote the SME sector will be needed to assure a favorable environment.
