" Definitely, a game changer! Design experience is the power shift to our era what mass marketing was to the last century. " John Sculley former CEO, Pepsi and Apple " Great design is about creating a deep relationship with your customers. If you don't, you're roadkill. This book shows you how and much, much more. Be prepared to have your mind blown. " Bill Burnett Executive Director, Design Program, Stanford University " Design is the last great differentiator, and yet so few really understand it. Do You Matter? offers a marvelous series of direct, in-your-face observations and drives home the means to an absolutely integrated design strategy. " Ray Riley Design GM, Entertainment and Devices, Microsoft " This book will challenge you to ask and answer what arguably are the most important questions an executive can ponder today. So open up. " Noah Kerner CEO, Noise and coauthor, Chasing Cool More and more companies are coming to understand the competitive advantage offered by outstanding design. With this, you can create products, services, and experiences that truly matter to your customers' lives and thereby drive powerful, sustainable improvements in business performance. But delivering great designs is not easy. Many companies accomplish it once, or twice; few do it consistently. The secret: building a truly design-driven business, in which design is central to everything you do. Do You Matter? shows how to do precisely that. Legendary industrial designer Robert Brunner (who laid the groundwork for Apple's brilliant design language) and Stewart Emery (Success Built to Last) begin by making an incontrovertible case for the power of design in making emotional connections, deepening relationships, and strengthening brands. You'll learn what it really means to be "design-driven" and how that translates into action at Nike, Apple, BMW and IKEA. You'll learn design-driven techniques for managing your entire experience chain; define effective design strategies and languages; and learn how to manage design from the top, encouraging "risky" design innovations that lead to entirely new markets. The authors show how (and how not) to use research; how to extend design values into marketing, manufacturing, and beyond; and how to keep building on your progress, truly "baking"

design into all your processes and culture.

Cognitive aspects of the translation process have become central in Translation and Interpreting Studies in recent years, further establishing the field of Cognitive Translatology. Empirical and interdisciplinary studies investigating translation and interpreting processes promise a hitherto unprecedented predictive and explanatory power. This collection contains such studies which observe behaviour during translation and interpreting. The contributions cover a vast area and investigate behaviour during translation and interpreting – with a focus on training of future professionals, on language processing more generally, on the role of technology in the practice of translation and interpreting, on translation of multimodal media texts, on aspects of ergonomics and usability, on emotions, self-concept and psychological factors, and finally also on revision and post-editing. For the present publication, we selected a number of contributions presented at the Second International Congress on Translation, Interpreting and Cognition hosted by the Tra&Co Lab at the Johannes Gutenberg University of Mainz.

“ The natural world, as we call it, has already become remote, out of reach, mysterious, in the minds of urban and suburban Americans. They see the wilderness disappearing, slipping away, receding into an inaccessible past. But they are mistaken. That world can still be rescued... that is my main excuse for this book. ” —Edward Abbey You are about to visit some of the most exciting places on earth. Not the sort of excitement that makes morning headlines or the nightly news. Instead it is the excitement that comes from experiencing the natural world as it always has been and should be, and seeing human beings living in tune with its subtlest rhythms. In Australian cattle country and in the primitive outback. On a desert island off Mexico and in the Sierra Madres. On the Rio Grande and in the great Southwest. On Lake Powell in Utah and in the living American desert. It is adventure. It is enlightenment. It is vintage Abbey. “ I have been along a few of Mr. Abbey ’ s roads. He sees much more than I did. Indeed, reading him is often better than being there was. ” —John Leonard, author of Reading for My Life
