Ripped from his motorcycle by Colombian rebels and robbed of everything, adventure motorcyclist Glen Heggstad journeyed through South America, and the trip became a nightmare as he was forced to march through strange jungles carrying heavy equipment with assault

rifles at his back. Even with all the hand-to-hand and sophisticated combat training Heggstad possessed, this chronicle shows that it was his shrewd thinking, precise planning, and a "do-or-die" last act of desperation that eventually secured his freedom. The shocking personal tale of an unimaginable journey through Central and South America, this travelogue details one man's capture by Colombia's rebel National Liberation Army and the eventual realization of his dream to complete his journey.

In his cultural analysis of the motor car in Germany, Wolfgang Sachs starts the assumption that the automobile is more than a means of transportation and that its history cannot be understood merely as a triumphant march of technological innovation. Instead, Sachs examines the history of the automobile the late 1880s until today for evidence on the nature of dreams and desires embedded in modern culture. This book explores the nature of Germany's love affair with the automobile. A "history of our desires" for speed, wealth, violence,

glamour, progress, and power--as refracted through images of the automobile--it is at once fascinating and provocative. -- Sachs recounts the development of the automobile industry and the impact on German society of the marketing and promotion of the motor car. As cars became more affordable and more common after World War II, advertisers fanned the competition for status, refining their techniques as ownership became ever more widespread. Sachs concludes by demonstrating that the triumphal procession of private motorization has in fact become an intrusion. The grand dreams once attached to the automobile have aged. Sachs appeals for the cultivation of new dreams born of the futility of the old ones, dreams of "a society liberated progress," in which location, distance, and speed are reconceived in more appropriately humane dimensions.

The Joint Committee on Human Rights examined the implementation of the UN International Covenant on Economic, Social and Cultural Rights in the UK. Domestic legislation protects many of the economic, social and cultural rights, with the Covenant itself having little impact in UK domestic law. The Committee

believes that there is scope for incorporating further protection of rights in the UK, by enshrining some of the guarantees contained in the Covenant. Further, that for the Covenant rights to be effective, they should be part of a framework for government policy development, and that Government along with the Commission for Equality and Human Rights should develop ways of measuring the progress of these rights. The Committee also recommends, that explanatory notes to Bills, should include discussion of the Bills compatibility with Covenant rights, which is a way of enhancing the scrutiny of proposed Government legislation. Furthermore, the Committee recommends the introduction of an Equality Bill, to address the concerns of discrimination faced by ethnic minorities and persons with disabilities in employment, housing and education.

Down to Earth presents the first comprehensive overview of the

geopolitical maneuvers, financial investments, technological innovations, and ideological struggles that take place behind the scenes of the satellite industry. Satellite projects that have not received extensive coverage—microsatellites in China, WorldSpace in South Africa, SiriusXM, the failures of USA 193 and Cosmos 954, and Iridium—are explored. This collection takes readers on a voyage through a truly global industry, from the sites where satellites are launched to the corporate clean rooms where they are designed, and along the orbits and paths that satellites traverse. Combining a practical introduction to the mechanics of the satellite industry, a history of how its practices and technologies have evolved, and a sophisticated theoretical analysis of satellite cultures, *Down to Earth* opens up a new space for global media studies.

Digital Photography and Everyday Life: Empirical studies on material visual practices explores the role that digital photography plays within everyday life. With contributors from ten different countries and backgrounds in a range of academic disciplines - including anthropology, media studies and visual culture - this collection takes a uniquely broad perspective on photography by situating the image-making process in wider discussions on the materiality and visuality of photographic practices and explores these through empirical case studies. By focusing on material visual practices, the book presents a comprehensive overview of some of the main challenges digital photography is bringing to everyday life. It explores how the digitization of photography has a wide-reaching impact on the use of the medium, as well as on the kinds of images that can be produced and the ways in which camera technology is developed. The exploration goes beyond mere images to think about cameras, mediations and technologies as key elements in the

development of visual digital cultures. *Digital Photography and Everyday Life* will be of great interest to students and scholars of Photography, Contemporary Art, Visual Culture and Media Studies, as well as those studying Communication, Cultural Anthropology, and Science and Technology Studies.
