## Gas Membrane Installation – How To Install Radon Gas Barriers

Your gas bottles must be sited against a wall or building structure with at least 30 minutes fire resistance. They must be positioned on firm, level ground in a well-ventilated area, where they are reasonably protected from accidental damage or interference, and remain accessible at all times.

In this guide, we provide some background information on ground gases, the gas barrier options available and instructions on how to install gas membranes in a property. Protection from Ground Gases Ground gases is a term that refers to gases found across the UK and Ireland in the spaces that exist around soil particles (pore spaces).
