This book Al-Dafour in GAT is to prepare students for GAT test and to help them to get high score in the GAT test. It is a studying action plan for teachers, parents, and students. I have built this book on three pillars: explanations for each topic, new problem's ideas on each topic, and the past papers (Taj me'at) on each topic. This book is a 4- or 10-weeks studying action plan. For the high-level students, they can move direct to the 4 weeks studying action plan by solving the practice tests. For the middle or low-level students, they should follow the 13 weeks action plan. The 10-weeks Studying action plan is divide into two parts as follow:
Part 1: Week1 has two topics: sets of numbers and fractions. Week2 has three topics: Decimals, patterns-sequences, and averages-mode-median. Week3 has three topics: ratio-proportion, percentage, and algebraic expressions. Week4 has four topics: linear equations, quadratic equations, absolute value equations, and radical equations. Week5 has three topics: exponential equations, rational equations, and inequalities. Part 2: Week6 has three topics: functions, simultaneous equations, and life applications (ages' problems, time-distance problems, and time-work problems). Week7 has three topics: angles relationships, triangle relationships, and circle theorems. Week8 has three topics: coordinate geometry, special polygons, and circle-clock. Week9 has three topics: Geometric solids, sets and probability, and data representation. In weeks 10, there are 15 practice tests which are prepared from the past papers (Taj me'at). This book is expected to be milestone and a great help to our dear students, for its compressive free of long-winded explanations, and continues lots of exercises. Willing all my dear students best of luck for the GAT exams. Hassan A. Shoukr

Excel Test Skills - General Ability Tests Year 3 is the first in a four-book series for Years 3-6 which help students with the skills they need to excel in general ability tests. General ability testing covers areas such as logic, general knowledge and reasoning, and forms part of many primary school tests used throughout Australia. The book contains: sample questions covering all the main question types found in Year 3 general ability tests a section of practice questions with hints on how to answer each different type of question twelve practice tests to measure progress helpful advice for sitting general ability tests answers to all questions, plus explanations when required An amount of mystery surrounds general ability testing. This is probably because it is not an actual subject such as Science or Mathematics. General ability testing is based upon the student's ability to think and reason, but most of the questions are based on normal classroom subject matter. This practice book is intended to demystify GA tests, thereby giving the student the confidence to respond positively to the test and maximise his/her score.

This accessible book outlines the key ingredients of psychological assessment and provides case studies to illustrate their application, making this an ideal textbook for courses on psychometrics or psychological assessment. The book covers the nature of assessment, basic components, how tests are made, underlying statistics, reliability and validity, assessment of intelligence, abilities and personality, non-psychometric approaches, as well as ethical and professional issues and modern developments. A final chapter explains how readers can construct their own tests. Wide-ranging case studies demonstrate the variety of contexts in which assessment is conducted. The author's clarity of writing and use of practical examples throughout helps students apply these methods in practice with confidence as part of their studies on an array of courses.
