Hugo and Shirley Jackson award-winning Peter Watts stands on the cutting edge of hard SF with his acclaimed novel, *Blindsight* Two months since the stars fell... Two months of silence, while a world held its breath. Now some half-derelict space probe, sparking fitfully past Neptune's orbit, hears a whisper from the edge of the solar system: a faint signal sweeping the cosmos like a lighthouse beam. Whatever's out there isn't talking to us. It's talking to some distant star, perhaps. Or perhaps to something closer, something en route. So who do you send to force introductions with unknown and unknowable alien intellect that doesn't

wish to be met? You send a linguist with multiple personalities, her brain surgically partitioned into separate, sentient processing cores. You send a biologist so radically interfaced with machinery that he sees x-rays and tastes ultrasound. You send a pacifist warrior in the faint hope she won't be needed. You send a monster to command them all, an extinct hominid predator once called vampire, recalled from the grave with the voodoo of recombinant genetics and the blood of sociopaths. And you send a synthesist—an informational topologist with half his mind gone—as an interface between here and there. Pray they can be trusted with the fate of a world. They may be more alien than the thing they've been sent to find. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Clausewitz observed of Russia that "it was a country which could be subdued only by its own weakness and by the effects of internal dissension. In order to strike these vulnerable spots of its body politic, Russia would have to be agitated at the very center." In reading this study, the military student will realize how dearly the Germans had to pay for ignoring Clausewitz's advice. The purpose of this study is to describe German planning and operations in the first part of the campaign against Russia. The narrative starts with Hitler's initial

plans for an invasion of Russia and ends at the time of Germany's maximum territorial gains during the battle for Stalingrad. The material for this study was obtained from Germany military records now in the custody of The Adjutant General, Department of the Army. Monographs by former German general officers who had an active part in the planning and operations provided additional information. The authors of these monographs, prepared for the Historical Division, United States Army, Europe, include Generaloberst Franz Halder, Chief of Staff of the German Army from 1938-1942; Generaloberst Gotthard Heinrici, a former corps, army, and group commander on the Russian front; and several others. The study was written by George E. Blau of the Special Studies Division, Office of the Chief of Military History. In his presentation, the author made every effort to give an objective account of Germany's initial efforts to conquer Soviet Russia in World War II.
