The president of Southern Seminary reveals how secularism has infiltrated every aspect of society and how Christians, equipped with the gospel of Jesus Christ, can meet it head on with hope, confidence, and steadfast conviction. A Storm Is Coming Western civilization and the Christian church stand at a moment of great danger. Facing them both is a hurricane-force battle of ideas that will determine the future of Western civilization and the soul of the Christian church. The forces arrayed against the West and the church are destructive ideologies, policies, and worldviews deeply established among intellectual elites, the political class, and our schools. More menacingly, these forces have also invaded the Christian church. The perils faced by the West and the church are unprecedented: threats to religious liberty redefinitions of marriage and family attacks on the sacredness and dignity of human life How should Christians respond to this multifaceted challenge? Addressing each dimension of this challenge, *The Gathering Storm* provides answers and equips Christians both to give an answer for the hope that is within them and to contend for the faith that was once and for all delivered to the saints.

On October 26, 1994, Morris Dees wrote Attorney General Janet Reno to alert her to the danger posed by the growing number of radical militia groups. He warned the Attorney General that the "mixture of armed groups and those who hate is a recipe for disaster." This was six months before the Oklahoma City bombing. In *Gathering Storm*, he tells for the first time why he decided to alert the Attorney General and why the danger of serious domestic terrorism still exists. The militia movement we saw so much about immediately after the Oklahoma City bombing was not a spontaneous grassroots uprising of men angry at big government but, as Dees shows, a well-organized effort by some of America's most dangerous far-right extremists. Its goal is to destabilize our democracy through domestic terrorism. Few are more qualified to expose the militia network and its close cousin, the Christian patriots, than Dees. Dees points out that the Oklahoma City tragedy was not an isolated event. He connects together a series of violent acts and plans promoted by militia groups and small secret "patriot" cells since the early 1980s. Many, he says, have ties to sources of political power in state houses and in Washington. Dees names names, gives places and details events that could prove embarrassing to some.

In *The Kennedys Amidst the Gathering Storm*, Will Swift presents a fresh, empathetic interpretation of the ambassadorship of Joseph Kennedy and explores the intricate, often shifting relationships among Kennedy, Chamberlain, Churchill, and, of course, Roosevelt. Arriving in London in early 1938, the Irish-Catholic Kennedys were welcomed by politicians, aristocrats, and intellectuals, all eager to court America. They finally appeared to have overcome their lifelong status as outsiders. From 1938 to 1940, the Kennedys crystallized their identity as protagonists on the world stage, making public the competitive and clannish intrafamily dynamics that would fuel their mythic rise to power. They all learned from their father's successes—and failures. The older children—Joe Jr., Jack, and Kathleen—took an active part in England's glittering, "last fling before the bombs fall" society, but all nine children charmed, their every move chronicled by the British and American media. John F. Kennedy's path to the White House began in London. As his father's political fortunes dimmed, Jack published a best-selling book and his star rose. Drawing on recently released Kennedy family archives, Joseph P. Kennedy's private papers, and using rare photographs of English society and the photogenic Kennedy clan, Dr. Swift, with penetrating psychological insight, brings to life this fascinating family during a dramatic one thousand day period.

Is the United States in danger of losing its competitive edge in science and technology "S & T"? In response to this concern, the Under Secretary of Defense for Personnel and Readiness asked RAND to convene a meeting, held on November 8, 2006, to review evidence presented by experts from academia, government, and the private sector. The papers presented at the meeting addressed a wide range of issues surrounding the United States' current and future S & T competitiveness, including science policy, the quantitative assessment of S & T capability, globalization, the rise of Asia "particularly China and India", innovation, trade, technology diffusion, the increase in foreign-born S & T students and workers in the United States, new directions in the management and compensation of federal S & T workers, and national security and the defense industry. These papers provide a partial survey of the facts, challenges, and questions posed by the potential erosion of U.S.S & T capability. The importance of S & T to U.S. prosperity and security warrants that policymakers pay careful attention to the various high-level reports issued over the past ve years that warn of pressures on the U.S. lead in S & T. The intellectual point of embarkation for the RAND meeting was the foremost recent such report, *Rising Above the Gathering Storm: Energizing and Employing America for a Brighter Economic Future*, by the National Academy of Sciences. *Energizing and Employing America for a Brighter Economic Future* Harper Collins
In order for the United States to maintain the global leadership and competitiveness in science and technology that are critical to achieving national goals, we must invest in research, encourage innovation, and grow a strong and talented science and technology workforce. Expanding Underrepresented Minority Participation explores the role of diversity in the science, technology, engineering and mathematics (STEM) workforce and its value in keeping America innovative and competitive. According to the book, the U.S. labor market is projected to grow faster in science and engineering than in any other sector in the coming years, making minority participation in STEM education at all levels a national priority. Expanding Underrepresented Minority Participation analyzes the rate of change and the challenges the nation currently faces in developing a strong and diverse workforce. Although

minorities are the fastest growing segment of the population, they are underrepresented in the fields of science and engineering. Historically, there has been a strong connection between increasing educational attainment in the United States and the growth in and global leadership of the economy. Expanding Underrepresented Minority Participation suggests that the federal government, industry, and post-secondary institutions work collaboratively with K-12 schools and school systems to increase minority access to and demand for post-secondary STEM education and technical training. The book also identifies best practices and offers a comprehensive road map for increasing involvement of underrepresented minorities and improving the quality of their education. It offers recommendations that focus on academic and social support, institutional roles, teacher preparation, affordability and program development.

Rising Above the Gathering Storm Two Years Later: Accelerating Progress Toward a Brighter Economic Future summarizes a convocation held in April 2008 to commemorate the release of the original *Gathering Storm* report. The convocation featured participation by Members of Congress, Cabinet Secretaries, leaders from industry and academia, and other experts. The discussions reviewed progress made thus far in implementing the *Gathering Storm* recommendations to strengthen K-12 education in math and science, research, higher education, and the environment for innovation. Participants also noted that much additional work is needed to ensure that America remains a leader in science and engineering in the long term.

Accelerating Progress Toward a Brighter Economic Future: Summary of a Convocation Games Workshop(uk)
In the face of so many daunting near-term challenges, U.S. government and industry are letting the crucial strategic issues of U.S. competitiveness slip below the surface. Five years ago, the National Academies prepared *Rising Above the Gathering Storm*, a book that cautioned: "Without a renewed effort to bolster the foundations of our competitiveness, we can expect to lose our privileged position." Since that time we find ourselves in a country where much has changed--and a great deal has not changed. So where does America stand relative to its position of five years ago when the *Gathering Storm* book was prepared? The unanimous view of the authors is that our nation's outlook has worsened. The present volume, *Rising Above the Gathering Storm, Revisited*, explores the tipping point America now faces. Addressing America's competitiveness challenge will require many years if not decades; however, the requisite federal funding of much of that effort is about to terminate. *Rising Above the Gathering Storm, Revisited* provides a snapshot of the work of the government and the private sector in the past five years, analyzing how the original recommendations have or have not been acted upon, what consequences this may have on future competitiveness, and priorities going forward. In addition, readers will find a series of thought- and discussion-provoking factoids--many of them alarming--about the state of science and innovation in America. *Rising Above the Gathering Storm, Revisited* is a wake-up call. To reverse the foreboding outlook will require a sustained commitment by both individual citizens and government officials--at all levels. This book, together with the original *Gathering Storm* volume, provides the roadmap to meet that goal. While this book is essential for policy makers, anyone concerned with the future of innovation, competitiveness, and the standard of living in the United States will find this book an ideal tool for engaging their government representatives, peers, and community about this momentous issue. The thrilling novel based on the bestselling video game *Resistance: Fall of Man* Great Britain. July 1951. Three years ago, Russia went dark. Nothing got in. Nothing got out. The world assumed it was political strife. But it was the Chimera: voracious extraterrestrial invaders. And in December 1949, they burst across the Russian border and poured into Europe. The luckiest humans died. The less fortunate succumbed to an alien virus—and changed. Within a year, most of Europe had fallen. Only Great Britain, after struggling desperately, had kept the conquerors at bay. But as the Chimera were repelled, they were evolving. Building. Planning. America. November 1952. The Chimera have crossed the Atlantic. Their lightning strikes on American borders are devastating. Cities are lost. Small towns overrun. Citizens transformed into monstrosities. Enter Lieutenant Nathan Hale, U.S. Ranger. A veteran of the Chimeran conflict, he is uniquely immune to the alien virus. And when regular troops can ’ t stem the Chimeran onslaught, Hale and his special-operations team meet the menace head-on. But while they battle the relentless Chimera, deadly power games rage in the White House. And when Hale discovers a far-reaching conspiracy, one with deadly consequences for the human race, his allegiance to country and mankind is stretched to the breaking point. In October 2005, the National Academy of Sciences, National Academy of Engineering, and Institute of Medicine released a policy report that served as a call to action. The report, *Rising Above the Gathering Storm: Energizing and Employing America for a Brighter Economic Future* observed that "the scientific and technological building blocks critical to the United States economic leadership are eroding at a time when many other nations are gathering strength." The report laid out 20 recommendations in four broad areas - K-12 education, science and engineering research, higher education, and economic and technology policy - and warned that a failure to take action could have dire economic consequences. *Rising Above the Gathering Storm* sparked intense discussion among policy makers,

industrial leaders, and the general public. Five years after the release of the Gathering Storm report, a second report, Rising Above the Gathering Storm, Revisited: Rapidly Approaching Category 5, assessed changes in America's competitive posture. This report concluded that "our nation's outlook has not improved, but rather has worsened" since the Gathering Storm report was released. The report noted examples of other nations that have upgraded their investments in education, technological infrastructure, and innovation systems to a greater extent than has the United States. The ability of the states to drive innovation was the impetus behind a major workshop held in Madison, Wisconsin, on September 20-22, 2011. Titled "Rising Above the Gathering Storm: Developing Regional Innovation Environments," the workshop brought together leaders in education, government, economic development, and industrial innovation to discuss state and regional initiatives to boost competitiveness through science, technology, and innovation. The conference was organized around four major themes: - Revitalizing K-12 Science and Mathematics Education - Strengthening Undergraduate Education in Science and Engineering - Building Effective Partnerships Among Governments, Universities, Companies, and Other Stakeholders - Fostering Regional Technology Development and Entrepreneurship

The purpose of this book is to signal the warning that a gathering storm is on the horizon. Events are leading us closer to the prophesied apostasy and the rapture of the church. In the growing darkened social and spiritual climate, Christians may face a deepening isolation and an outright denial of the opportunity to witness the saving grace of Christ Jesus. Churches may also begin to feel a sharp curtailment of ministry, especially in speaking against the moral evils of the culture. Not all of the chapters in this book are warning chapters, but together they are meant to lay out a mosaic of things to come. Some of those things have to do with what is taking place in the world, but other issues also point to drastic changes within the larger Evangelical culture.

1. Sixteen outstanding authors and scholars have come together to warn Christians that the storm prophesied in Scripture is on the horizon.

2. The majority of Evangelical seminaries are shifting away from the teaching of prophetic truth. Learn why in this book.

3. Why are truths like the rapture, the tribulation, and the kingdom reign of Christ being denied? This book is written to tell you.

4. In the growing denial of Bible prophecy, what can we expect next? As the November election of 2004 neared, America awakened and found itself split down the middle between two ideologies, between liberal and conservative, but more, between moral Christian values, and between humanistic and secular values. Never before has the nation been so divided in such a deep and devious way. Events that unfold and transpire past 2004 will tell us just how deep the split is in the psyche of the nation. But while America is coming to terms with a liberal agenda that is without doubt destructive, in Europe and Asia there is no division because Christian mores have nothing to do with what is taking place in those cultural and religious climates. Europe long ago repudiated the spiritual heritage left over from the Reformation. And it can be fair to say that the tombstone is about to be placed over the Christian influences that have so led this nation in the past. The changes are now coming so fast spiritually and morally that the entire social fabric of the country is about to tear and fragment. Here are some examples:

I In 1993 63% of Americans claimed to be Protestant, but unfortunately in that survey, Mormons and Jehovah Witnesses were included in the count. In 2002 the number saying they are Protestant Christians had dropped to 52%. Within a few years Protestants will be a minority in America! I In 2003 14% percent of Americans claimed to have no religion. I Up to 1993 Protestant denominations retained 90% of their congregants. The number now is 80%. It is admitted that because the mainline denominations are turning so quickly to liberalism, they are shrinking rapidly and may soon disappear altogether. The signs that the nation, and the world, is rapidly moving quickly to social and moral humanism are seen in the issues listed below on which Christian values no longer have an influence: Abortion Stem-cell research using aborted baby tissue Homosexual agendas Same-sex marriage Galloping socialism Euthanasia

While some argue that these issues are simply social shifts that will not sap the strength of the western nations, such rapid changes point to an outright repudiation of biblical morality. Then there is the Middle East and Israel. Evangelicals who hold strongly to what the Bible teaches about the end times, see prophetic patterns in the establishment of the nation of Israel along with the return of the Jewish people to the promised land, and the rise of militant Islam. The Middle East is a powder keg that could explode and draw into that area the entire world. Changes in Europe also point to prophetic signposts. Europe is now virtually a united one nation! It now uses a Euro-dollar, and has a sitting parliament with an elected president. It also is rapidly moving to a total economic inter-dependence. Many of these changes point clearly to the prophesied one-world government that will dominate the globe during the great seven-year tribulation period. I have assembled some close friends and outstanding spiritual scholars to write about the deepening moral darkness looming on the horizon of our world. I trust that what they have written will help believers in Christ to understand the times we live in, but too, to become more diligent about sharing the good news of salvation found only in the Lord Jesus Christ.

In a world where advanced knowledge is widespread and low-cost labor is readily available, U.S. advantages in the marketplace and in science and technology have begun to erode. A comprehensive and coordinated federal effort is urgently needed to bolster U.S. competitiveness and pre-eminence in these areas. This congressionally requested report by a pre-eminent committee makes four recommendations along with 20 implementation actions that federal policy-makers should take to create high-quality jobs and focus new science and technology efforts on meeting the nation's needs, especially in the area of clean, affordable energy:

1) Increase America's talent pool by vastly improving K-12 mathematics and

science education;

2) Sustain and strengthen the nation's commitment to long-term basic research;

3) Develop, recruit, and retain top students, scientists, and engineers from both the U.S. and abroad; and

4) Ensure that the United States is the premier place in the world for innovation. Some actions will involve changing existing laws, while others will require financial support that would come from reallocating existing budgets or increasing them. Rising Above the Gathering Storm will be of great interest to federal and state government agencies, educators and schools, public decision makers, research sponsors, regulatory analysts, and scholars.

Created in the Emperor's own image, the primarchs had long thought themselves to be princes of the universe and masters of their own destiny--they led the Space Marine Legions in glorious conquest of the galaxy, and no enemy of the Imperium could stand against them. However, even amongst this legendary brotherhood, the seeds of dissent has been sown long before the treacherous Warmaster Horus declared his grand heresy. Gathered within this anthology are four novellas focusing on some of the mightiest warriors and leaders that mankind has ever known--Fulgrim, Ferrus Manus, Lion El'Jonson and the twin primarchs Alpharious and Omegon--and the roles that they may have yet to play in war which threatens to change the face of the Imperium forever.
