Papua New Guinea is commonly thought to be a land without railways. At the very least, railways do not immediately come to mind as a topic for historical research in Papua New Guinea. Nevertheless, we set out to document and record something of the history of local railways in 1971, initially as individual projects. Inevitably, our interest in the topic of railways brought us together and we have been working collaboratively on our research since 1980. At first the task was to identify and document the railways which have operated in Papua New Guinea. To our surprise, we now have records of some 150 railway lines, many of them small hand-pushed operations from a jetty to a copra store or around a sawmill. Others have yielded fascinating stories of more substantial enterprises and the endeavours of colonial pioneers at the frontier. As we brought the material together we began to realise that

we not only had stories about small railway operations around the country, but we also had the basis for a new look at some basic elements of Papua New Guinea economic history. Through the story of railways we had identified important themes which helped us learn about the economic conditions of today from the experience of the past.

For courses in computer programming and engineering. This package includes MyProgrammingLab(tm) Beginner to Intermediate Programming in Java This book is designed to serve as a textbook and reference for programming in the Java language. Although it does include programming techniques, it is organized around the features of the Java language rather than any particular curriculum of programming techniques. The main audience is undergraduate students who have not had extensive programming experience with the Java language. The introductory chapters are written at a level that is accessible to beginners, while the boxed sections of those chapters serve to quickly introduce more experienced programmers to basic Java syntax. Later chapters are still designed to be accessible, but are written at a level suitable for students who have progressed to these more advanced topics. This package includes MyProgrammingLab, an online homework, tutorial, and assessment program designed to work with this text to engage students and improve results. Within its structured environment, students practice what they learn, test their understanding, and pursue a personalized study plan that helps them better absorb course material and understand difficult concepts. MyProgrammingLab should only be purchased when required by an instructor. Please be sure you have the correct ISBN and Course ID. Instructors, contact your Pearson representative for more information.

stroke and two-stroke areas of certification. These tests help the students prepare for EETC certification.

Nietzsche's Psychology of Ressentiment Columbia University Press

Ressentiment—the hateful desire for revenge—plays a pivotal role in Nietzsche’s *On the Genealogy of Morals*. Ressentiment explains the formation of bad conscience, guilt, asceticism, and, most importantly, it motivates the "slave revolt" that gives rise to Western morality’s values.

Ressentiment, however, has not enjoyed a thorough treatment in the secondary literature. This book brings it sharply into focus and provides the first detailed examination of Nietzsche’s psychology of ressentiment. Unlike other books on the *Genealogy*, it uses ressentiment as a key to the *Genealogy* and focuses on the intriguing relationship between ressentiment and justice. It shows how ressentiment, despite its blindness to justice, gives rise to moral justice—the central target of Nietzsche’s critique. This critique notwithstanding, the *Genealogy* shows Nietzsche’s enduring commitment to the virtue of non-moral justice: a commitment that grounds his provocative view that moral justice spells the ‘end of justice’. The result provides a novel view of Nietzsche’s moral psychology in the *Genealogy*, his critique of morality, and his views on justice.

American diners began to flock to Chinese restaurants more than a century ago, making Chinese food the first mass-consumed cuisine in the United States. By 1980, it had become the country's most popular ethnic cuisine. Chop Suey, USA offers the first comprehensive interpretation of the rise of Chinese food, revealing the forces that made it ubiquitous in the American gastronomic landscape and turned the country into an empire of consumption. Engineered by a politically disenfranchised, numerically small, and economically exploited group, Chinese food's tour de America is an epic story of global cultural encounter. It reflects not only changes in taste but also a growing appetite for a more leisurely lifestyle.

Americans fell in love with Chinese food not because of its gastronomic excellence but because of its affordability and convenience, which is why they preferred the quick and simple dishes of China while shunning its haute cuisine. Epitomized by chop suey, American Chinese food was a forerunner of McDonald's, democratizing the once-exclusive dining-out experience for such groups as marginalized Anglos, African Americans, and Jews. The rise of Chinese food is also a classic American story of immigrant entrepreneurship and perseverance. Barred from many occupations, Chinese Americans successfully turned Chinese food from a despised cuisine into a dominant force in

the restaurant market, creating a critical lifeline for their community. Chinese American restaurant workers developed the concept of the open kitchen and popularized the practice of home delivery. They streamlined certain Chinese dishes, such as chop suey and egg foo young, turning them into nationally recognized brand names.

The foundation for success in learning to read and write begins in infancy. As early childhood professionals, we have both the opportunity and the privilege to shape the progress young children make in acquiring the literacy skills, oral language skills, and background knowledge vital to their later success in learning to read and write. By engaging infants, toddlers, and preschoolers in experiences that foster oral language and content knowledge, literacy skills, and cognitive ability, we build a foundation for children's later academic success. Promoting children's desire to read and write is as important as helping children develop the necessary understandings and skills essential for learning how to read and write. Without motivation, children will read and write relatively little and only what and when they must. This book addresses four main points: What children need to learn in these early years The strategies that teachers can use to help children acquire these foundations The features of emergent literacy and language understandings and skills How to design the physical environment in early childhood classrooms to support language and literacy learning This revision updates information, cites new research, and includes new figures. The newest edition of this bestselling book will help early childhood professionals and families support young children in acquiring the understandings, knowledge, and skills needed for later success in learning to read and write.

****Named One of the New York Post's Best New Books to Read **** FIRE IN THE STRAW is the witty and deeply felt memoir of Nick Lyons, a man with an intrepid desire to reinvent himself—which he does, over and over. Nick Lyons shape shifts from reluctant student and graduate of the Wharton School, to English Professor, to husband of a fiercely committed painter, to ghost writer, to famous fly fisherman and award-winning author, to father and then grandfather, to Executive Editor at a large book publishing company, and finally to founder and publisher of his own successful independent press.. Written with the same warm and earthy voice that has enthralled tens of thousands of fly-fishing readers, Nick weaves the disparate chapters of his life: from the moment his widowed mother drops him off at a grim boarding school at the age of five, where he spends three lonely and confusing years; to his

love of basketball and pride playing for Penn; to the tumultuous period, in the army and after, when he found and was transformed by literature; to his marriage to Mari, his great love and anchor of his life. Suddenly, with a PhD in hand and four children, Nick embarks on a complex and thrilling ride, juggling family, fishing, teaching, writing, and publishing, the wolf always at his door. Against all odds, The Lyons Press survives, his children prosper, his wife's art flourishes, and his books and articles make him a household name. Fire in the Straw is a love story, a confessional, and a beautiful big-hearted memoir.

Adapting Infrastructure to Climate Change HarperCollins

Many of the challenges that decision-makers grapple with in relation to climate change are governance related. Planning and decision-making is evolving in ambiguous institutional environments, in which many key issues remain unresolved, including relationships between different actors; funding arrangements; and the sources and procedures for vetting data. These issues are particularly acute at this juncture, as climate adaptation moves from broad planning processes to the management of infrastructure systems. Concrete decisions must be made. *Adapting Infrastructure to Climate Change* draws on case studies of three coastal cities situated within very different governance regimes: neo-corporatist Rotterdam, neo-pluralist Boston and semi-authoritarian Singapore. The book examines how infrastructure managers and other stakeholders grappling with complex and uncertain climate risks are likely to make project-level decisions in practice, and how more effective decision-making can be supported. The differences across governance regimes are currently unaccounted for in adaptation planning, but are crucial as best practices are devised. These lessons are also applicable to infrastructure planning and decision-making in other contexts. This book will be of great interest to scholars of climate change and environmental policy and governance, particularly in the context of infrastructure management.
