This volume brings together diverse thinkers and practitioners on Participatory Action Research (PAR) and educational development in South Asia. Contributors draw from their research and field experiences on how PAR is currently being understood, theorized, debated, and implemented for education of children in South Asia. This book will act as a key reference text for academics, students, and practitioners interested in the intersection of education and participatory development in the region. The book opens a constructive debate on PAR approaches to education and proposes a reflective framework that allows the reader to develop their perspectives about the conceptual, methodological, and sociopolitical potential and limitations of participatory approaches. In a multi-faith world, Islam is widely regarded as dogmatic and exclusivist. Yet in the Qur'an we have a great and worthy example of how to live in diversity, of powerful scriptural tenets that lend themselves precisely to engagement with those of other faiths. As such Islam has much to add to the debate on Religious Pluralism. For Muslims the issue is a delicate one. Aside from being tolerant and respectful of other faiths, advocating freedom of faith, and peaceful coexistence for all humanity, Muslims have to intellectually engage on matters of religious truth whilst defending the validity of their own Islamic tenets. This study is focused on the Qur'anic text. It explores the Qur'anic conception of normative religious pluralism with a view to providing answers to questions such as whether the Qur'an itself regards normative religious pluralism as a value system or simply a method through which the Qur'anic world view can be actualized. In doing so the author corrects some highly controversial misquoted, mistranslated, and/or quoted out of context verses of the Qur'an, including the so-called verse of the sword and the perception of not taking non-Muslims as friends. In reality, the Qur'an calls for freedom of faith and peaceful coexistence, but condemns oppression, religious persecution, and those who initiate hostilities. In this way it not only invokes human dignity, but restores it when it is violated.

This volume provides a fascinating glimpse into the complex language ecologies of Southeast Asia. Adopting a relational perspective, it considers their significance for the region, its peoples, the policy and practice of language teaching, learning and assessment and the fate of local languages. It gives particular prominence to the relationship between English and Chinese, it's likely transformation at a time of significant global change and the impact that these two languages and their synergy will have on the place of other languages and dialects. Dynamic Ecologies: A Relational Perspective on Languages Education in the Asia-Pacific Region draws on the research and insights of key scholars in the field and provides case studies that illustrate the impact of relevant language policy in countries including Singapore, Malaysia, Hong Kong, South Korea and Australia. Assessment of student learning outcomes (ASLO) is one of the key activities in teaching and learning. It serves as the source of information in determining the quality of education at the classroom and national levels. Results from any assessment have an influence on decision making, on policy development related to improving individual student achievement, and to ensure the equity and quality of an education system. ASLO provides teachers and school heads with information for making decisions regarding a students' progress. The information allows teachers and school heads to understand a students' performance better. This report reviews ASLO in three South Asian countries---Bangladesh, Nepal, and Sri Lanka---with a focus on public examinations, national assessment, school-based assessment, and classroom assessment practiced in these countries.

THE THIRTEENTH EDITION OF THE CLASSIC TEXTBOOK, FIRST PUBLISHED IN 1960 Written by one of the great teachers of anatomy, the thirteenth edition of Clinical Anatomy continues to provide thousands of medical students, postgraduate trainees and junior doctors across the world with essential anatomical information within a clinical setting. It is particularly appropriate for those preparing for the Intercollegiate Membership Examination of the Royal Colleges of Surgeons (I-MRCS). Professor Harold Ellis is again joined by Professor Vishy Mahadevan to provide detailed, easy-to-follow structured text suitable for anatomy students and trainees of all levels. Fully revised and updated with many new illustrations, this new edition features for the first time, several anatomical drawings overlaid on a living anatomy model to provide detailed topographical orientation and accurate surface representation. The companion website at www.ellisclinicalanatomy.co.uk/13edition contains digital flashcards of all the illustrations and photographs contained in the book - ideal for revision and teaching purposes.

Atlas of Clinical Anatomy Innovative Strategies in Higher Education for Accelerated Human Resource Development in South Asia Scientific Essay from the year 2011 in the subject Pedagogy - The Teacher, Educational Leadership, language: English, abstract: Krieg (2005) in his review of impact of teacher gender on student gender states that while a large body of research focuses on the gender of students, less research explores the impacts of a teacher's gender on students (Hopf & Hatzichristou 1999). Evidence suggests that male teachers tend to be more authoritative whereas female teachers tend to be more supportive and expressive (Meece, 1987). A survey of 20 teachers indicates that male teachers are likely to select a more aggressive disciplinary approach toward boys while teachers of either gender tended to ignore boys' disruptive behavior than that of girls when the behavior was not aggressive (Rodriguez, 2002). Krieg (2005) further reveals that researchers have found that teachers interact differently with students of similar gender than they do with students of opposite gender Einarsson, C., & Granström, K. (2002) This includes evidence suggesting disciplinary procedures and proclivity to discipline vary by both student and teacher gender. Likewise, a teacher's perception of student characteristics and abilities appear to systematically vary by gender. Other studies find male students benefit at the expense of female students in the amount and quality of interaction received from teachers of both genders. What has yet to be determined is how these differences in discipline, perceptions of student ability, and interactions between student and teacher influence student outcomes as measured by standardized exams.

This publication is part of a series of six country reports on technical and vocational education and training (TVET) and higher education in Bangladesh, Nepal, and Sri Lanka. Each report presents current arrangements and initiatives in the respective country's skills development strategies. These are complemented by critical analyses to determine key issues, challenges, and opportunities for innovative strategies toward global competitiveness, increased productivity, and inclusive growth. The emphasis is to make skills training more relevant, efficient, and responsive to emerging domestic and international labor markets. The reports were finalized in 2013 under the Australian AID-supported Phase 1 of Subproject 11 (Innovative Strategies for Accelerated Human Resource Development) of Regional Technical Assistance 6337 (Development Partnership Program for South Asia).

A country's education system plays a pivotal role in promoting economic growth and shared prosperity. Sri Lanka has enjoyed high school-attainment and enrollment rates for several decades. However, it still faces major challenges in the education sector, and these challenges undermine the country's inclusive growth goal and its ambition to become a competitive upper-middle-income country. The authors of Sri Lanka Education Sector Assessment: Achievements, Challenges, and Policy Options offer a thorough review of Sri Lanka's education sector—from early childhood education through higher education. With this book, they attempt to answer three questions: • How is Sri Lanka's education system performing, especially with respect to participation rates, learning outcomes, and labor market outcomes? • How can the country address the challenges at each stage of the education process, taking into account both country and international experience and also best practices? • Which policy actions should Sri Lanka make a priority for the short and medium term? The authors identify the most critical constraints on performance and present strategic priorities and policy options to address them. To attain inclusive growth and become globally competitive, Sri Lanka needs to embark on integrated reforms across all levels of education. These reforms must address both short-term skill shortages and long-term productivity. As Sri Lanka moves up the development ladder, the priorities of primary, secondary, and postsecondary education must be aligned to meet the increasingly complex education and skill requirements.

With gripping narrative power, *The Condor's Shadow* traces the ways in which human greed and ignorance have wreaked havoc on our ecological landscape. The heir apparent to Peter Matthiessen's 1959 classic *Wildlife in America*, *The Condor's Shadow* is a brilliant and compulsively readable study of the state of North American wildlife and what is being done to reverse the damage humans have caused. With equal respect for the smallest feather-mite and the fiercest grizzly, the frailest flower and the stately redwood, David S. Wilcove illustrates--in jargon-free, often witty prose--nature's delicate system of checks and balances, examining the factors that determine a species' vulnerability and the consequences of losing even the tiniest part of any ecosystem. An examination of both the heart-wrenching failures and stunning successes of our conservation efforts, *The Condor's Shadow* chronicles the destruction and resilience of our American wilderness and offers an insightful, eloquent overview that will appeal to avid conservationists and recreational nature-lovers alike.
