England's school system performs below its potential and can improve significantly. This white paper outlines action designed to: tackle the weaknesses in the system; strengthen the status of teachers and teaching; reinforce the standards set by the curriculum and qualifications; give schools back the freedom to determine their own

development; make schools more accountable to parents, and help them to learn more quickly and systematically from good practice elsewhere; narrow the gap in attainment between rich and poor. The quality of teachers and teaching is the most important factor in determining how well children do. The Government will continue to raise the quality of new entrants to the profession, reform initial teacher training, develop a network of "teaching schools" to lead training and development, and reduce the bureaucratic burden on schools. Teachers will be given more powers to control bad

behaviour. The National Curriculum will be reviewed, specifying a tighter model of knowledge of core subjects so that the Curriculum becomes a benchmark against which school can be judged. Schools will be given more freedom and autonomy, the Academies programme extended and parents will be able to set up "Free Schools" to meet parent demand.

Accountability for pupil performance is critical, and much more information will be available to aid understanding of a school's performance. School improvement will be the responsibility of schools, not central government. Funding of schools needs to be fairer and more transparent, and there will be a Pupil Premium to target resources on the most deprived pupils.

Beyond A-levels Routledge Teaching and Learning Foreign Languages provides a comprehensive history of language teaching and learning in the UK from its earliest beginnings to the year 2000. McLelland offers the first

history of the social context of foreign language education in Britain, as well as an overview of changing approaches, methods and techniques in language teaching and learning. The important impact of classroom-external factors on developments in language teaching and learning is also taken into account, particularly regarding the policies and public examination requirements of the 20th century. Beginning with a chronological overview of language teaching and learning in Britain, McLelland explores which languages were learned when, why and by whom, before examining the social history of language teaching and learning in greater detail, addressing topics including the status that language learning and teaching have held in society. McLelland also provides a history of how languages have been taught, contrasting historical developments with current orthodoxies of language teaching. Experiences outside school are discussed with reference to examples from adult education, teach-yourself courses and military language learning.

Providing an accessible, authoritative history of language education in Britain, Teaching and Learning Foreign Languages will appeal to academics and postgraduate students engaged in the history of education and language learning across the world. The book will also be of interest to teacher educators, trainee and practising teachers, policymakers and curriculum developers.

AQA GCSE English Language and English Literature Taylor & Francis

This White Paper details the Government's 10-year reform programme for secondary and post-secondary education for 14-19 year olds, and sets out its response to the recommendations of the Tomlinson report (Working Group on 14-19 Reform final report available at www.14-19reform.gov.uk) published in October 2004. Proposals include: i) retention of GCSEs and A levels as the cornerstones of the education system (rather than adopting a universal baccalaureate-style qualification), but making improvements such as ensuring it is impossible to get a GCSE grade C or above without functional numeracy and literacy skills, promoting science GCSEs, allowing the most able A level students to take HE modules in the sixth form, and reducing the assessment burden at A level; ii) introducing new specialised Diplomas, covering both academic and vocational subjects as well as work experience, at three levels equivalent to foundation, GCSE and advanced level. The first four Diplomas will be available by 2008 for

information and communication technology (ICT), engineering, health and social care, creative and media subjects; iii) developing a pilot programme for 14-16 year olds by 2007-08, based on the post-16 Entry to Employment programme, which will give pupils intensive personal guidance and support, involve significant work-based learning, lead to a level 1 Diploma with a range of further options including apprenticeships; iv) other proposals including introducing models of moderated teacher assessment in compulsory subjects to help raise standards across the curriculum; and introducing a 'pupil profile' for all 14 year old to record their cross-curricula achievements.

Eduqas GCSE Food Preparation and Nutrition: Revision Guide The Stationery Office

What students are deemed to have achieved when they are sixteen is the measure of how successful or otherwise their progress through the system of compulsory education has been. And yet despite the importance of the process there has been no clear consensus about how best to assess students at sixteen. The various formal examinations which have been tried have now largely been superseded by the GCSE: a common system of examining at sixteen. Originally published in 1988, the book discusses the development of this system, its

application to the main subject areas of the curriculum and some of its innovative aspects from both a theoretical and a practical standpoint. In addition, it also looks at the broader aspects of assessment of pupils at the age of sixteen and how we can give a more rounded indication of their achievements and abilities by the use of profiles and records of achievement.
