Contemporary Debates in Education Pearson Educación

This book captures an urgent moment for language teaching, learning and research. At its core are a series of debates concerning gender stereotyping, the place of linguistics in modern languages, language activism, multilingualism and modern languages and digital humanities. Taken together, these debates explore the work that languages, and that those who learn and speak them, do in the world as well as the way we think 'through' and 'in'

a language and are shaped by it. Language Debates acknowledges the history of language teaching and the current realities of language teaching and learning. It is bold in suggesting ways forward for reform and for policy, setting languages and language learning at the heart of a consciously transformative set of goals. This book is therefore essential reading for academics, language teachers, policy makers, students, activists and those passionate about progressing language learning and teaching. The editors and contributors make up a multilingual and multicultural team who work across languages, cultures and borders with a globally-informed approach to their work. Uniquely, the debates in this volume are based on events with participants in the Language Acts and Worldmaking Debates Series and/or workshops within the wider research project and take into account the ensuing discussions there. The interview accompanying each

Debate is also available as a video and/or audio recording. These written texts then allow the conversation to continue beyond the printed pages of the book through links to the Language Acts and Worldmaking series website ([www.jmlanguages.com/languageacts](http://www.jmlanguages.com/languageacts)) which includes recorded debates, additional materials and more information on how you can join the debate. Like all the volumes in the Language Acts and Worldmaking series, the overall aim is two-fold: to challenge widely-held views about language learning as a neutral instrument of globalisation and to innovate and transform language research, teaching and learning, together with Modern Languages as an academic discipline, by foregrounding its unique form of cognition and critical engagement. Specific aims are to:

- propose new ways of bridging the gaps between those who teach and research languages and those who learn and use them in everyday contexts from the professional to the personal
- put research into the hands of wider audiences
- share a philosophy, policy and practice of language teaching and learning which turns research into action
- provide the research, experience and data to enable informed debates on current issues and attitudes in language learning, teaching and research
- share knowledge across and within all levels and experiences of language learning and teaching
- showcase exciting new work that derives from different types of community activity and is of practical relevance to its audiences
- disseminate new research in languages that engages with diverse communities of language practitioners.

The Inheritance of Loss Bonnier Publishing Ltd.

Golding ' s iconic 1954 novel, now with a new foreword by Lois Lowry, remains one of the greatest books ever written for young adults and an unforgettable classic for readers of any age. This edition includes a new Suggestions for Further Reading by Jennifer Buehler. At the dawn of the next world war, a plane crashes on an uncharted island, stranding a group of schoolboys. At first, with no adult supervision, their freedom is something to celebrate. This far from civilization they can do anything they want. Anything. But as order collapses, as strange howls echo in the night, as terror begins its reign, the hope of adventure seems as far removed from reality as the hope of being rescued.

"I don't know whether there's a law that stops my doing this, Jim; but if there is, you've got to get round it. You're a lawyer and you know the game. You're my pal and the best pal I've had, Jim, and you'll do it for me." The dying man looked up into the old eyes that were watching him with such compassion and read their acquiescence. No greater difference could be imagined than existed between the man on the bed and the slim neat figure who sat by his side. John Millinborn, broad-shouldered, big-featured, a veritable giant in frame and even in his last days suggesting the enormous strength which had been his in his prime, had been an outdoor man, a man of large voice and large capable hands; James Kitson had been a student from his youth up and had spent his manhood in musty offices, stuffy courts, surrounded by crackling briefs and calf-bound law-books. Yet, between these two men, the millionaire ship-builder and the successful solicitor, utterly different in their tastes and their modes of life, was a friendship deep and true. Strange that death should take the strong and leave the weak; so thought James Kitson as he watched his friend.

“ The book you are holding will fundamentally change the way you look at the collection, compartmentalization, analysis, distribution, application, and protection of intelligence in your business. J. C. Carleson ’ s presentation of years of spy tradecraft will make you a more effective force within your organization. ” —James Childers, CEO, ASG Global, Inc. When J. C. Carleson left the corporate world to join the CIA, she expected an adventure, and she found it. Her assignments included work in Iraq as part of a weapons of mass destruction search team, travels throughout Afghanistan, and clandestine encounters with foreign agents around the globe. What she didn ’ t expect was that the skills she acquired from the CIA would be directly applicable to the private sector. It turns out that corporate America can learn a lot from spies—not only how

to respond to crises but also how to achieve operational excellence. Carleson found that the CIA gave her an increased understanding of human nature, new techniques for eliciting information, and improved awareness of potential security problems, adding up to a powerful edge in business. Using real examples from her experiences, Carleson explains how working like a spy can teach you the principles of:

Targeting—figuring out who you need to know and how to get them  
Elicitation—a subtle way to get the answers you need without even asking a question  
Counterintelligence—how to determine if your organization is unwittingly leaking information  
Screening—CIA recruiters' methods for finding and hiring the right people  
The methods developed by the CIA are all about getting what you want from other people. In a business context, these techniques apply to seeking a new job, a promotion, a big sale, an advantageous regulatory ruling, and countless other situations. As Carleson writes, “ In a world where information has a price, it pays to be vigilant. ” Her book will show you how.

With over sixty million casualties World War II was the bloodiest conflict in history. In this incisive introduction, Christopher Catherwood covers all the key battles, while giving the wider story behind them. He also brings a fresh angle to the conflict, emphasising the huge impact of the preceding Sino-Japanese War on World War II and the relative unimportance of the British campaign in Africa. From the impact of the Hiroshima bombing to the horrors wreaked by the Red Army and the Nazis, Catherwood makes clear the legacy of the war today. Full of text-boxes revealing key details about intelligence, weaponry, and the social milieu of the conflict, there is no better brief introduction.
