The content is broken into manageable sections and advice is offered to help build students' confidence. Exam tips and techniques are provided to support students throughout the revision process.

Revision Notes: CCEA ICT for GCSE Rhinegold Education  
Society for Educational Studies Annual Book Prize winner: 2nd Prize This ground-breaking volume draws upon a rich and variegated range of methodologies to understand more fully the practices, policies and resources available in and to religious education in British schools. The descriptions, explanations and analyses undertaken here draw on an innovative combination of policy work, ethnography, Delphi methods, Actor Network Theory, questionnaires, textual analysis as well as theological and philosophical insight. It traces the evolution of religious education in a post-religious age from the creation of policy to the everyday experiences of teachers and students in the classroom. It begins by analysing the way in which policy has evolved since the 1970s with

an examination of the social forces that have shaped curriculum development. It goes on to explore the impact and intentions of a diverse group of stakeholders with sometimes competing accounts of the purposes of religious educations. It then examines the manner in which policy is, or is not, enacted in the classroom. Finally, it explores contradictions and confusions, successes and failures, and the ways in which wider public debates enter the classroom. The book also exposes the challenge religious education teachers have in using the language of religion.

The Spiritual Scientist bridges the gap between science and spirituality to give the reader an understanding of how energy works and how one can balance and restore their energies to have a tranquil and peaceful life. The book covers the scientific concepts of energy and the human body and relates these concepts to their spiritual aspects. The scientific concepts will be written in an accurate and a simple fashion, so the reader will be able to understand these concepts without having a high degree of scientific knowledge. The book will discuss the scientific concept first then relate these to the spiritual aspect. The first chapter is an introduction to what energy is in basic terms with equations and diagrams so the reader can fully understand that every living thing has its own unique energy. Chapter 2 will describe energetic aura in detail as this is very important for the reader to fully understand, as the book will focus on spiritual practices that can be used to balance and restore energetic aura, including the chakra system. Chapter 3 will describe the basic anatomy of the human body and will describe the basic fundamental structures such as a cell and DNA, as well as organs and bodily systems including the endocrine system. Chapter 4 will focus on the 13 chakras in the body. The 13 chakras are represented in

the spiritual scientist's logo. This chapter will help the reader understand the different chakras in the body and identify when there is a problem or if a chakra is inactive, overactive or imbalanced. Chapters 5-7 will describe specific spiritual practices including crystal healing and aromatherapy that can be incorporated to ground, balance and restore ones' chakras. Chapter 8 will describe the basic function and structure of the brain and how mindfulness techniques including meditations can be used to restore peace and tranquility in ones' everyday life. The final chapter will be a guided step-by-step protocol combining all the knowledge learnt throughout the book to create their own meditation kits to balance specific auras. Throughout the book, there will be guided meditations and activities, so the reader will find it easier to understand the importance of these spiritual practices and incorporate them into everyday life.
