This collection of essays brings together eighteenth-century scholars from a variety of disciplines, to discuss conversation in the eighteenth century as concept and practice. At the heart of the volume is a simple question: are eighteenth-century conceptualisations of the role and purpose of conversation still relevant or useful to scholars and thinkers today? This volume contains essays by leading scholars of the period as well as early career researchers, and answers a need for a broad-ranging discussion of the concept of conversation in the arts, social sciences and humanities. The long eighteenth century is a particularly fruitful starting point for work on this topic, since ideas about conversation permeated all types of writing in this period, from the early forerunners of scientific textbooks to philosophical dialogues. The collection covers an exceptionally wide range of long-eighteenth-century authors, artists, lawmakers, texts and works of art, and, although the focus of the volume is largely on eighteenth-century Britain, the volume takes note of the rich relationships between continental European thought and British intellectual life in the period, and of the influence of British ideas in the newly independent American republic.

"The attribution of profits to permanent establishments (PEs) is probably one of the most complex subjects of the international tax arena. The interaction of treaty rules and domestic legislations sometimes leads to unacceptable results such as double taxation or double non-taxation. This book compares the tax treatment of cross-border dealings between different parts of the same enterprise in several countries."--Extracted from publisher website on June 29, 2016.
